To ensure your investments in collaboration are successful, you should do these 5 things:

Get actionable insight into adoption

Focus in on the root cause of user experience issues

Gain a holistic view of your collaboration technologies

Get the metrics that determine ROI and drive business transformation

Create a one-stop shop to configure and control security and data loss prevention policies

Now, there's a solution—Control Hub.

Easily provision, control, and analyze collaboration services and the user experience from a single pane of glass

Define security and compliance settings for retention and eDiscovery including legal hold

Secure your valuable assets with always-on encryption

**The industry's best visibility and control**

Only Control Hub offers insight into meetings, messaging, calling, devices, and contact center information

**On-premises and hybrid management**

Manage on-premises and hybrid cloud collaboration environments with on-premises connectors like Webex Edge Video Mesh and on-premises keys

**Super-simple user management**

Zero-touch provisioning makes it easy to import and sync users from any identity provider—whether on premises or in the cloud

**Accelerate adoption, understand ROI**

Understand how your organization uses Webex services and measure ROI and usage trends

**Give the right access to the right people**

Group-based controls make sure users get the right level of access and entitlement based on policies you define

**Deliver a better experience**

Identify issues by user, location, and device and rapidly drill down to the info you need to address them
