

Yesterday's data center wasn't made for this.

But today's is.

In today's hybrid world, you're facing new possibilities—and risks—that call for a new kind of data center.

300%

By 2023, the number of applications running in the data center and edge locations will increase by 300%

61%

61% of organizations cite manual processes and siloed teams as top bottlenecks in app delivery pipelines

75%

By 2023, 75% of Global 2000 IT organizations will adopt automated operations practices to transform their IT workforce to support unprecedented scale

Partners

Cisco and our Partners have the data center solutions that empower your team to deliver:

More applications

More securely

More reliably

Our data center solutions provide:

A full-stack environment:

- Dynamic and open for better flexibility
- Integrated with your business-critical solutions
- Scales quickly to meet business demands
- UCS X-Series and Intersight full-stack observability

A secure environment:

- Security built into your apps and data
- Anywhere, any-device protection
- Defends against ransomware, viruses, compromises, and more

A smart environment:

- Makes recommendations for action
- Learns to make fixes automatically
- Everything managed from a single location
- UCS X-Series and our partners provide end-to-end solutions

Open. Integrated. Automated. Secure. Today's data center infrastructure. From Cisco—and our Partners—together.
