

Components and Cables for Collaboration Devices

Version 11.1

[Quick Link --> Go to INDEX](#)

Introduction

January 2024 / Version 11.1

Purpose of this guide

This Components and Cables Guide is designed to help Cisco Employees and Partners choose the correct PIDs (Product ID) when placing orders for Video Collaboration Devices in CCW.

In this guide, you will find the following:

- Orderable PIDs for each product
- Cables and other components that are included automatically
- Software feature options such as MultiSite and Remote Monitoring
- Microphone options where applicable
- Mounting options where applicable
- Cable options and power cables
- Post-sale licensing
- Spares and spare parts

Hardware as a Service (HaaS)

The Cisco Hardware as a Service (HaaS) Ordering Guide has good information about this service.

Rebranding

With recent advances in native Microsoft Teams mode on many newer devices, "Webex" has been removed and replaced by "Cisco" on product names. This continues the tradition of supporting many different protocols - not only Cisco call control - on our devices.

This document was prepared by Cisco CTG Technical Marketing Engineering. If you have feedback or questions, please send an email to the following:

ctg_tme_devices@cisco.com

Notes

- * TAA and Made in a Neutral Country PIDs are listed herein
- * REFURBISHED :There is also a tab for refurbished / remanufactured video devices
- * NEW LINKS for AES67 and AV Integrator Pack on the Index page
- * **NAVIGATORS** - all new versions of table and wallmount Navigators have a -L in the part number. This indicates an increase in RAM to facilitate running the MS Teams UI on the device.

Software options: **MultiSite**, **Remote Monitoring**, **Encryption**, and **AV Integrator Pack**

MultiSite is available for some endpoints as an option in CCW. For others, it must be ordered separately. MultiSite does not apply to Webex cloud-registered devices.

The top level PID for MultiSite is L-ROOM-PAK.

Each endpoint is listed under that PID.

Remote Monitoring (web snapshots) must be ordered separately.

The top level PID for Remote Monitoring is L-TP-RM.

Each endpoint is listed under that PID.

Encryption is required for all endpoints registering to Webex cloud.

This is *not* a paid option - it is no-cost and is chosen at time of order.

If your endpoint doesn't have it, and you need it for Webex cloud, contact your account team for support.

AV Integrator Pack is available for certain newer endpoints.

It allows the use of additional Table Mic Pro, and in some cases it enables Audio Console.

* TAA Compliance:

[TAA Trade Agreements Act Explained](#)

* End of Life Products

Some products that have already been announced End of Life are actually still orderable. You can find them listed in this document.
