# Cisco ACI. An Optimal Solution for the Microsoft Cloud Platform.

Traditional model: Many Control Points

Application-centric: Simplified Control

Visibility and monitoring and trouble shooting

Management and control

Provisioning and configuration

Deployment

Siloed IT teams

Cisco ACI for the Microsoft Cloud Platform

Quick remediation of faults and trouble tickets

Unified management using a single dashboard

Automation with policy-based profiles

Faster deployment - from weeks to hours

Collaborative policy automation improves efficiency across teams by 20%*
