关于本文档

本文档面向在思科身份服务引擎 (ISE) 1.3 生产环境中部署 pxGrid 的思科工程师、合作伙伴和客户。读者应熟悉 ISE 和 pxGrid。

本文档重点介绍如何为 ISE pxGrid 节点和 pxGrid 客户端部署外部 CA 签名的证书。

以下系列文档将详细介绍有关证书部署的其他注意事项（例如自签名 ISE 身份证书和 pxGrid 样本证书）：
《使用 Cisco pxGrid 部署证书》

- 证书颁发机构 (CA) 签名的 pxGrid ISE 节点和 CA 签名的 pxGrid 客户端
- 证书颁发机构 (CA) 签名的 pxGrid 客户端和自签名的 ISE pxGrid 节点证书
- 自签名证书与 ISE pxGrid 节点和 pxGrid 客户端

有关在测试环境中配置 pxGrid 的信息，请参阅以下参考资料：

http://www.cisco.com/c/dam/en/us/td/docs/security/ise/how_to/HowTo-84-Configure_and_Test_Integration_with_Cisco_pxGrid.pdf

本文档将介绍分布式 ISE 环境中的外部 ISE pxGrid 节点配置和 pxGrid 主用-备用配置。用于测试这些配置的 pxGrid 客户端是运行 OSX 10.8.5 的 MacBook Pro 和适用于 pxGrid java SDK 的 Oracle Java Development Kit (jdk-8u-20-macros-x64.dmg)。如果您运行的是其他版本的 Linux，请参阅

http://www.cisco.com/c/dam/en/us/td/docs/security/ise/how_to/HowTo-84zConfigure_and_Test_Integration_with_Cisco_pxGrid.pdf

本文档还将介绍如何使用 POC 部署中所用的自签名证书和样本证书来配置 pxGrid ISE 节点。不过，如欲了解详细信息，还请参阅相关文档。

Microsoft Enterprise 2008 CA R2 企业版服务器用于证书颁发机构 (CA)，pxGrid 客户端证书、pxGrid 节点证书和 ISE 节点证书均由其签名。

简介

思科平台交换架构 (pxGrid) 可在 IT 基础设施的不同部分（例如安全监控和网络检测系统、网络平台、资产和配置管理、身份和访问管理平台，以及几乎所有其他 IT 运营平台）之间实现跨平台的多供应商网络系统协作。当出现相应的业务或运营需求时，生态系统合作伙伴可以使用 pxGrid 通过发布/订阅方法，与使用 pxGrid 的思科平台及使用 pxGrid 的任何其他生态系统交换情景信息。

pxGrid 主要由三个部分组成：发布方、pxGrid 客户端和 pxGrid 控制器（即思科身份服务引擎 [ISE] pxGrid 节点）。

- pxGrid 客户端要订阅的信息主题的 pxGrid 发布方 - 在思科身份服务引擎 (ISE) 1.3 版中，ISE 是此信息（也称为功能）的唯一发布方。
- pxGrid 客户端 - 可以是支持的思科安全平台、pxGrid 生态系统合作伙伴或者运行 pxGrid SDK 的 Linux 或 MAC 主机，均需订阅发布的信息。
- pxGrid 控制器 - 思科身份服务引擎 (ISE) pxGrid 节点，用于控制客户端注册/管理和主题/订阅流程。

ISE 将发布以下信息主题：

- SessionDirectory - 已经过身份验证的 802.1X 会话的会话属性
- EndpointProtectionService - 自适应网络控制 (ANC) 隔离/取消隔离缓解操作
- TrustsecMetadataCapability - 安全组标记 (SGT) 信息
- EndpointProfileMetadata - ISE 策略信息
- IdentityGroup - 组和分析信息

pxGrid 客户端将订阅这些主题并获取 ISE 情景信息。

ISE 部署于分布式环境中，此环境中的所有节点都有不同的角色：主要 PAN（策略 Admin 节点），主要 MnT（监控）节点，PSN（策略服务节点）。pxGrid 节点也会作为不同的角色进行部署，而且在 CA（证书颁发机构）签名的环境中需要使用自定义的 pxGrid 模板。本文档将介绍在这种 ISE 分布式环境中对 ISE pxGrid 节点和 ISE pxGrid 客户端都使用 CA 签名的证书进行 pxGrid 配置的程序步骤。

此外，本文档还将介绍 pxGrid 主用-备用配置。

在本文档中，运行 OSX 10.8.5 的 MAC 将用作 pxGrid 客户端。

Microsoft Enterprise CA (Certificate Authority) 2008 R2 服务器将用作指定的 CA 服务器。请注意，用于 pxGrid 的自定义模板将同时具有客户端身份验证和服务器身份验证的增强型密钥用法 (EKU)。EKU 用于定义证书的用途，且以 ISO 定义的对象标识符 (OID) 来定义；在此使用案例中，一个用于客户端身份验证 (1.3.6.1.5.5.7.3.2)，另一个用于服务器身份验证 (1.3.6.1.5.5.7.3.1)。

使用 pxGrid 角色的 ISE 分布式部署简介

将 Windows 2008 R2 Enterprise CA 服务器用作 CA 机构。将 CA 根证书导入到每个 ISE 节点的受信任系统证书库中。CA 将使用 ISE 节点（pxGrid 节点除外）中定义的 Web 服务器模板和管理员“usage”证书为 CSR 节点请求提供服务。

pxGrid 节点则使用自定义模板，同时包含用于客户端身份验证和服务器身份验证的 EKU。

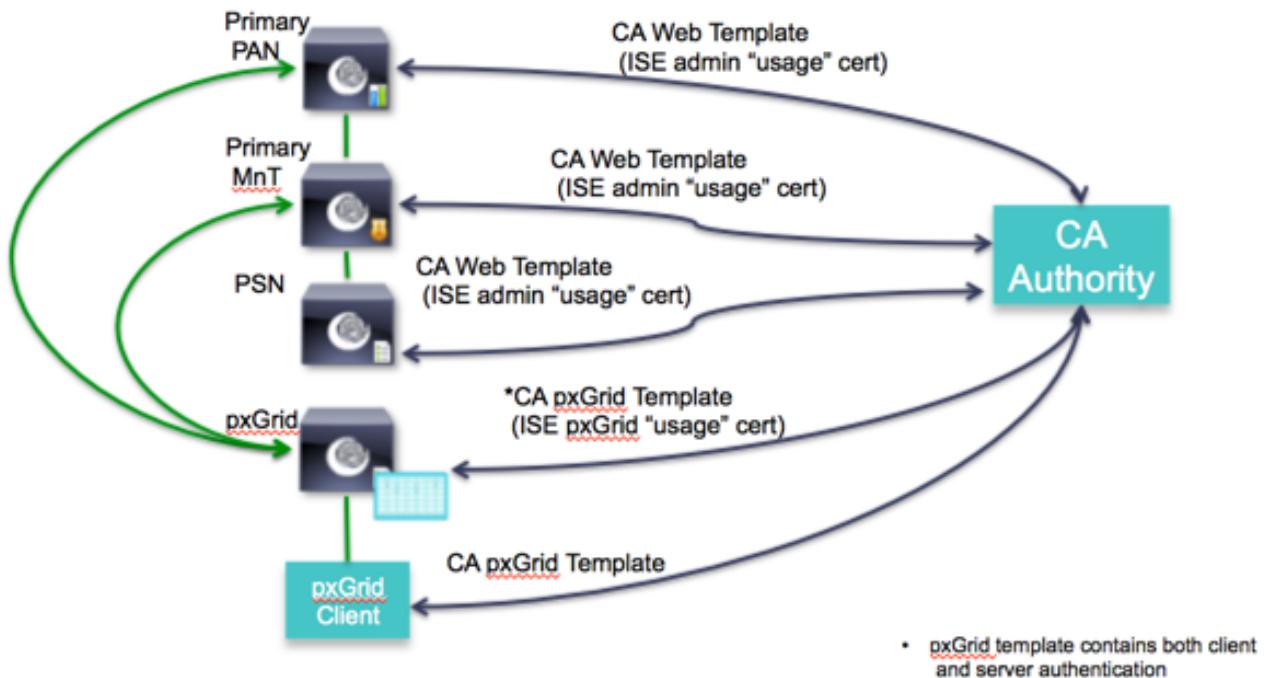

注：pxGrid 模板既可以是 Windows 2003 格式的用户模板的副本，也可以是添加了同时用于客户端身份验证和服务器身份验证的 EKU 的用户模板的副本。

必须将 pxGrid 节点的公钥/私钥对复制到每个主要 PAN（管理员）节点和主要 MnT（监控）节点的系统证书库，pxGrid 操作才能成功。

注：如果是主用-备用 pxGrid 配置，则要将第一个 pxGrid 节点（主要 pxGrid 节点）的公钥/私钥对导出到主要 PAN 节点和主要 MnT 节点中。将第二个 pxGrid 节点（辅助 pxGrid 节点）的公钥/私钥对导出到辅助 PAN 节点或辅助 MnT 节点中。

下图显示了典型的 ISE 分布式环境中各种不同 ISE 节点的证书生成情况。请注意，管理员“usage”证书用于除 pxGrid 节点外所有 ISE 节点的 CSR 请求生成过程。CA 服务器将使用“Web server”模板为这些请求提供服务。而 pxGrid “usage”证书则用于 pxGrid 节点 CSR 请求，由自定义 pxGrid 模板提供服务。

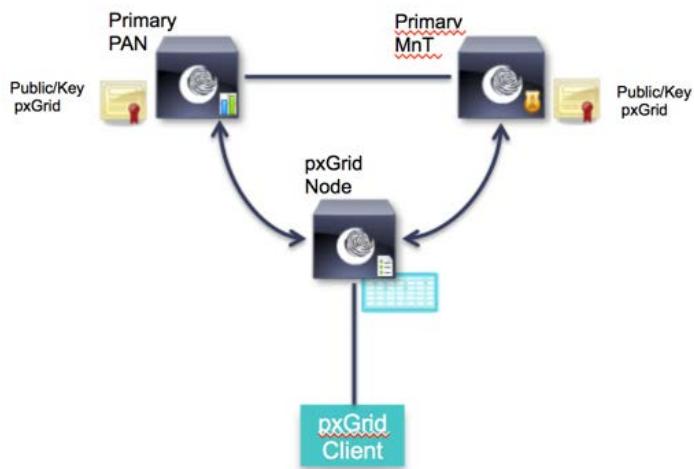

pxGrid In Distributed ISE Deployment

下图显示了分布式 ISE 环境中的 pxGrid 节点配置。pxGrid 节点在所有生产环境中都是外部节点。

需要将 pxGrid 节点的公钥/私钥同时复制到主要 PAN 节点和主要 MnT 节点的系统证书库后才能启用 pxGrid 控制器。

ISE Distributed Environment

pxGrid 角色配置

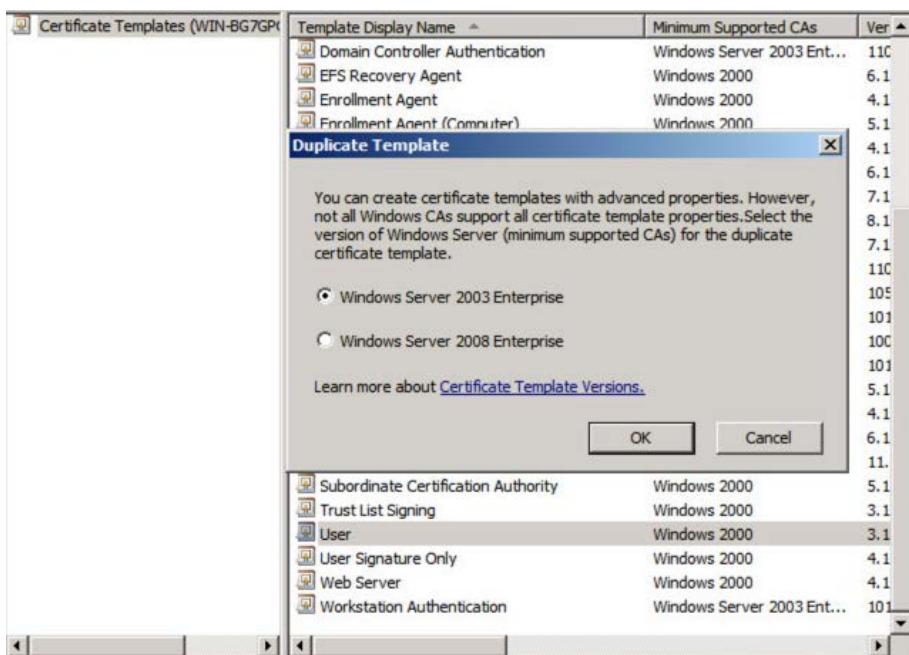

配置 Microsoft CA 2008 R2 企业版 pxGrid 模板

本节介绍 pxGrid 证书模板的配置。pxGrid 模板必须同时包含用于客户端身份验证和服务器身份验证的 EKU。

创建 pxGrid 模板的步骤如下：

步骤 1 Select -> Administrative Tools -> Certificate Authority -> CA 服务器旁的“+”下拉列表 -> 右键点击 Certificate Templates -> Manage

步骤 2 右键点击 User 模板并选择 Duplicate -> Select -> Windows 2003 Enterprise -> OK

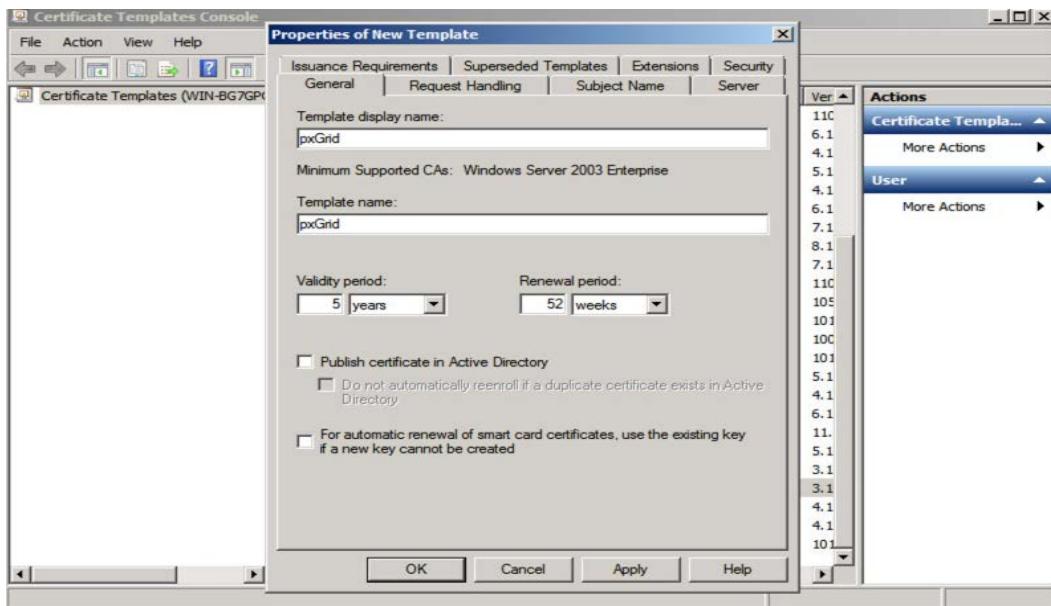

注：选择 Windows Server 2003 Enterprise 让其显示于模板 CA 窗口下拉列表中。

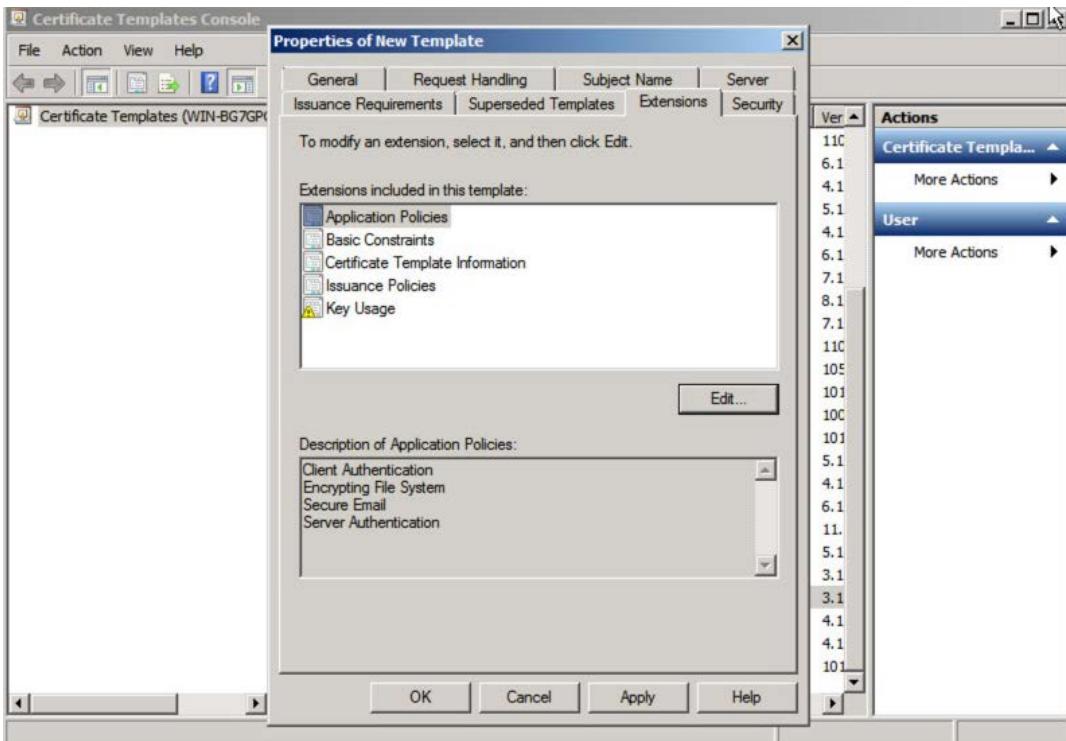

Certificate Template:

pxGrid

步骤 3 输入证书模板的名称，取消选中“Publish certificate in Active Directory”，提供有效期和续约期。

步骤 4 点击 Extensions -> Add -> Server Authentication -> OK -> Apply

不含 pxGrid 主用-备用配置的 pxGrid 节点配置

本节说明定义 ISE 节点、生成 CSR 请求以及从 CA 机构获取证书的步骤。这是所有 ISE 分布式部署的典型过程。此过程先在独立模式下进行配置，然后从主要 Admin 节点加入节点。

pxGrid 节点会将 ISE pxGrid “usage” 证书用于初始 CSR 请求，并由此前定义的 MS CA “pxGrid” 模板提供服务。返回的证书将与初始 pxGrid CSR 请求绑定。

将公钥/私钥对从 pxGrid 节点导出，然后导入到主要 PAN 节点和主要 MnT 节点中。

注: 在 pxGrid 主用-备用配置中，要将第二个节点或辅助 pxGrid 节点的公钥/私钥对导入到辅助 PAN 节点和辅助 MnT 节点中。

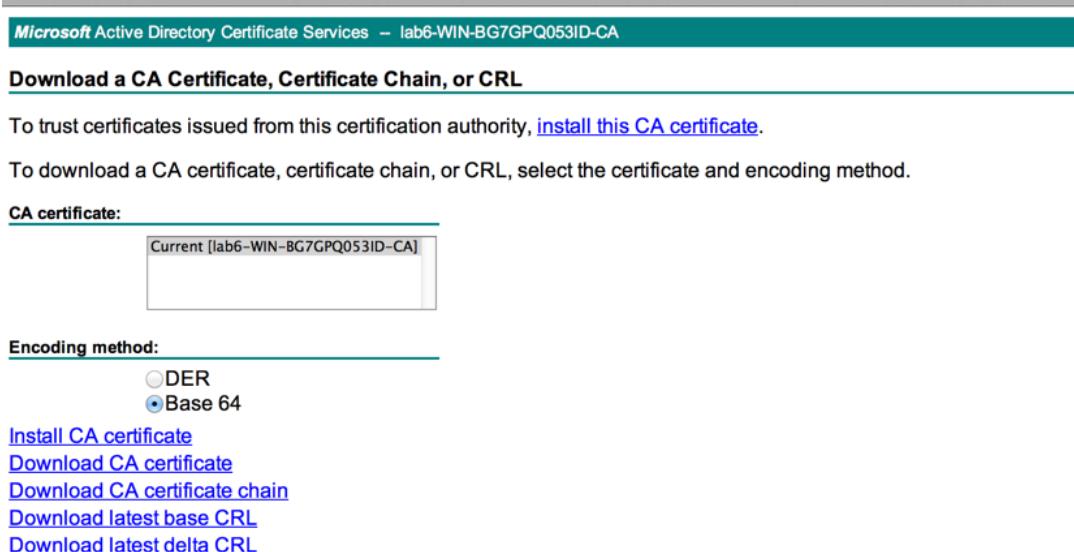

下载 Microsoft CA 根证书并将其导入到每个 ISE 节点的受信任系统证书库中，然后启用“Trust for Authentication within ISE”。

生成 CA 签名的节点证书

以下步骤概述下载 CA 根证书、生成 ISE 节点 CSR 请求以及将证书与 CSR 请求绑定的步骤。

注: 下载 CA 根证书和其他接受服务的证书请求时，应选择 base 64 格式

步骤 1 下载 base 64 格式的 CA 根证书。

Microsoft Active Directory Certificate Services – lab6-WIN-BG7GPQ053ID-CA

Download a CA Certificate, Certificate Chain, or CRL

To trust certificates issued from this certification authority, [install this CA certificate](#).

To download a CA certificate, certificate chain, or CRL, select the certificate and encoding method.

CA certificate:

Current [lab6-WIN-BG7GPQ053ID-CA]

Encoding method:

DER
 Base 64

[Install CA certificate](#)
[Download CA certificate](#)
[Download CA certificate chain](#)
[Download latest base CRL](#)
[Download latest delta CRL](#)

步骤 2 导入到受信任的证书库中

Administration -> System -> Certificates -> Trusted Certificates

步骤 3 在独立环境中为所需的 Admin 节点、MnT 节点和 PSN 节点生成 CSR。

Administration -> System -> Certificates -> Certificate Signing Requests - “admin” 证书用法

步骤 4 使用 MS CA “Web Server” 模板为 Admin 节点、MnT 节点和 PSN 节点的证书请求提供服务。

Microsoft Active Directory Certificate Services – lab6-WIN-BG7GPQ053ID-CA

Submit a Certificate Request or Renewal Request

To submit a saved request to the CA, paste a base-64-encoded CMC or PKCS #10 certificate request or P1 Request box.

Saved Request:

```
Iv9ZL15OnlaKmRjyfSg707fcw+zWRF1HSG+XYik91K
ycDL4KDhrcTLB19Cfy+UlA4lb2HmcuvMFCAFkXT+r
CCB4RmlJl.mICP+ScKxMtqU9aloxkZseFpxnbMuSt9i
/6rNcwzbWxBSjqTwlw+RwoSrUvjdVwbDjhMlzFn5D2
60yMH0pElvPJYkR1xBbS5tRxAQM
-----END CERTIFICATE REQUEST-----
```

Certificate Template:

Web Server

Additional Attributes:

Attributes:

Submit >

步骤 5 下载 base 64 编码格式的证书

Microsoft Active Directory Certificate Services – lab6-WIN-BG7GPQ053ID-CA

Certificate Issued

The certificate you requested was issued to you.

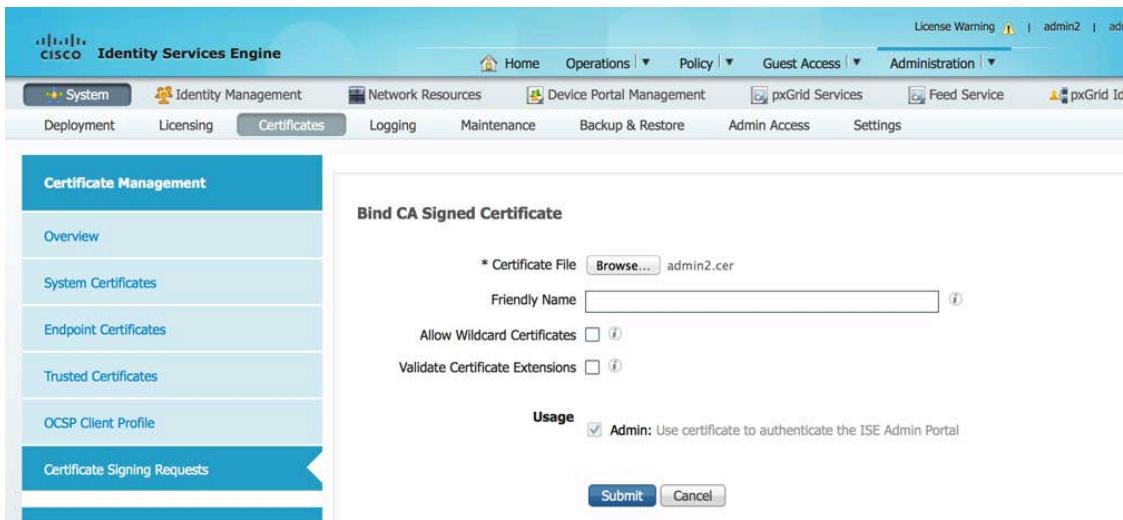

DER encoded or Base 64 encoded

[Download certificate](#) [Download certificate chain](#)

步骤 6 将证书分别与每个 ISE 节点的 CSR 请求绑定。 (例如：Admin 节点、MnT 节点和 PSN 节点)
Administration -> System -> Certificates -> Certificate Signing Requests -> 选择证书并绑定

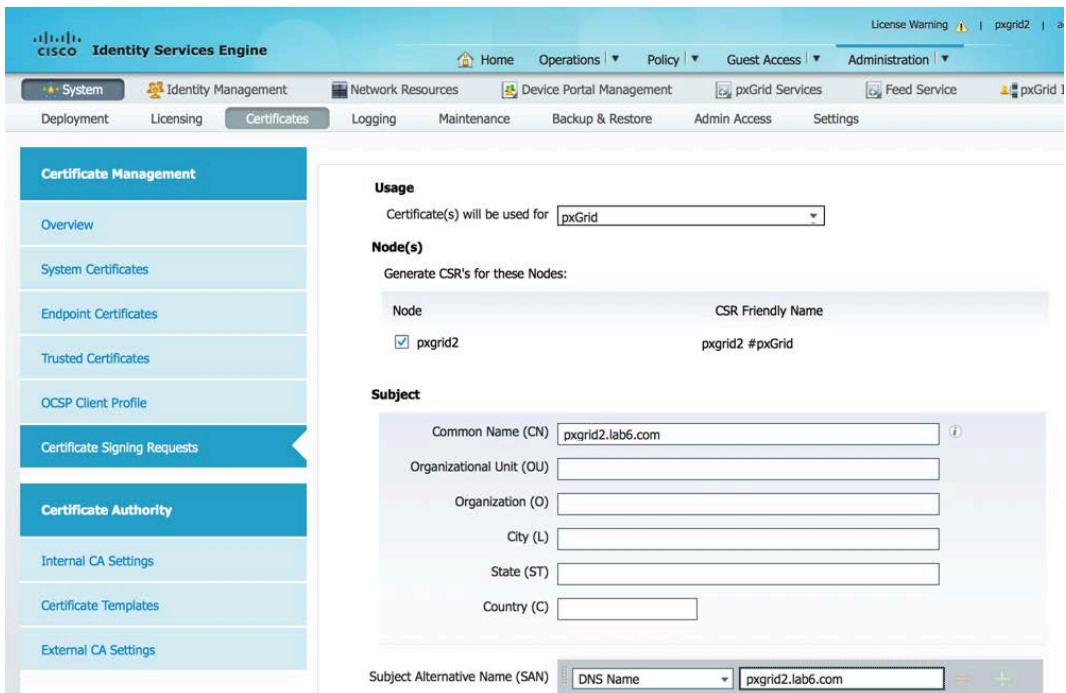

The screenshot shows the Cisco Identity Services Engine (ISE) interface. The top navigation bar includes links for Home, Operations, Policy, Guest Access, Administration, and Setup Assistant. The main menu has tabs for System, Identity Management, Network Resources, Device Portal Management, pxGrid Services, Feed Service, and pxGrid Identity Mapping. Under the System tab, sub-options include Deployment, Licensing, Certificates (which is currently selected), Logging, Maintenance, Backup & Restore, Admin Access, and Settings. On the left, a sidebar titled 'Certificate Management' lists Overview, System Certificates, Endpoint Certificates, Trusted Certificates, OCSP Client Profile, and Certificate Signing Requests (which is highlighted). The main content area is titled 'Certificate Signing Requests' and contains a sub-section 'Generate Certificate Signing Requests (CSR)'. It explains that CSR requests must be sent to and signed by an external authority. A table lists pending CSR requests, including one for 'admin2#Admin' with subject 'CN=admin2.lab6.com', key length '2048', group tag 'admin2', timestamp 'Fri, 30 Jan 2015', and host 'admin2'. There are buttons for View, Export, Delete, and Bind Certificate.

步骤 7 分别为每个 ISE 节点导入节点证书，然后提交

步骤 8 为 pxGrid 节点生成 CSR。

Administration -> System -> Certificates -> Certificate Signing Requests - “pxGrid” 证书用法

步骤 9 提交请求 MS CA “pxGrid” 模板，为 pxGrid 节点的证书请求提供服务。

Microsoft Active Directory Certificate Services – lab6-WIN-BG7GPQ053ID-CA

Submit a Certificate Request or Renewal Request

To submit a saved request to the CA, paste a base-64-encoded CMC or PKCS #10 certificate request or PKCS #7 renewal Request box.

Saved Request:

```
SRnqzBuWeIK9a0GnbjskxGB98yauCLrc3ctd13mLGM
O728rmk12HlsNlxjfrxQeS/HS+7VMF7WoaanZlt5oFV1:
1UNoh05j5FGWG1uvMKNMBOVTnwjD/Bgwnzk9j+4/
eZtk0iHwHluP0/DUxSXJrbCOPDW7ekvhKRgFo1u9C
Anrg7MmXdFrtWzndPBDc3uVow2FgVLWE
-----END CERTIFICATE REQUEST-----
```

Certificate Template:

pxGrid

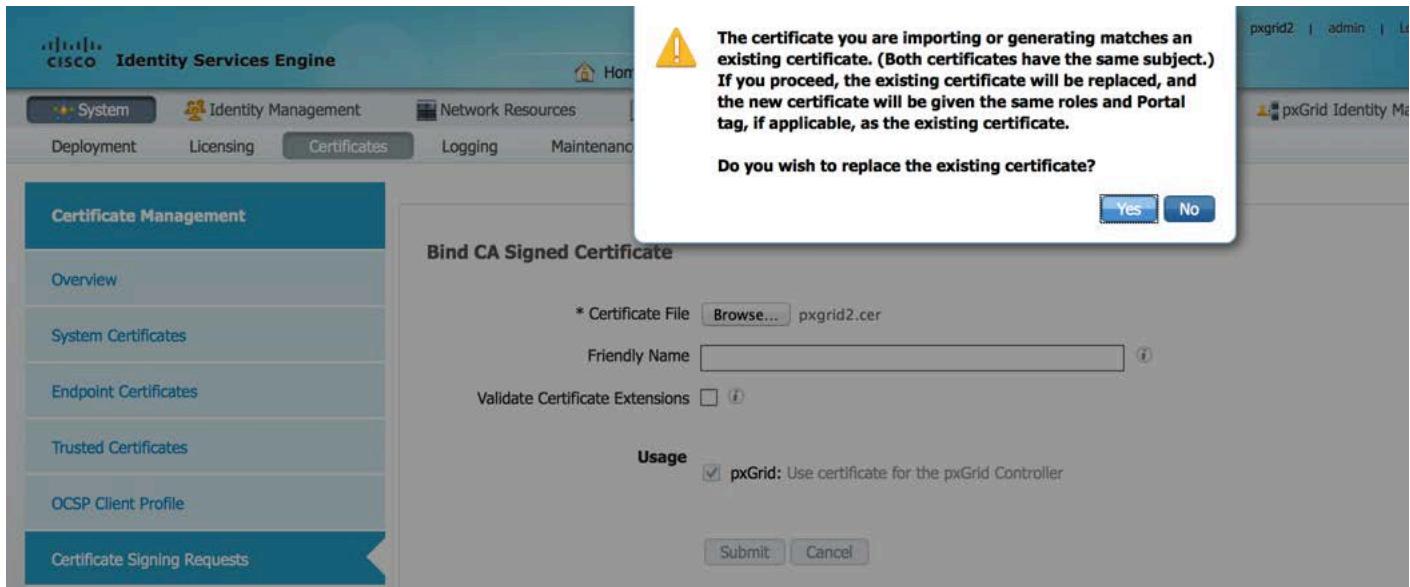

Additional Attributes:

Attributes: [Empty Text Box]

Submit >

步骤 10 将 pxGrid 证书与 pxGrid 节点 CSR 请求绑定。

Administration -> System -> Certificates -> Certificate Signing Requests -> 选择 pxGrid 节点并绑定证书

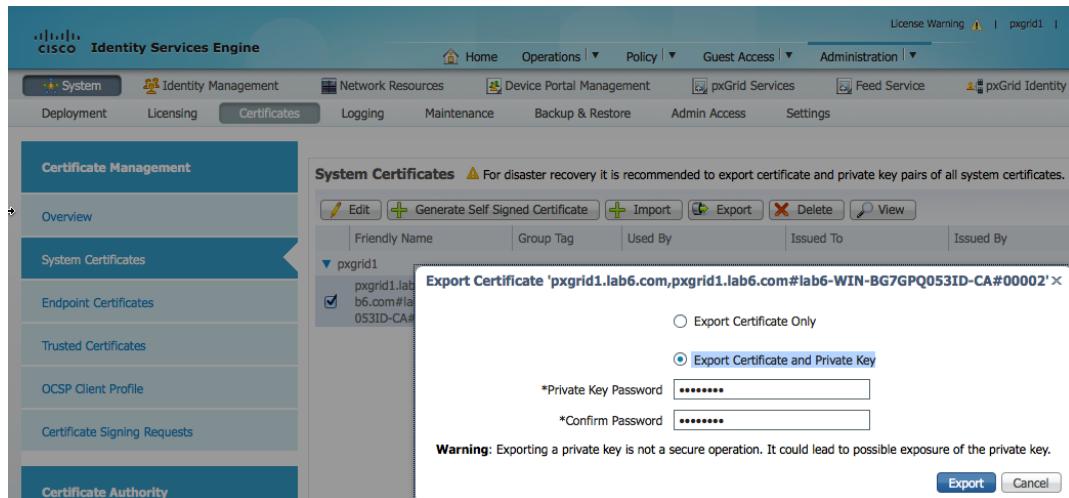

在主要 PAN 节点和 MnT 节点中导出 pxGrid 节点公钥/私钥

必须将 pxGrid 客户端节点的公钥/私钥对复制到主要 PAN 节点和 MnT 节点中。相应步骤如下所述：

步骤 1 在独立模式的新安装中，从 pxGrid 节点的系统证书库中导出公钥和私钥，然后导入到所需的主要 Admin 节点和 MnT 节点的系统证书库中。

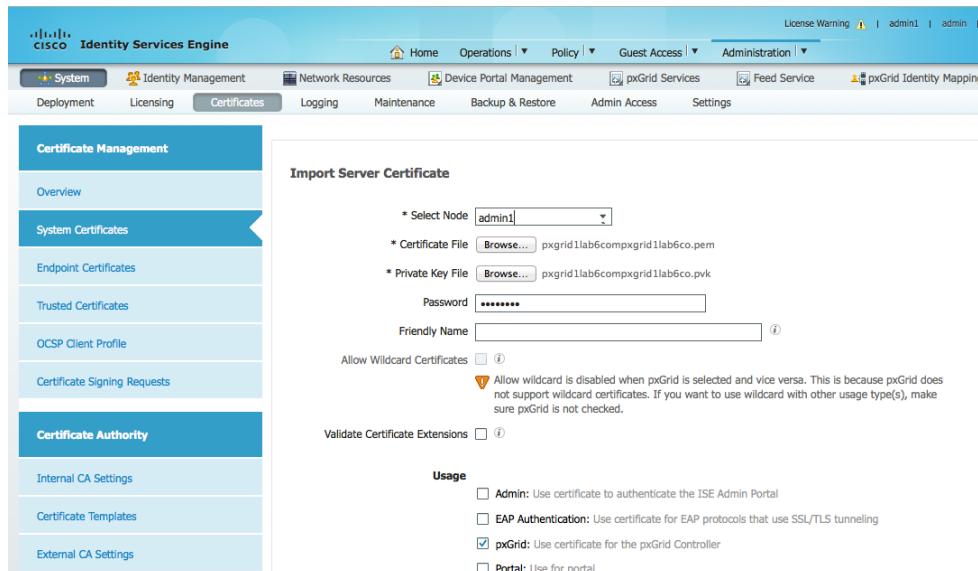

注: 如果存在现有 ISE 1.3 部署并已添加外部 pxGrid 角色, 可以从主要 PAN 节点的系统证书库中导出 pxGrid 节点的公钥/私钥对, 然后导入到主要 PAN 节点和主要 MnT 节点中

Administration -> System -> Certificates -> System Certificates, 选择证书并导出证书和私钥
必须为私钥提供名称 (例如 cisco123)。此导出内容会另存为包含 PEM 和 PVK (公钥/私钥对)
的压缩文件。

步骤 2 对于所需的主要 Admin 节点, 将公钥和私钥都导入到系统证书库中, 然后提交。

Administration -> System -> Certificates -> System Certificates, 然后导入 pxGrid PEM 证书
和 PVK 证书。

步骤 3 对于所需的主要 MnT 节点，将公钥和私钥都导入到系统证书库中，然后提交。

Administration -> System -> Certificates -> System Certificates，然后导入 pxGrid PEM 证书和 PVK 证书。

The screenshot shows the 'Import Server Certificate' page in the Cisco Identity Services Engine. The 'Select Node' dropdown is set to 'mnt1'. The 'Certificate File' field contains 'pxgrid1lab6compxgrid1lab6co.pem'. The 'Private Key File' field contains 'pxgrid1lab6compxgrid1lab6co.pvk'. The 'Password' field is filled with '*****'. The 'Friendly Name' field is empty. The 'Allow Wildcard Certificates' checkbox is unchecked. A note below it states: 'Allow wildcard is disabled when pxGrid is selected and vice versa. This is because pxGrid does not support wildcard certificates. If you want to use wildcard with other usage type(s), make sure pxGrid is not checked.' The 'Validate Certificate Extensions' checkbox is unchecked. In the 'Usage' section, the 'pxGrid' checkbox is checked, while 'Admin', 'EAP Authentication', and 'Portal' are unchecked.

步骤 4 pxGrid 公钥/私钥将显示于主要 PAN 节点和主要 MnT 节点的系统证书库中。

System Certificates							
For disaster recovery it is recommended to export certificate and private key pairs of all system certificates.							
<input type="button" value="Edit"/>		<input type="button" value="Generate Self Signed Certificate"/>		<input type="button" value="Import"/>		<input type="button" value="Export"/>	
	Friendly Name	Group Tag	Used By	Issued To	Issued By	Valid From	Expiration Date
admin1	admin1.lab6.com,admin1.lab6.com#lab6-WIN-BG7GPQ053ID-C	Default Portal Certificate Group	EAP Authentication, Admin, Portal	admin1.lab6.com	lab6-WIN-BG7GPQ053ID-C	Tue, 20 Jan 2015	Fri, 20 Jan 2017
	pxgrid1.lab6.com,pxgrid1.lab6.com#lab6-WIN-BG7GPQ053ID-C	pxGrid	pxgrid1.lab6.com	pxgrid1.lab6.com	lab6-WIN-BG7GPQ053ID-C	Tue, 20 Jan 2015	Fri, 20 Jan 2017
mnt1	mnt1.lab6.com,mnt1.lab6.com#lab6-WIN-BG7GPQ053ID-C	Default Portal Certificate Group	EAP Authentication, Admin, Portal	mnt1.lab6.com	lab6-WIN-BG7GPQ053ID-C	Tue, 20 Jan 2015	Fri, 20 Jan 2017
	pxgrid1.lab6.com,pxgrid1.lab6.com#lab6-WIN-BG7GPQ053ID-C	pxGrid	pxgrid1.lab6.com	pxgrid1.lab6.com	lab6-WIN-BG7GPQ053ID-C	Tue, 20 Jan 2015	Fri, 20 Jan 2017

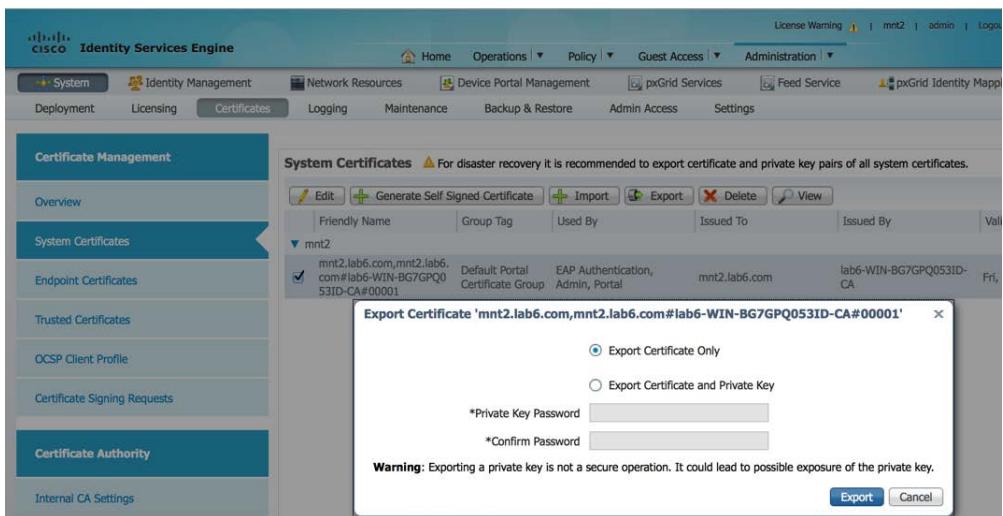

批量会话下载

批量会话下载使用 pxGrid session_download 脚本，从 ISE MnT 节点提供活动会话下载查询。这样即可提供已经过身份验证的 802.1X 会话中有关可用 ISE 情景信息的可用会话属性。将 MnT 节点的公钥 (PEM) 复制到 pxGrid 客户端并转换为 DER，然后导入到 truststoreFilename 密钥库中。此操作将于稍后介绍，而现在则要按照下述步骤导出 MnT 节点证书。

注：在 pxGrid 主用-备用配置中，需要将主要 MnT 节点和辅助 MnT 节点的证书都导入到 pxGrid 客户端中。如果其中任一个证书不存在，则会在注册客户端时出现问题，而且无法连接到 pxGrid 节点。

步骤 1 仅从所需的 MnT 节点导出公共证书密钥。此证书供 pxGrid 客户端用于批量会话下载

Administration -> Certificates -> Certificate Management -> System Certificates，然后选择 MnT 身份证书并导出公共证书

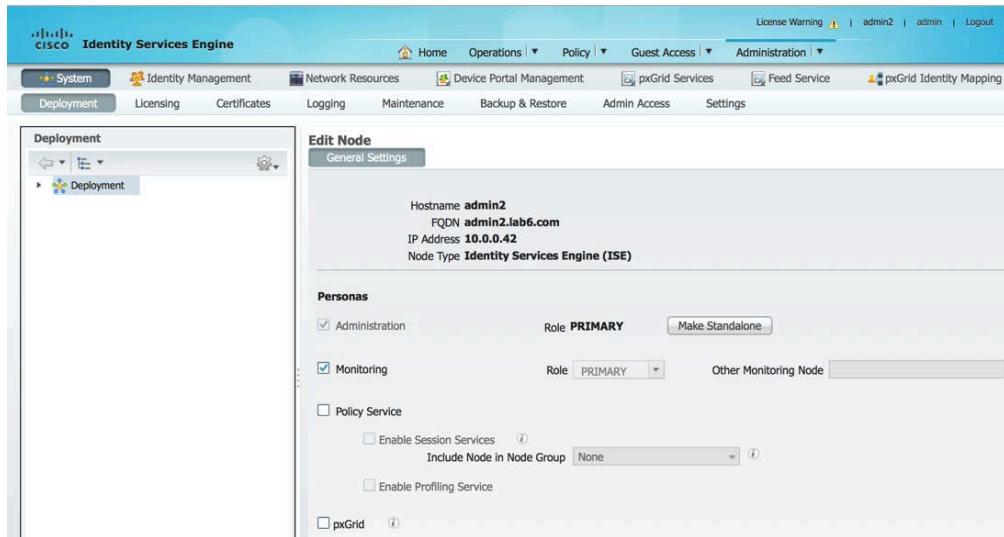

为分布式环境注册 ISE 节点

通过主要 Admin (PAN) 节点注册用于主要 PAN 节点、主要 MnT 节点、PSN 节点和 pxGrid 节点的所需的独立 ISE 节点。

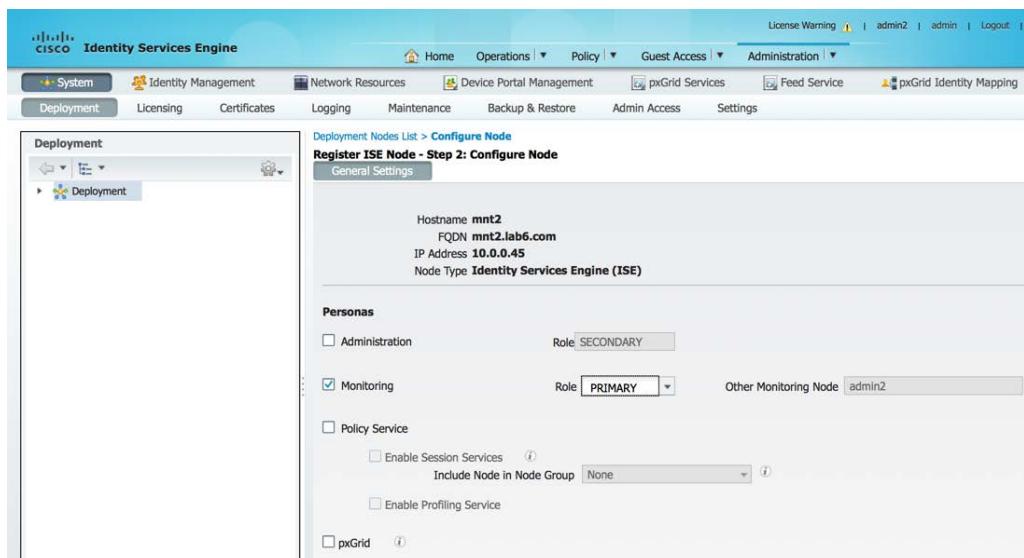

相应步骤定义如下：

步骤 1 将所需的 Admin 节点设置为最初包括主要 Admin 和主要 MnT 角色。

步骤 2 注册要作为主要 MnT 节点的所需的 MnT 节点。

注： 主要 PAN 节点将自动成为辅助 MnT 角色。禁用辅助 MnT 角色。

步骤 3 注册 PSN 节点

Deployment Nodes List > Configure Node
Register ISE Node - Step 2: Configure Node
General Settings

Hostname: psn1
FQDN: psn1.lab6.com
IP Address: 10.0.0.46
Node Type: Identity Services Engine (ISE)

Personas

- Administration Role: SECONDARY
- Monitoring Role: SECONDARY Other Monitoring Node: []
- Policy Service
 - Enable Session Services Include Node in Node Group: [None]
 - Enable Profiling Service

步骤 4 注册 pxGrid 节点

Deployment Nodes List > Configure Node
Register ISE Node - Step 2: Configure Node
General Settings

Hostname: pxgrid1
FQDN: pxgrid1.lab6.com
IP Address: 10.0.0.48
Node Type: Identity Services Engine (ISE)

Personas

- Administration Role: SECONDARY
- Monitoring Role: SECONDARY Other Monitoring Node: []
- Policy Service
 - Enable Session Services Include Node in Node Group: [None]
 - Enable Profiling Service
- pxGrid

步骤 5 确保 pxGrid 服务已启动并且您有 ISE 发布的功能 Administration -> pxGrid Services，同时启用 Auto Registration

	Client Name	Client Description	Capabilities	Status	Client Group	Log
<input type="checkbox"/>	ise-admin-admin1		Capabilities(2 Pub, 1 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-admin-mnt1		Capabilities(1 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-mnt-mnt1		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View

pxGrid 客户端管理

pxGrid Service 菜单提供客户端管理、客户端注册/删除以及在禁用 Auto-Registration 时对客户端“挂起”请求进行授权的功能。此菜单还可用于查看客户端已注册功能或信息主题的日志历史记录。

	Client Name	Client Description	Capabilities	Status	Client Group	Log
<input type="checkbox"/>	ise-admin-pan1		Capabilities(2 Pub, 1 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-mnt-mnt1		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-admin-mnt1		Capabilities(0 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	wsa2.lab6.com-test_client	pxGrid Connection from WSA	Capabilities(0 Pub, 0 Sub)	Offline	Session	View
<input type="checkbox"/>	wsa2.lab6.com-pxgrid_client	pxGrid Connection from WSA	Capabilities(0 Pub, 0 Sub)	Offline	Session	View

Enable Auto-Registration - 启用自动注册，在 pxGrid 客户端初始身份验证完成后，pxGrid 客户端将自动注册。

Disable Auto-Registration - 禁用自动注册，pxGrid 客户端将保持“挂起”状态，直到管理员将其移入相应的“session”组或“EPS”组中。

Client Groups - client 组主要注册到“session”组，用于 pxGrid 操作。

Administrator - 为 ISE 预留

Session - 访问会话属性信息

EPS - “session”组的 **superset**，用于 ANC “自适应网络控制”缓解操作

Live Log - 显示客户端注册和主题订用的历史记录

pxGrid 客户端配置

本节介绍如何安装用于 pxGrid 示例脚本测试的 pxGrid java SDK。系统将运行 Register.sh，连接 pxGrid 控制器并与之建立连接。然后将运行 Session_download.sh，从 ISE 下载活动会话记录。系统使用这些脚本进行基本测试，以确保 pxGrid 客户端与 ISE 之间的连接和通信能正常工作。如果要测试所有 shell 脚本（包括以前称为终端保护服务 [EPS] 的自适应网络控制 [ANC] 缓解操作），请参阅：
[\(http://www.cisco.com/c/dam/en/us/td/docs/security/ise/how_to/HowTo-84-Configure_and_Test_Integration_with_Cisco_pxGrid.pdf\)](http://www.cisco.com/c/dam/en/us/td/docs/security/ise/how_to/HowTo-84-Configure_and_Test_Integration_with_Cisco_pxGrid.pdf)

pxGrid Java sdk 安装

请联系思科客户团队获取 pxGrid java SDK 库

请下载您的 Linux 操作系统适用的 Oracle Java Development Kit：

<http://www.oracle.com/technetwork/java/javase/downloads/jdk8-downloads-2133151.html>

要安装 Oracle Java Development Kit，必须卸载系统中现有的旧版本的 Java。

注：如果使用 MAC 进行测试，请参阅以下网址了解如何卸载 Java：https://www.java.com/en/download/help/mac_uninstall_java.xml
如果您使用的是 Centos 6.5，请参阅附录在 **Centos 6.5 中删除 Java 和安装 JDK 8.0**

解压文件夹。tar -zxf pxgrid-sdk-x.x.x-dist.tar.gz

您将看到以下内容：

- Lib - 包含所有 GCL 库
- Samples - 包含 bin、certs、conf、lib 和 src 目录
- Bin - 包含所有示例脚本
- Certs - 包含所有样本 pxGrid 身份证书和 rootSample 证书
- Src - 包含所有 Java 源文件

要运行 pxGrid 示例脚本，请在 “JAVA_HOME=” 环境变量中加入 jre 路径。

下面以 MAC 为例加以说明。

要查看 jre 路径的位置，请运行以下命令：

注：运行 sudo 命令时需要 root 权限

```
sudo find / -name java
Password:
/Applications/pxGridsdk/pxgrid-sdk-1.0.0/samples/src/java
find: /dev/fd/3: Not a directory
find: /dev/fd/4: Not a directory
/Library/Internet Plug-Ins/JavaAppletPlugin.plugin/Contents/Home/bin/java
/Library/Java/JavaVirtualMachines/jdk1.8.0_25.jdk/Contents/Home/bin/java
/Library/Java/JavaVirtualMachines/jdk1.8.0_25.jdk/Contents/Home/jre/bin/java
```

将路径 “/Library/Java/JavaVirtualMachines/jdk1.8.0_25.jdk/Contents/Home/jre” 添加到 JAVA_HOME

```
export JAVA_HOME=/Library/Java/JavaVirtualMachines/jdk1.8.0_25.jdk/Contents/Home/jre
```

如果使用的 Linux 版本不同（例如使用 Centos 64），请确保路径中包含 “keytool”

```
Append the ".../jdk1.7._51/bin" to PATH
export
PATH=/usr/lib64/qt3.3/bin:/usr/local/bin:/usr/bin:/bin:/usr/local/sbin:/usr/sbin:/sbin:/home/jeppich/bin:/usr/java/jdk1.7.0_51/bin
```

pxGrid 客户端 SDK Java 密钥库简介

Java 密钥库包含诸如 CA 根证书、主机身份证书或 pxGrid 客户端证书、自签名证书等证书的公钥/私钥对。Java 密钥库本身为 PKCS #12 格式 (.JKS)。

证书本身为 PEM 或 CER 格式，会被转换为 DER 并导入到 Java 密钥库中。

在本文档中，我们将使用 CA 签名的 pxGrid 客户端证书和 CA 签名的 ISE 证书。

pxGrid 有两个密钥库：包含 pxGrid 客户端身份证书的 keystoreFilename 以及代表 CA 根证书和 MnT 节点证书的 truststoreFilename。

此外，将证书导入到密钥库中时，这些密钥库值还包含关联的密码 keystorePassword 和 truststorePassword。

keystoreFilename、keystorePassword、truststoreFilename 和 truststorePassword 在 pxGrid SDK 脚本中用于 SASL 身份验证和 pxGrid 角色连接。

在下面的说明示例中，pxGrid 客户端注册并连接到 pxGrid 控制器。

```
./register.sh -keystoreFilename pxGridClient.jks -keystoreFilename cisco123 -truststoreFilename root3.jks -
truststorePassword cisco123 -group Session -description test -username macbook-pro -hostname 10.0.0.48

----- properties -----
version=1.0.0
hostnames=10.0.0.48
username=macbook-pro
description=test
keystoreFilename=pxGridClient.jks
keystorePassword=cisco123
truststoreFilename=root3.jks
truststorePassword=cisco123
-----
registering...
connecting...
account enabled
connected.
done registering.
connection closed
```

在下面的说明示例中，pxGrid 客户端从 MnT 节点下载活动会话记录

```
./session_download.sh -keystoreFilename pxGridClient.jks -keystoreFilename cisco123 -truststoreFilename

pxGrid 客户端证书配置

以下程序表示下列过程的步骤：为 pxGrid 客户端生成密钥、创建 CSR 请求、导入证书并将其转换为 DER 添加到密钥库。

注：该 pxGrid 客户端配置适用于具有 CA 签名的 pxGrid 客户端和 CA 签名的 pxGrid 节点证书的情况。有关其他证书部署的注意事项，请参阅参考资料。

具体过程如下所述：

- 为 pxGrid 客户端生成私钥
- 根据私钥生成 CSR（证书签名请求）。质询秘钥是必须的，它将在稍后用于密钥库管理
- CA 机构使用此前定义的有效 pxGrid 模板为 CSR 请求签名
- 根据公钥/私钥对和根证书创建 PKCS#12 文件。此文件将用于创建密钥库 keystoreFilename (JKS) 和 truststoreFilename (JKS)
- 创建 keystoreFilename (JKS)
- 创建 truststoreFilename (JKS)
- 从用于活动会话记录或批量下载会话的 ISE MnT 主要节点和 ISE MnT 辅助节点导入 ISE 身份证书。

- 将 ISE 身份证书 PEM 文件转换为 DER 格式，连同 CA 根证书一起添加到 truststorefileName 密钥库中。
- 将 pxGrid 客户端证书导入到 keystoreFilename (JKS) 中
- 将 CA 根证书导入到 tuststoreFilename (JKS) 中
- 将两个文件都复制到 pxGrid 的 “.. /samples/bin/..” 文件夹中并运行脚本

步骤 1 生成私钥

为 pxGrid 客户端生成私钥（例如 mac.key）。

注：此 .key 名称可以是任意名称，此处以 mac.key 为例

```
openssl genrsa -out mac.key 4096
Generating RSA private key, 4096 bit long modulus
.....+.
.....+++
e is 65537 (0x10001)
```

步骤 1 生成 CSR 请求

生成向 CA 机构请求证书的 CSR 请求（例如 mac.csr）。提供质询密码（例如 cisco123）

注：csr 可以是任意名称，为保持一致，此处仍以 mac.csr 为例；同样，质询密码也可以是任意名称

```
openssl req -new -key mac.key -out mac.csr

You are about to be asked to enter information that will be incorporated
into your certificate request.
What you are about to enter is what is called a Distinguished Name or a DN.
There are quite a few fields but you can leave some blank
For some fields there will be a default value,
If you enter '.', the field will be left blank.
-----
Country Name (2 letter code) [AU]:
State or Province Name (full name) [Some-State]:
Locality Name (eg, city) []:
Organization Name (eg, company) [Internet Widgits Pty Ltd]:
Organizational Unit Name (eg, section) []:
Common Name (e.g. server FQDN or YOUR name) []:
Email Address []:

Please enter the following 'extra' attributes
to be sent with your certificate request
A challenge password []:cisco123
An optional company name []:Eppich, Inc
在本文档各处使用相同的密码可便于维护，并减少错误
```

步骤 2 CA 机构为 PxGrid CS 请求签名。

CA 机构必须使用 pxGrid 模板（同时包含用于客户端身份验证和服务器身份验证的 EKU）提供用户证书。

注：由于选择的是 Windows 2003 的 CA 模板，所以它会显示于下拉列表中。复制的用户模板同时包含用于客户端身份验证和服务器身份验证的 EKU。

Submit a Certificate Request or Renewal Request

To submit a saved request to the CA, paste a base-64-encoded CMC or PKCS #10 certificate request or PKCS #7 request by an external source (such as a Web server) in the Saved Request box.

Saved Request:

Base-64-encoded certificate request (CMC or PKCS #10 or PKCS #7):

```
\OCAGEQAXjh+u8GMPwxadhin6yxCwKY18YhOY5jrUrxf
wcs4jq7PY4t06a/LGk3chergzdbkQMvVzhxZhqg
Ptz3Mg0CyAcT/xhn8NlfsvLZYk5ayPpmuaH3l3L
Hm+6thRTVhrKG61ejxFd+0lzQxEn19YMov7sR5WfU1
Jf+ztPK87AYGzPyWr/kI86b8TG1hSuMMF+AqLco
QQZ3WWm4ogVobvhP6nmku4QBg=
JEST-----
```

Certificate Template:

Additional Attributes:

Attributes:

步骤 3 创建 PKCS12 文件

根据 pxGrid 客户端证书（例如 mac.cer）中的私钥创建 pxGrid 客户端 pkcs12 文件（mac.p12）。此文件将用于密钥库管理，可以是扩展名为 .p12 的随机文件名。包括 CA 根文件（例如 root2a）。

```
openssl pkcs12 -export -out mac.p12 -inkey mac.key -in mac.cer -chain -CAfile root2a.cer  
Enter Export Password: cisco123  
Verifying - Enter Export Password: cisco123
```

步骤 4 为 pxGrid 客户端创建 keystoreFilename

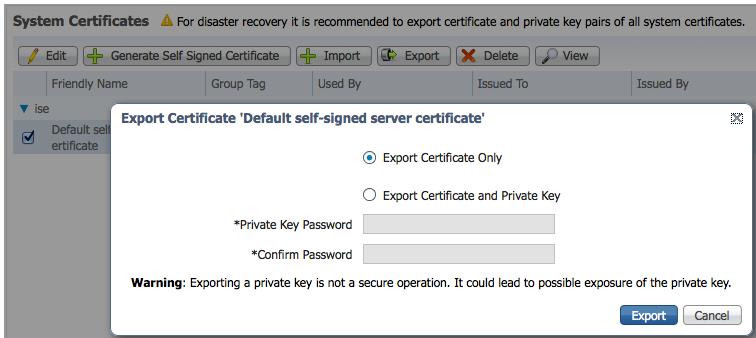

创建 pxGrid 客户端身份密钥库（例如 mac.jks）。这是 pxGrid 客户端身份密钥库，可以是扩展名为 .jks 的随机文件名。这将在 pxGrid 脚本示例中充当 keystoreFilename 和关联的 keystorePassword。

```
keytool -importkeystore -srckeystore mac.p12 -destkeystore mac.jks -srcstoretype PKCS12  
  
Enter destination keystore password: cisco123  
Re-enter new password: cisco123  
Enter source keystore password:  
Entry for alias 1 successfully imported.  
Import command completed: 1 entries successfully imported, 0 entries failed or cancelled
```

步骤 5 从 ISE MnT 主要节点和 ISE MnT 辅助节点导出公共 ISE 身份证书

仅将公共 ISE 身份证书导出到 pxGrid 客户端中, 请注意导出文件将采用 .pem 格式。您可以重命名扩展名为 .pem 的文件, 使其更易于读取。在本例中, 该文件被重命名为 mnt1.pem。

注: 如果已进行 pxGrid 主用-备用配置, 则 pxGrid 客户端同时需要 ISE MnT 主要节点和 ISE Mnt 辅助节点的证书

步骤 6 将 ISE MnT 节点身份证书从 PEM 格式转换为 DER 格式

```
openssl x509 -outform der -in mnt1.pem -out mnt1.der
```

步骤 7 将 ISE MnT DER 文件添加到 truststoreFilename 中

将 ISE 身份证书添加到信任密钥库（例如 caroot1.jks）中。这是受信任的密钥库，可以是扩展名为 .jks 的随机文件名。这将成为 pxGrid 脚本中使用的 truststoreFilename 和 truststorePassword。

```
keytool -import -alias isemnt -keystore caroot1.jks -file mnt1.der

Enter keystore password: cisco123
Re-enter new password: cisco123

  ]
]

Trust this certificate? [no]: yes
Certificate was added to keystroke

```

步骤 8 将 pxGrid 客户端证书导入到 keystoreFilename 中

将 pxGrid 客户端证书导入到身份密钥库中。

```

Johns-MacBook-Pro:pxGridsdk jeppich$ keytool -import -alias pxGridMAC -keystore mac.jks -file
mac.cer

Enter keystore password: cisco123
Certificate already exists in keystore under alias <1>
Do you still want to add it? [no]: yes
Certificate was added to keystore

```

注：如果您收到表明证书已添加到预先存在的密钥库的消息，则可以选择“no”，这不会有任何问题。我选择了“yes”，因此我们可以验证后来是否添加了证书。

步骤 9 将 CA 根证书添加到 truststoreFilename 中

将 CA 根证书添加到受信任的密钥库中。CA 根证书也需要是受信任的。

```
keytool -import -alias ca_root1 -keystore caroot1.jks -file root2a.cer

Enter keystore password: cisco123
Owner: CN=lab6-WIN-BG7GPQ053ID-CA, DC=lab6, DC=com

Trust this certificate? [no]: yes
Certificate was added to keystore
```

步骤 10 将身份密钥库 (mac.jks) 和信任密钥库 (caroot1.jks) 复制到 pxGrid “..../samples/bin/..” 文件夹中。

pxGrid 客户端主用-备用配置示例

对于 pxGrid 主用-备用配置，需要将主要 MnT 节点和辅助 MnT 节点公共证书 (PEM) 都导出到 pxGrid 客户端中并转换为 DER 格式。需要将这两个证书都连同 CA 根证书 (root2a.cer) 一起添加到 truststoreFilename 密钥库中。

```
Johns-Macbook-Pro:mntnodes jeppich$ openssl x509 -outform der -in mnt1.pem -out mnt1.der
Johns-Macbook-Pro:mntnodes jeppich$ keytool -import -alias lab1 -keystore caroot1.jks -file mnt1.der
Enter keystore password:
Re-enter new password:
Owner: CN=mnt1.lab6.com
Issuer: CN=lab6-WIN-BG7GPQ053ID-CA, DC=lab6, DC=com
Serial number: 61326a18000000000031

```

在 ISE 分布式环境中测试 xGrid 客户端

系统将运行 pxGrid 脚本 register.sh 和 session_download.sh 来确保 pxGrid 客户端连接和 pxGrid 注册。会话下载可确保 ISE MNT 证书和 pxGrid 客户端没有问题。

步骤 1 注册 pxGrid 客户端

```
Johns-Macbook-Pro:bin jeppich$ ./register.sh -keystoreFilename mac.jks -keystorePassword cisco123 -truststoreFilename caroot1.jks -truststorePassword cisco123 -hostname 10.0.0.48 -username mac1 -group Session
----- properties -----
version=1.0.0
hostnames=10.0.0.48
username=mac1
description=null
keystoreFilename=mac.jks
keystorePassword=cisco123
truststoreFilename=caroot1.jks
truststorePassword=cisco123
-----
registering...
connecting...
connected.
done registering.
connection closed
Johns-Macbook-Pro:bin jeppich$
```

验证 pxGrid 客户端是否已注册到 pxGrid 控制器

Administration -> pxGrid Services

Clients						
Live Log						
<input type="checkbox"/> Enable	<input type="checkbox"/> Disable	<input checked="" type="checkbox"/> Approve	<input type="checkbox"/> Group	<input type="checkbox"/> Decline	<input type="checkbox"/> Delete	<input type="checkbox"/> Refresh
Total Pending Approval(0)						1 - 4 of 4
<input type="checkbox"/>	Client Name	Client Description	Capabilities	Status	Client Group	Log
<input type="checkbox"/>	ise-admin-admin1		Capabilities(2 Pub, 1 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-mnt-mnt1		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-admin-mnt1		Capabilities(1 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	mac1		Capabilities(0 Pub, 0 Sub)	Offline	Session	View

步骤 2 运行会话下载

```
Johns-Macbook-Pro:bin jeppich$ ./session_download.sh -keystoreFilename mac.jks -keystorePassword cisco123 -truststoreFilename caroot1.jks -truststorePassword cisco123 -hostname 10.0.0.48 -username mac1
----- properties -----
version=1.0.0
hostnames=10.0.0.48
username=mac1
keystoreFilename=mac.jks
keystorePassword=cisco123
```

```

查看密钥库条目

通过查看密钥库条目，您可以查看 keystoreFilename 和 truststoreFilename 秘钥库的受信任证书条目。

步骤 1 验证 truststoreFilename 密钥库 caroot1.jks

```

Johns-Macbook-Pro:bin jeppich$ keytool -list -v -keystore caroot1.jks
Enter keystore password:

Keystore type: JKS
Keystore provider: SUN

采用 pxGrid 主用-备用配置的 ISE 分布式部署简介

本节介绍 pxGrid 主用-备用配置。在 ISE 分布式部署中，只能有 (2) 个 pxGrid 节点。一个处理控制 pxGrid 服务的 pxGrid 客户端连接，另一个用于故障切换。每次只有一个 pxGrid 节点处于活动状态。

采用 pxGrid 主用-备用配置的 ISE 分布式部署包括主要 Admin 节点、辅助 Admin 节点、主要 MnT 节点，辅助 MnT 节点、两个 PSN 节点和两个不同的 pxGrid 角色。

我们将添加辅助 Admin 节点、辅助 MnT 节点和辅助 pxGrid 节点，构成 pxGrid 主用-备用配置。

将公钥/私钥从第一个或主要 pxGrid 角色导出到主要 Admin 节点和主要 MnT 节点的系统证书库中。

注：在初始 ISE 分布式部署过程中已经完成此配置。

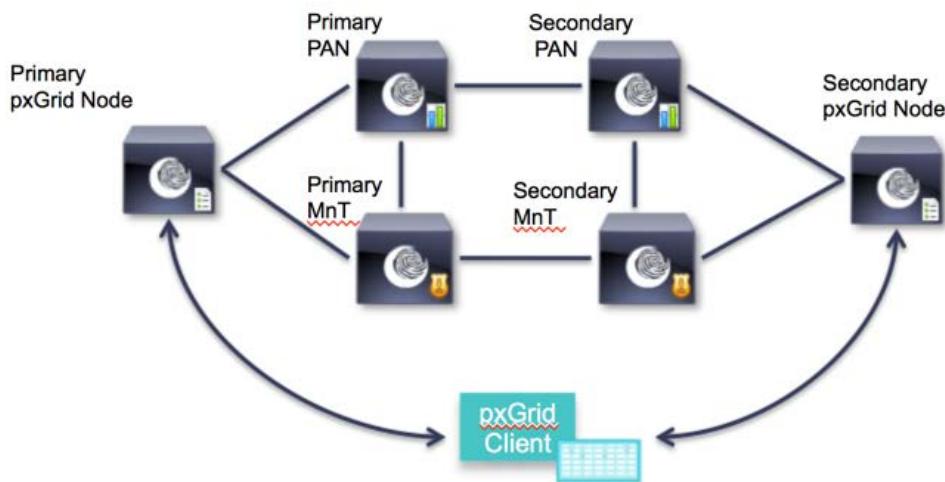

将公钥/私钥从第二个或辅助 pxGrid 角色导出到辅助 Admin 节点和辅助 MnT 节点的系统证书库中。

将主要和辅助 MnT 身份证书导出到 pxGrid 客户端中，用于批量活动会话下载。如果缺少其中任一证书，pxGrid 客户端都无法注册。

注册的客户端帐户、订阅和主题等为主用-主用配置，通过 PAN 节点在 pxGrid 服务器之间同步。主要和辅助 pxGrid 节点为主用-备用配置。

pxGrid 客户端连接到主要 PxGrid 节点。如果主要 pxGrid 节点断开，客户端会连接到辅助 pxGrid 节点，所有注册的客户端和事务都会转移到该节点。本文档将对此加以说明。

pxGrid Active-Standby Configuration

为分布式环境 pxGrid 主用-备用配置注册 ISE 节点

此处注册的是辅助节点。

步骤 1 将辅助 pxGrid 节点的公钥/私钥对导入到辅助 PAN 节点中。

Administration -> System -> Certificate -> Certificate Management -> System Certificates, 然后导入辅助 pxGrid 节点的公钥/私钥

注: 可以在所有节点处于独立模式时完成此操作, 也可以直接从主要 PAN 节点完成此操作。

此处假定已经从辅助 pxGrid 节点导出公钥/私钥对。

步骤 2 将辅助 pxGrid 节点的公钥/私钥对导入到辅助 PAN 节点中。

Administration -> System -> Certificate -> Certificate Management -> System Certificates, 然后导入辅助 pxGrid 节点的公钥/私钥

步骤 3 公钥/私钥对应该已经成功导入到 ISE 辅助 PAN 节点和 ISE 辅助 MnT 节点中。

Administration -> System -> Certificates -> Certificate Management -> System Certificates

The screenshot shows the Cisco Identity Services Engine (ISE) interface under the 'Administration' tab. In the left sidebar, 'Certificates' is selected. Under 'System Certificates', there are two sections: 'admin2' and 'mnt2'. Each section lists certificates with columns for Friendly Name, Group Tag, Used By, Issued To, Issued By, Valid From, and Expiration Date. A note at the top of the page recommends exporting certificate and private key pairs for disaster recovery.

Friendly Name	Group Tag	Used By	Issued To	Issued By	Valid From	Expiration Date
admin2.lab6.com.admin2.lab6.c	Default Portal Certificate Group	EAP Authentication, Admin, Portal	admin2.lab6.com	lab6-WIN-BG7GPQ053ID-C	Wed, 4 Mar 2015	Fri, 3 Mar 2017

pxgrid2.lab6.com.pxgrid2.lab6.c	pxGrid	pxGrid	pxgrid2.lab6.com	lab6-WIN-BG7GPQ053ID-C	Wed, 4 Mar 2015	Sat, 4 Mar 2017
b6.com#lab6-WIN-BG7GPQ0531D-CA#00002				A		

步骤 4 通过主要 Admin 节点注册辅助 Admin 节点

Administration -> System -> Deployment, 将 ISE 节点注册为辅助 Admin 节点

The screenshot shows the Cisco Identity Services Engine (ISE) interface under the 'Administration' tab. In the left sidebar, 'Deployment' is selected. The main area shows the 'Deployment Nodes List > Configure Node' screen for 'Register ISE Node - Step 2: Configure Node'. The 'General Settings' tab is active. It shows the Hostname as 'admin2', FQDN as 'admin2.lab6.com', IP Address as '10.0.0.42', and Node Type as 'Identity Services Engine (ISE)'. Below this, the 'Personas' section is shown, with 'Administration' checked and 'Role' set to 'SECONDARY'. Other options like 'Monitoring', 'Policy Service', and 'pxGrid' are also listed with their respective checkboxes.

步骤 5 通过主要 Admin 节点注册辅助监控节点

Administration -> System -> Deployment, 将 ISE 节点注册为辅助监控节点

Deployment Nodes List > Configure Node
Register ISE Node - Step 2: Configure Node
General Settings

Hostname **mmt2**
FQDN **mmt2.lab6.com**
IP Address **10.0.0.45**
Node Type **Identity Services Engine (ISE)**

Personas

Administration Role **SECONDARY**

Monitoring Role **SECONDARY** Other Monitoring Node **mnt1**

Policy Service

Enable Session Services Include Node in Node Group **None**

Enable Profiling Service

pxGrid

注：确保辅助 MnT 节点已加入域，检查外部身份服务，如果辅助 MnT 节点尚未加入域，则不会连接到 pxGrid 节点。

步骤 6 添加辅助 pxGrid 节点

Administration -> System -> Deployment, 将 ISE 节点注册为辅助 pxGrid 节点

Deployment Nodes List > pxgrid2
Edit Node
General Settings

Hostname **pxgrid2**
FQDN **pxgrid2.lab6.com**
IP Address **10.0.0.49**
Node Type **Identity Services Engine (ISE)**

Personas

Administration Role **SECONDARY**

Monitoring Role **PRIMARY** Other Monitoring Node

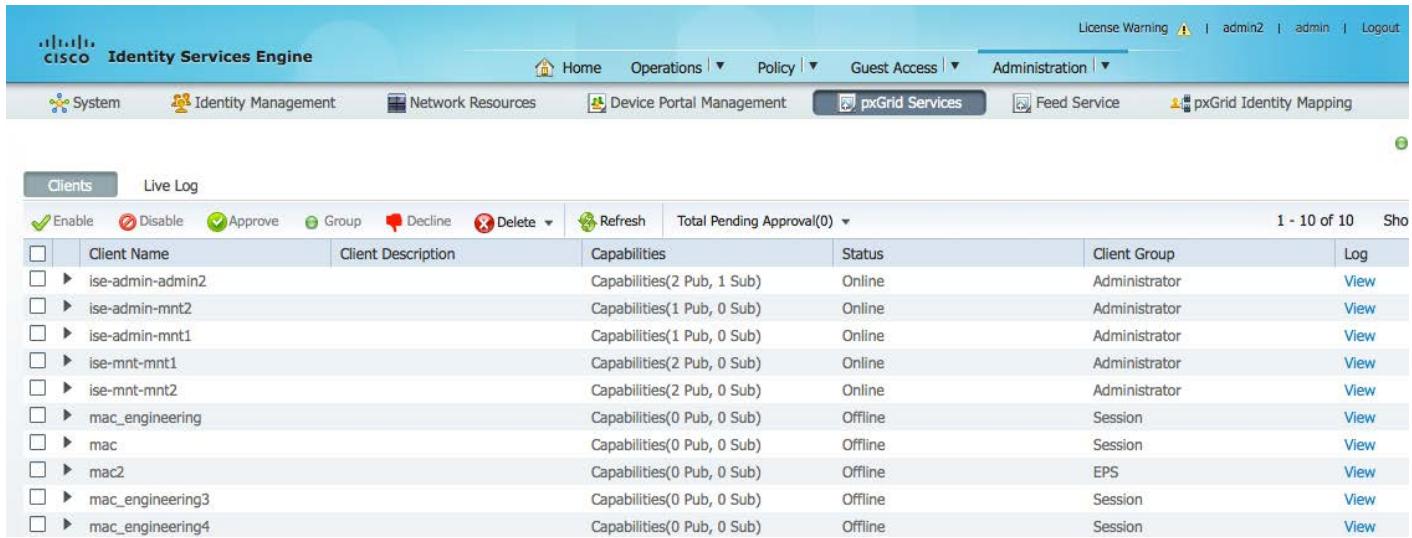

Policy Service

Enable Session Services Include Node in Node Group **None**

Enable Profiling Service

pxGrid

步骤 7 确保 pxGrid 服务已启动并且您能看到 ISE 发布的节点：
Administration -> pxGrid Services

The screenshot shows the Cisco Identity Services Engine (ISE) Administration interface. The top navigation bar includes links for Home, Operations, Policy, Guest Access, Administration, System, Identity Management, Network Resources, Device Portal Management, pxGrid Services (which is selected and highlighted in blue), Feed Service, and pxGrid Identity Mapping. A license warning message is displayed at the top right. The main content area is titled "Clients" and contains a table with the following data:

Client Name	Client Description	Capabilities	Status	Client Group	Log
ise-admin-admin2		Capabilities(2 Pub, 1 Sub)	Online	Administrator	View
ise-admin-mnt2		Capabilities(1 Pub, 0 Sub)	Online	Administrator	View
ise-admin-mnt1		Capabilities(1 Pub, 0 Sub)	Online	Administrator	View
ise-mnt-mnt1		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
ise-mnt-mnt2		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
mac_engineering		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
mac		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
mac2		Capabilities(0 Pub, 0 Sub)	Offline	EPS	View
mac_engineering3		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
mac_engineering4		Capabilities(0 Pub, 0 Sub)	Offline	Session	View

在 ISE 分布式环境 pxGrid 主用-备用配置中测试 pxGrid 客户端

本节通过添加辅助 PAN 节点、辅助 MnT 节点和辅助 pxGrid 节点来说明 pxGrid 主用-备用配置。此外，我们还将通过以下方式测试该配置：

基本操作：

- 将 pxGrid 客户端注册到主要 pxGrid 节点

注：在 pxGrid 主用-备用配置中，只有主要 pxGrid 节点可处于活动状态，而辅助 pxGrid 节点则处于“not running”状态，正如在 pxGrid 辅助节点上发出“sh application status ise”命令时所示

- 从 MnT 主要节点下载活动会话记录
- 在 ISE 中查看注册的 pxGrid 客户端状态
- 查看部署节点状态以显示 pxGrid 节点状态

测试 pxGrid 节点能否故障切换为辅助 pxGrid 节点

- 在主要 pxGrid 节点上发出“application stop ise”命令，模拟 pxGrid 节点断开的情况
- 在辅助 pxGrid 节点上发出“application start ise”命令，启动辅助 pxGrid 节点
- 从 MnT 主要节点下载活动会话以便对其进行比较，这些会话应该相同
- 将 pxGrid 客户端注册到辅助 pxGrid 节点
- 在 ISE 中查看注册的 pxGrid 客户端
- 查看部署节点状态以显示 pxGrid 节点状态

恢复 pxGrid 主要节点

- 在辅助 pxGrid 节点上发出“application stop ise”命令
- 在主要 pxGrid 节点上发出“application start ise”命令
- 从 MnT 主要节点下载活动会话以便对其进行比较，这些会话应该相同
- 将 pxGrid 客户端注册到主要 pxGrid 节点
- 在 ISE 中查看注册的 pxGrid 客户端
- 查看部署节点状态以显示 pxGrid 节点状态

测试 pxGrid 主用-备用配置

基本操作

此处我们在 pxGrid 主用-备用配置中，将 pxGrid 客户端注册到第一个 pxGrid 节点或主要 pxGrid 节点。

基本操作：

- 将 pxGrid 客户端注册到主要 pxGrid 节点

注：在 pxGrid 主用-备用配置中，只有主要 pxGrid 节点可处于活动状态，而辅助 pxGrid 节点则处于“not running”状态，正如在 pxGrid 辅助节点上发出“sh application status ise”命令时所示

- 从 MnT 主要节点下载活动会话记录
- 在 ISE 中查看注册的 pxGrid 客户端状态
- 查看部署节点状态以显示 pxGrid 节点状态

下图说明所有节点都处于活动状态

步骤 1 验证所有节点是否都处于活动状态

Administration -> System -> Deployment，您应该看到所有节点

The screenshot shows the Cisco Identity Services Engine (ISE) Administration interface. The top navigation bar includes links for Home, Operations, Policy, Guest Access, Administration, System, Identity Management, Network Resources, Device Portal Management, pxGrid Services, Feed Service, and pxGrid Identity Mapping. The Administration tab is selected.

The main content area displays the 'Deployment' section under 'System'. On the left, there is a sidebar with a 'Deployment' tree node. The right side shows a table titled 'Deployment Nodes' with the following data:

	Hostname	Node Type	Personas	Role(s)	Services	Node Stat
<input type="checkbox"/>	admin1	ISE	Administration	PRIMARY(A)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/>	admin2	ISE	Administration	SECONDARY(A)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/>	mnt1	ISE	Monitoring	PRIMARY(M)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/>	mnt2	ISE	Monitoring	SECONDARY(M)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/>	psn1	ISE	Policy Service	All	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/>	pxgrid1	ISE	pxGrid		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
<input type="checkbox"/>	pxgrid2	ISE	pxGrid		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

步骤 2 验证 pxGrid 服务是否已启动，ISE 主要 PAN 节点、ISE 辅助 PAN 节点、ISE 主要 MnT 节点和 ISE 辅助 MnT 节点是不是注册的客户端。

Administration -> pxGrid Services

	Client Name	Client Description	Capabilities	Status	Client Group	Log
<input type="checkbox"/>	ise-admin-mnt2		Capabilities(0 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-mnt-mnt2		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-mnt-mnt1		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-admin-mnt1		Capabilities(1 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-admin-admin1		Capabilities(2 Pub, 1 Sub)	Online	Administrator	View
<input type="checkbox"/>	mac_engineering17		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
<input type="checkbox"/>	mac		Capabilities(0 Pub, 0 Sub)	Offline	Session	View

步骤 3 使用 pxGrid register 脚本和 session_download shell 脚本注册 pxGrid 客户端并下载活动会话记录。记下 pxGrid 节点的主 IP 地址和备用 IP 地址的 IP 地址用作 hostname。

注：在生产环境中，您可能通过 GUI 指定辅助 pxGrid 节点。

```

Johns-Macbook-Pro:bin jeppich$ ./register.sh -keystoreFilename mac.jks -keystorePassword cisco123 -
truststoreFilename caroot1.jks -truststorePassword cisco123 -hostname 10.0.0.48 10.0.0.49 -username

测试故障切换

测试 pxGrid 节点能否故障切换为辅助 pxGrid 节点

- 在主要 pxGrid 节点上发出“application stop ise”命令，模拟 pxGrid 节点断开的情况
- 在辅助 pxGrid 节点上发出“application start ise”命令，启动辅助 pxGrid 节点
- 从 MnT 主要节点下载活动会话以便对其进行比较，这些会话应该相同
- 将 pxGrid 客户端注册到辅助 pxGrid 节点
- 在 ISE 中查看注册的 pxGrid 客户端
- 查看部署节点状态以显示 pxGrid 节点状态
- 在主要 pxGrid 节点上发出“application stop ise”命令，模拟 pxGrid 节点断开的情况
- 在辅助 pxGrid 节点上发出“application start ise”命令，启动辅助 pxGrid 节点
- 从 MnT 主要节点下载活动会话以便对其进行比较，这些会话应该相同

步骤 1 验证主要 pxGrid 节点或 pxGrid 1 是否断开。

Administration -> System -> Deployment

	Hostname	Node Type	Personas	Role(s)	Services	Node Status
<input type="checkbox"/>	admin1	ISE	Administration	PRIMARY(A)		
<input type="checkbox"/>	admin2	ISE	Administration	SECONDARY(A)		
<input type="checkbox"/>	mnt1	ISE	Monitoring	PRIMARY(M)		
<input type="checkbox"/>	mnt2	ISE	Monitoring	SECONDARY(M)		
<input type="checkbox"/>	psn1	ISE	Policy Service	All		
<input type="checkbox"/>	pxgrid1	ISE	pxGrid			
<input type="checkbox"/>	pxgrid2	ISE	pxGrid			

步骤 2 运行注册和会话下载命令，验证是否连接到辅助 pxGrid 节点。

```

Johns-Macbook-Pro:bin jeppich$ ./session_download.sh -keystoreFilename mac.jks -keystorePassword cisco123 -truststoreFilename caroot1.jks -truststorePassword cisco123 -hostname 10.0.0.49 -username mac_engineering15
----- properties -----
version=1.0.0
hostnames=10.0.0.49
username=mac_engineering15
keystoreFilename=mac.jks
keystorePassword=cisco123
truststoreFilename=caroot1.jks
truststorePassword=cisco123
filter=null
start=null
end=null
-----
connecting...
connected.
starting at Thu Mar 05 01:32:40 EST 2015...

session (ip=10.0.0.17, Audit Session Id=0A0000020000000E027B9538, User Name=jeppich, AD User DNS Domain=lab6.com, AD Host DNS Domain=null, AD User NetBIOS Name=LAB6, AD Host NETBIOS Name=null, Calling station id=00:0C:29:77:D6:85, Session state= STARTED, Epsstatus=null, Security Group=null, Endpoint Profile=VMWare-Device, NAS IP=10.0.0.2, NAS Port=GigabitEthernet1/0/23, RADIUSAVPairs=[ Acct-Session-Id=00000006], Posture Status=null, Posture Timestamp=, Session Last Update Time=Wed Mar 04 20:06:47 EST 2015 )
session (ip=10.0.0.51, Audit Session Id=0A0000020000000C00035232, User Name=68:EF:BD:F6:76:56, AD User DNS Domain=null, AD Host DNS Domain=null, AD User NetBIOS Name=null, AD Host NETBIOS Name=null, Calling station id=68:EF:BD:F6:76:56, Session state= STARTED, Epsstatus=null, Security Group=null, Endpoint Profile=Cisco-Device, NAS IP=10.0.0.2, NAS Port=GigabitEthernet1/0/15, RADIUSAVPairs=[ Acct-Session-Id=00000004], Posture Status=null, Posture Timestamp=, Session Last Update Time=Wed Mar 04 21:18:38 EST 2015 )... ending at: Thu Mar 05 01:32:40 EST 2015

-----
downloaded 2 sessions in 12 milliseconds
-----
connection closed
Johns-Macbook-Pro:bin jeppich$
```

步骤 3 验证 pxGrid 服务是否已启动，您能否看到 ISE 发布的节点。

Administration -> pxGrid Services

Clients						
Live Log						
<input checked="" type="checkbox"/>	Client Name	Client Description	Capabilities	Status	Client Group	Log
<input type="checkbox"/>	ise-admin-mnt2		Capabilities(0 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-mnt-mnt1		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-admin-mnt1		Capabilities(1 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-admin-admin1		Capabilities(2 Pub, 1 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-mnt-mnt2		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	mac		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
<input type="checkbox"/>	mac_engineering15		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
<input type="checkbox"/>	mac_engineering17		Capabilities(0 Pub, 0 Sub)	Offline	Session	View

步骤 4 在主要 pxGrid 节点断开的情况下，使用 pxGrid register 脚本和 session_download shell 脚本注册 pxGrid 客户端并下载活动会话记录。

```
Johns-Macbook-Pro:bin jeppich$ ./register.sh -keystoreFilename mac.jks -keystorePassword cisco123 -truststoreFilename caroot1.jks -truststorePassword cisco123 -hostname 10.0.0.49 -username mac_engineering20 -group Session
----- properties -----
version=1.0.0
hostnames=10.0.0.49
username=mac_engineering20
descriptipon=null
keystoreFilename=mac.jks
keystorePassword=cisco123
truststoreFilename=caroot1.jks
truststorePassword=cisco123
-----
registering...
connecting...
connected.
done registering.
connection closed
Johns-Macbook-Pro:bin jeppich$
```

步骤 5 验证您能否看到注册的 pxGrid 客户端 mac_engineering20
Administration -> pxGrid Services

Clients							Live Log		
<input checked="" type="checkbox"/> Enable	<input type="checkbox"/> Disable	<input checked="" type="checkbox"/> Approve	<input type="checkbox"/> Group	<input type="checkbox"/> Decline	<input type="checkbox"/> Delete	<input type="checkbox"/> Refresh	Total Pending Approval(0)	1 - 9 of 9	Show <input type="button"/>
<input type="checkbox"/>									
<input type="checkbox"/>	► ise-admin-mnt2						Capabilities(0 Pub, 0 Sub)	Online	Client Group
<input type="checkbox"/>	► ise-mnt-mnt1						Capabilities(2 Pub, 0 Sub)	Online	Administrator
<input type="checkbox"/>	► ise-admin-mnt1						Capabilities(1 Pub, 0 Sub)	Online	Administrator
<input type="checkbox"/>	► ise-admin-admin1						Capabilities(2 Pub, 1 Sub)	Online	Administrator
<input type="checkbox"/>	► ise-mnt-mnt2						Capabilities(2 Pub, 0 Sub)	Online	Administrator
<input type="checkbox"/>	► mac						Capabilities(0 Pub, 0 Sub)	Offline	Session
<input type="checkbox"/>	► mac_engineering15						Capabilities(0 Pub, 0 Sub)	Offline	Session
<input type="checkbox"/>	► mac_engineering17						Capabilities(0 Pub, 0 Sub)	Offline	Session
<input type="checkbox"/>	► mac_engineering20						Capabilities(0 Pub, 0 Sub)	Offline	Session

恢复主要节点

恢复 pxGrid 主要节点

- 在辅助 pxGrid 节点上发出“application stop ise”命令
- 在主要 pxGrid 节点上发出“application start ise”命令
- 从 MnT 主要节点下载活动会话以便对其进行比较，这些会话应该相同
- 将 pxGrid 客户端注册到主要 pxGrid 节点
- 在 ISE 中查看注册的 pxGrid 客户端
- 查看部署节点状态以显示 pxGrid 节点状态

步骤 1 验证主要 pxGrid 节点是否已恢复

Administration -> System -> Deployment, 您应该看到所有节点

Hostname	Node Type	Personas	Role(s)	Services	Node Status
admin1	ISE	Administration	PRIMARY(A)		<input checked="" type="checkbox"/>
admin2	ISE	Administration	SECONDARY(A)		<input checked="" type="checkbox"/>
mnt1	ISE	Monitoring	PRIMARY(M)		<input checked="" type="checkbox"/>
mnt2	ISE	Monitoring	SECONDARY(M)		<input checked="" type="checkbox"/>
psn1	ISE	Policy Service		All	<input checked="" type="checkbox"/>
pxgrid1	ISE	pxGrid			<input checked="" type="checkbox"/>
pxgrid2	ISE	pxGrid			<input type="checkbox"/>

步骤 2 验证 pxGrid 服务是否正在运行，您能否看到 ISE 发布的节点

Administration -> pxGrid Services

Client Name	Client Description	Capabilities	Status	Client Group	Log
ise-mnt-mnt2		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
ise-mnt-mnt1		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
ise-admin-mnt1		Capabilities(1 Pub, 0 Sub)	Online	Administrator	View
ise-admin-admin1		Capabilities(2 Pub, 1 Sub)	Online	Administrator	View
ise-admin-mnt2		Capabilities(0 Pub, 0 Sub)	Online	Administrator	View
mac		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
mac_engineering17		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
mac_engineering15		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
mac_engineering20		Capabilities(0 Pub, 0 Sub)	Offline	Session	View

步骤 3 验证是否仍有连接正在运行 session_download 命令下载活动会话

```
Dddd
Johns-Macbook-Pro:bin jeppich$ ./session_download.sh -keystoreFilename mac.jks -keystorePassword cisco123 -
-truststoreFilename caroot1.jks -truststorePassword cisco123 -hostname 10.0.0.48 10.0.0.49 -username
mac_engineering15
----- properties -----
version=1.0.0
hostnames=10.0.0.48, 10.0.0.49
username=mac_engineering15
keystoreFilename=mac.jks
keystorePassword=cisco123
truststoreFilename=caroot1.jks
truststorePassword=cisco123
filter=null
start=null
end=null
-----
connecting...
connected.
starting at Thu Mar 05 01:57:14 EST 2015...

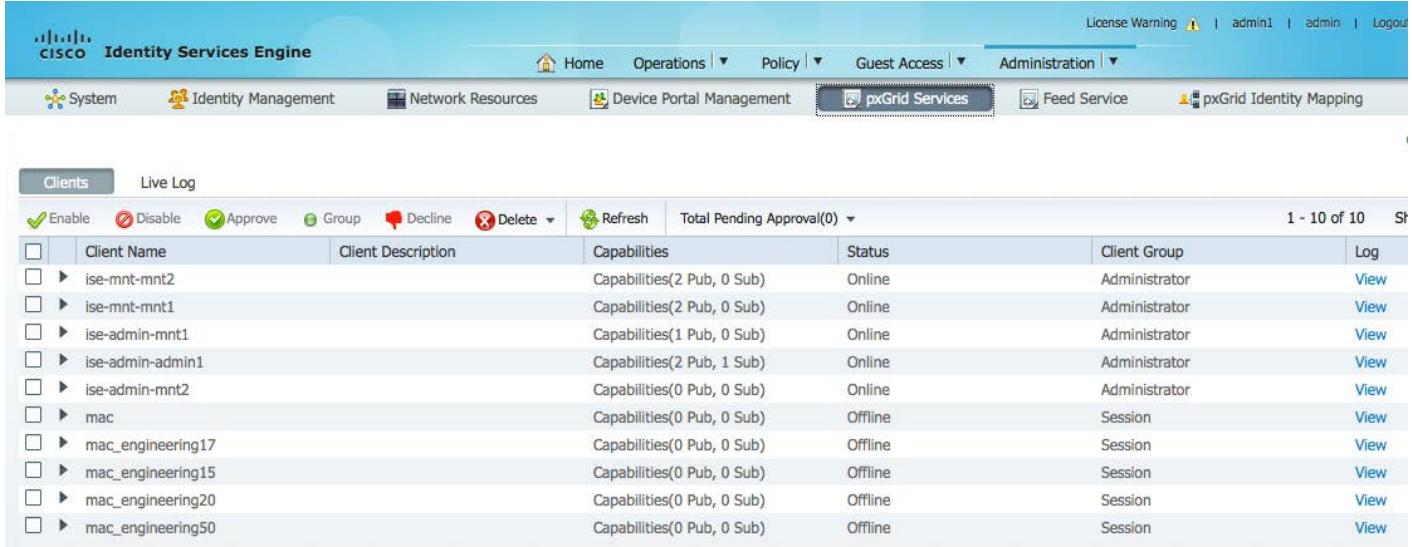

session (ip=10.0.0.17, Audit Session Id=0A000002000000E027B9538, User Name=jeppich, AD User DNS
Domain=lab6.com, AD Host DNS Domain=null, AD User NetBIOS Name=LAB6, AD Host NETBIOS Name=null, Calling
station id=00:0C:29:77:D6:85, Session state= STARTED, Epsstatus=null, Security Group=null, Endpoint
Profile=VMWare-Device, NAS IP=10.0.0.2, NAS Port=GigabitEthernet1/0/23, RADIUSAVPairs=[ Acct-Session-
Id=00000006], Posture Status=null, Posture Timestamp=, Session Last Update Time=Wed Mar 04 20:06:47 EST
2015 )
session (ip=10.0.0.51, Audit Session Id=0A000002000000C00035232, User Name=68:EF:BD:F6:76:56, AD User DNS
Domain=null, AD Host DNS Domain=null, AD User NetBIOS Name=null, AD Host NETBIOS Name=null, Calling station

Device, NAS IP=10.0.0.2, NAS Port=GigabitEthernet1/0/15, RADIUSAVPairs=[ Acct-Session-Id=00000004], Posture
Status=null, Posture Timestamp=, Session Last Update Time=Wed Mar 04 21:18:38 EST 2015 )... ending at: Thu
Mar 05 01:57:14 EST 2015

-----
downloaded 2 sessions in 12 milliseconds
-----
connection closed
```

步骤 4 通过注册 pxGrid 客户端来验证是否一切正常。

```
Johns-Macbook-Pro:bin jeppich$ ./register.sh -keystoreFilename mac.jks -keystorePassword cisco123 -
-truststoreFilename caroot1.jks -truststorePassword cisco123 -hostname 10.0.0.48 10.0.0.49 -username
mac_engineering50 -group Session
----- properties -----
version=1.0.0
hostnames=10.0.0.48, 10.0.0.49
username=mac_engineering50
description=null
keystoreFilename=mac.jks
keystorePassword=cisco123
truststoreFilename=caroot1.jks
truststorePassword=cisco123
-----
registering...
connecting...
connected.
done registering.
connection closed
```

步骤 5 在 ISE pxGrid 控制器上查看 pxGrid 客户端 mac_engineering50
Administration -> pxGrid Services

Clients						
Live Log						
<input checked="" type="checkbox"/> Enable	<input type="checkbox"/> Disable	<input checked="" type="checkbox"/> Approve	<input type="checkbox"/> Group	<input type="checkbox"/> Decline	<input type="checkbox"/> Delete	<input type="checkbox"/> Refresh
Total Pending Approval(0)						
1 - 10 of 10 Sh						
	Client Name	Client Description	Capabilities	Status	Client Group	Log
<input type="checkbox"/>	ise-mnt-mnt2		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-mnt-mnt1		Capabilities(2 Pub, 0 Sub)	Online	Administrator	View
<input type="checkbox"/>	ise-admin-mnt1		Capabilities(1 Pub, 0 Sub)	Online	Administrator	View

<input type="checkbox"/>	mac		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
<input type="checkbox"/>	mac_engineering17		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
<input type="checkbox"/>	mac_engineering15		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
<input type="checkbox"/>	mac_engineering20		Capabilities(0 Pub, 0 Sub)	Offline	Session	View
<input type="checkbox"/>	mac_engineering50		Capabilities(0 Pub, 0 Sub)	Offline	Session	View

ISE 自签名身份证证书

如果外部 CA 机构不可用，或者要在不使用 pxGrid SDK 中的样本证书的情况下测试 pxGrid 和 ISE 实施，则可使用 pxGrid 的 ISE 自签名身份证证书。默认情况下，自签名身份证证书包含增强型密钥用法 (EKU)，可同时用于服务器身份验证 (1.3.6.1 .5.5.7.3.1) 和客户端身份验证 (1.3.6.1 .5.5.7.3.2)，其位于 ISE 系统证书库中。

pxGrid 客户端可以使用自签名证书，请参阅：“将自签名证书与 pxGrid ISE 节点和 pxGrid 客户端配合使用”
pxGrid 客户端也可以使用 CA 签名的证书，请参阅：“将自签名证书与 pxGrid ISE 节点和 CA 签名的 pxGrid 客户端配合使用”。

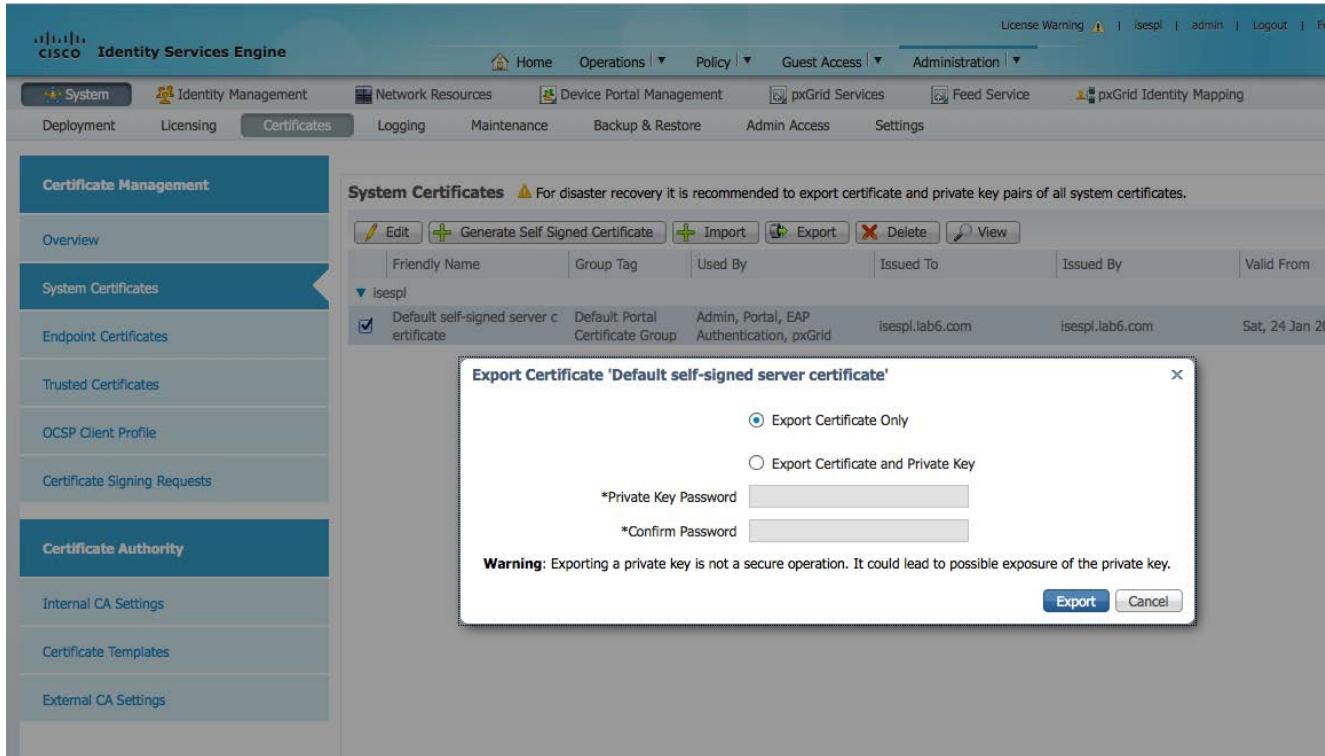

步骤 1 在 ISE 自签名身份证证书中启用 pxGrid 用法

Administration -> System -> Certificates -> System Certificates -> Edit ISE 自签名证书并选择 pxGrid，然后点击 Save

步骤 2 导出 Trusted Certificates 下的公共 ISE 自签名身份证书。

Administration -> System -> Certificates -> Edit 自签名证书，然后选择“Export Certificate Only”

注：此证书将另存为 PEM 文件

The screenshot shows the Cisco Identity Services Engine (ISE) web interface. The left sidebar has sections for Certificate Management (Overview, System Certificates, Endpoint Certificates, Trusted Certificates, OCSP Client Profile, Certificate Signing Requests) and Certificate Authority (Internal CA Settings, Certificate Templates, External CA Settings). The main content area is titled 'System Certificates' and displays a table of certificates. One row is selected, showing details for the 'Default self-signed server certificate'. A modal dialog box titled 'Export Certificate' is overlaid on the page, containing two radio button options: 'Export Certificate Only' (selected) and 'Export Certificate and Private Key'. Below these options are two input fields labeled '*Private Key Password' and '*Confirm Password', both of which are currently empty. A warning message at the bottom of the dialog states: 'Warning: Exporting a private key is not a secure operation. It could lead to possible exposure of the private key.' At the bottom right of the dialog are 'Export' and 'Cancel' buttons.

步骤 3 将 PEM 文件导入到受信任的证书库中

Administration -> System -> Certificates -> Trusted Certificates -> 选择 PEM certificate 并启用“Trust for authentication within ISE”，然后提交

步骤 4 启用 pxGrid 角色

Administration -> System -> Deployment -> Edit 部署节点并启用 pxGrid，然后点击 Save

步骤 5 启动 pxGrid 服务

Administration -> pxGrid Services

注：如果没有看到与 pxGrid 节点的连接，可能需要一些时间才能显示出来。

<input type="checkbox"/>	Client Name	Client Description	Capabilities	Status	Client Group
<input type="checkbox"/>	ise-admin-isespl		Capabilities(3 Pub, 1 Sub)	Online	Administrator
<input type="checkbox"/>	ise-mnt-isespl		Capabilities(2 Pub, 0 Sub)	Online	Administrator

SDK 中的样本证书

本示例中使用的是 pxGrid SDK 中的样本证书，它只能用于 POC，不能在生产环境中使用。此处我们导入 rootSample.crt 作为信任的 CA 证书，并导入 iseSample1.crt 和 iseSample1.key，充当 pxGrid 客户端用于客户端注册的公钥/私钥对。有关 POC 部署、样本证书和 pxGrid 示例 shell 脚本的更多详细信息，请参阅：
http://www.cisco.com/c/dam/en/us/td/docs/security/ise/how_to/HowTo-84-Configure_and_Test_Integration_with_Cisco_pxGrid.pdf

步骤 1 将 rootSample.crt 导入到 ISE 的受信任系统证书中

Administration -> System -> Certificates -> Trusted Certificate -> 导入 rootSample.crt，然后点击 Submit

The screenshot shows the Cisco Identity Services Engine (ISE) web interface. The top navigation bar includes links for Home, Operations, Policy, Guest Access, Administration, and various system management tabs like Deployment, Licensing, Certificates, Logging, Maintenance, Backup & Restore, Admin Access, and Settings. The main content area has a sidebar titled 'Certificate Management' with sections for Overview, System Certificates, Endpoint Certificates, Trusted Certificates (which is highlighted in blue), OCSP Client Profile, Certificate Signing Requests, and Certificate Authority. The main panel displays a form titled 'Import a new Certificate into the Certificate Store'. It contains fields for 'Certificate File' (with a 'Browse...' button), 'Friendly Name' (a text input field), and 'Trusted For:' (checkboxes for 'Trust for authentication within ISE', 'Trust for client authentication and Syslog', 'Trust for authentication of Cisco Services', and 'Validate Certificate Extensions'). Below these are 'Description' and 'Submit' and 'Cancel' buttons.

步骤 2 将 iseSample1.crt 和 iseSample1.key 导入到 ISE 的系统证书库中

Administration -> System -> Certificates -> System Certificates -> Import，使用 **cisco123** 作为密码，然后提交。

The screenshot shows the Cisco Identity Services Engine (ISE) web interface. The top navigation bar includes links for Home, Operations, Policy, Guest Access, Administration, and various system management tabs like Deployment, Licensing, Certificates, Logging, Maintenance, Backup & Restore, Admin Access, and Settings. The main content area has a sidebar titled 'Certificate Management' with sections for Overview, System Certificates (which is highlighted in blue), Endpoint Certificates, Trusted Certificates, OCSP Client Profile, Certificate Signing Requests, and Certificate Authority. The main panel displays a form titled 'Import Server Certificate'. It contains fields for 'Select Node' (set to 'isepl'), 'Certificate File' (with a 'Browse...' button), 'Private Key File' (with a 'Browse...' button), 'Password' (set to 'cisco123'), and 'Friendly Name' (a text input field). There are checkboxes for 'Allow Wildcard Certificates' and 'Validate Certificate Extensions'. The 'Usage' section includes checkboxes for 'Admin', 'EAP Authentication', 'pxGrid' (which is checked), and 'Portal'. Below these are 'Submit' and 'Cancel' buttons.

步骤 3 启用 pxGrid 角色

Administration -> System -> Deployment -> Edit 部署节点并启用 pxGrid, 然后点击 Save

The screenshot shows the 'Edit Node' screen for the 'Deployment' node 'isespl'. Under the 'General Settings' tab, the 'pxGrid' checkbox is checked. Other settings include Hostname 'isespl', FQDN 'isespl.lab6.com', IP Address '10.0.0.39', and Node Type 'Identity Services Engine (ISE)'. The 'Personas' section shows checkboxes for 'Administration' (Role STANDALONE), 'Monitoring' (Role PRIMARY), and 'Policy Service'. Under 'Policy Service', there are checkboxes for 'Enable Session Services' (Include Node in Node Group: None) and 'Enable Profiling Service'. The 'pxGrid' checkbox is also checked here.

步骤 4 启动 pxGrid 服务

Administration -> pxGrid Services

注：如果没有看到与 pxGrid 节点的连接，可能需要一些时间才能显示出来。

The screenshot shows the 'Clients' tab in the 'pxGrid Services' section. It lists two clients: 'ise-admin-isesp1' and 'ise-mnt-isesp1'. Both clients are online and belong to the 'Administrator' group. The table columns include Client Name, Client Description, Capabilities, Status, and Client Group.

	Client Name	Client Description	Capabilities	Status	Client Group
<input type="checkbox"/>	ise-admin-isesp1		Capabilities(3 Pub, 1 Sub)	Online	Administrator
<input type="checkbox"/>	ise-mnt-isesp1		Capabilities(2 Pub, 0 Sub)	Online	Administrator

测试 pxGrid 客户端

确保从 MnT 节点导出 ISE 自签名身份证书，如果是独立部署，则导出到用于批量会话下载的 pxGrid 客户端（请参阅“批量会话下载”）。

此处我们要检查客户端注册和会话下载

步骤 1 使用 register.sh 脚本并运行以下命令：

```
./register.sh -keystoreFilename iseSample1.jks -keystorePassword cisco123 -truststoreFilename rootSample.jks
--truststorePassword cisco123 -group Session -username iseSample -hostname 10.0.0.39 -group Session
----- properties -----
version=1.0.0
hostnames=10.0.0.39
username=iseSample
description=null
keystoreFilename=iseSample1.jks
keystorePassword=cisco123
truststoreFilename=rootSample.jks
truststorePassword=cisco123
-----
registering...
connecting...
connected.
done registering.
connection closed
```

验证 pxGrid 客户端 iseSample 是否在 pxGrid Services 下显示为已注册的客户端

	Client Name	Client Description	Capabilities	Status	Client Group
<input type="checkbox"/>	ise-admin-isespl		Capabilities(3 Pub, 1 Sub)	Online	Administrator
<input type="checkbox"/>	ise-mnt-isespl		Capabilities(2 Pub, 0 Sub)	Online	Administrator
<input type="checkbox"/>	isesample		Capabilities(0 Pub, 0 Sub)	Offline	Session

将自签名证书与 pxGrid ISE 节点和 pxGrid 客户端配合使用

将自签名证书与 pxGrid ISE 节点和 CA 签名的 pxGrid 客户端配合使用

将 CA 签名的证书与 pxGrid ISE 节点和 pxGrid 客户端配合使用

附录

故障排除

本节提供有关故障排除的信息。

如果看到以下错误消息，请确保 pxGrid 客户端、pxGrid 节点和 ISE 可通过 DNS 进行解析：

```
jeppich$ ./session_download.sh -keystoreFilename mac.jks -keystorePassword cisco123 -truststoreFilename
caroot1.jks -truststorePassword cisco123 -hostname 10.0.0.48 10.0.0.49 -username mac
----- properties -----
version=1.0.0
hostnames=10.0.0.48, 10.0.0.49
username=mac
keystoreFilename=mac.jks
keystorePassword=cisco123
truststoreFilename=caroot1.jks
truststorePassword=cisco123
filter=null
start=null
end=null
-----
connecting...
connected.

在 Centos 6.5 中删除 Java 和安装 JDK 8.0

删除 Java 早期版本

步骤 1 确保 Centos 6.5 是最新的，输入： yum update

注：您可能需要 root 权限，输入： su root yum update

步骤 2 更新完成后，输入以下命令删除任何已安装的其他 JAVA 包：

```
rpm -qa | grep -E '^open[jre|jdk]|j[re|dk]'
```

注：由于已经安装了 java-1.6.0-openjdk-1.6.0.0-1.56.1.11.8.el6_3.i686 包，所以我要运行命令将其删除

步骤 3 输入： yum remove java-1.6.0-openjdk

安装 JDK 8.0

步骤 1 切换为 root 用户，输入 su，系统将提示您输入密码。

步骤 2 安装 JDK 8，输入： rpm - Uvh jdk 8u20 Linuxx64.rpm

步骤 3 您还需要运行 alternatives 命令：

```
alternatives --install /usr/bin/java java /usr/java/latest/jre/bin/java 200000  
alternatives --install /usr/bin/javaws javaws /usr/java/latest/jre/bin/javaws 200000  
alternatives --install /usr/lib64/mozilla/plugins/libjavaplugin.so libjavaplugin.so.x86_64  
/usr/java/latest/jre/lib/amd64/libnpjp2.so 200000  
alternatives --install /usr/bin/javac javac /usr/java/latest/bin/javac 200000  
alternatives --install /usr/bin/jar jar /usr/java/latest/bin/jar 200000  
java -version
```

检查 Java 版本，输入 java - version，您应该看到： java version "1.8.0_20"
