Help protect your computer with Windows Firewall

Windows Firewall can help prevent hackers or malicious software from gaining access to your computer through the Internet or a network.

[How does a firewall help protect my computer?](#)

[What are network locations?](#)

 Home or work (private) networks	Not Connected 
 Public networks	Connected 
Networks in public places such as airports or coffee shops	
Windows Firewall state:	On
Incoming connections:	Block all connections to programs that are not on the list of allowed programs
Active public networks:	 wushock
Notification state:	Notify me when Windows Firewall blocks a new program

Control Panel Home

- Allow a program or feature through Windows Firewall
- Change notification settings
- Turn Windows Firewall on or off**
- Restore defaults
- Advanced settings
- Troubleshoot my network

Help protect your computer with Windows Firewall

Windows Firewall can help prevent hackers or malicious software from gaining access to your computer through the Internet or a network.

[How does a firewall help protect my computer?](#)

[What are network locations?](#)

Update your Firewall settings

Windows Firewall is not using the recommended settings to protect your computer.

[Use recommended settings](#)

[What are the recommended settings?](#)
