# 1.2 jackson-core 2.12.5

## 1.2.1 Available under license :

# Jackson JSON processor

Jackson is a high-performance, Free/Open Source JSON processing library.

It was originally written by Tatu Saloranta (tatu.saloranta@iki.fi), and has been in development since 2007.

It is currently developed by a community of developers.

### ## Licensing

Jackson 2.x core and extension components are licensed under Apache License 2.0

To find the details that apply to this artifact see the accompanying LICENSE file.

### ## Credits

A list of contributors may be found from CREDITS(-2.x) file, which is included in some artifacts (usually source distributions); but is always available from the source code management (SCM) system project uses.

Apache License

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity

exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided

that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity,

or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf

of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

### Terms and Conditions for use, reproduction, and distribution
```

#### ### 1. Definitions

License shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

Licensor shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

Legal Entity shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, control means **(i)** the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or **(ii)** ownership of fifty percent (50%) or more of the outstanding shares, or **(iii)** beneficial ownership of such entity.

You (or Your) shall mean an individual or Legal Entity exercising permissions granted by this License.

Source form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

Object form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

Work shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

Derivative Works shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

Contribution shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, submitted means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication

that is conspicuously marked or otherwise designated in writing by the copyright owner as Not a Contribution.

Contributor shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

#### #### 2. Grant of Copyright License

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

#### #### 3. Grant of Patent License

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

#### #### 4. Redistribution

You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- \* \*(a)\* You must give any other recipients of the Work or Derivative Works a copy of this License; and
- \* \*(b)\* You must cause any modified files to carry prominent notices stating that You changed the files; and
- \* \*(c)\* You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- \* \*(d)\* If the Work includes a NOTICE text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the

following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

#### #### 5. Submission of Contributions

Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

#### #### 6. Trademarks

This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

#### #### 7. Disclaimer of Warranty

Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an AS IS BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

#### #### 8. Limitation of Liability

In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be

liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

#### #### 9. Accepting Warranty or Additional Liability

While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Eclipse Public License - v 2.0

=====

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE (AGREEMENT). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

#### ### 1. Definitions

Contribution means:

\* \*\*a)\*\*\* in the case of the initial Contributor, the initial content Distributed under this Agreement, and

\* \*\*b)\*\*\* in the case of each subsequent Contributor:

\* \*\*i)\*\*\* changes to the Program, and

\* \*\*ii)\*\*\* additions to the Program;

where such changes and/or additions to the Program originate from and are Distributed by that particular Contributor. A Contribution originates from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include changes or additions to the Program that are not Modified Works.

Contributor means any person or entity that Distributes the Program.

Licensed Patents mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

Program means the Contributions Distributed in accordance with this Agreement.

Recipient means anyone who receives the Program under this Agreement or any Secondary License (as applicable), including Contributors.

Derivative Works shall mean any work, whether in Source Code or other form, that is based on (or derived from) the Program and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a

whole, an original work of authorship.

Modified Works shall mean any work in Source Code or other form that results from an addition to, deletion from, or modification of the contents of the Program, including, for purposes of clarity any new file in Source Code form that contains any contents of the Program. Modified Works shall not include works that contain only declarations, interfaces, types, classes, structures, or files of the Program solely in each case in order to link to, bind by name, or subclass the Program or Modified Works thereof.

Distribute means the acts of **\*\*a)\*\*** distributing or **\*\*b)\*\*** making available in any manner that enables the transfer of a copy.

Source Code means the form of a Program preferred for making modifications, including but not limited to software source code, documentation source, and configuration files.

Secondary License means either the GNU General Public License, Version 2.0, or any later versions of that license, including any exceptions or additional permissions as identified by the initial Contributor.

### ### 2. Grant of Rights

**\*\*a)\*\*** Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, Distribute and sublicense the Contribution of such Contributor, if any, and such Derivative Works.

**\*\*b)\*\*** Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in Source Code or other form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

**\*\*c)\*\*** Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to Distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

**\*\*d)\*\*** Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

**\*\*e)\*\*** Notwithstanding the terms of any Secondary License, no Contributor makes additional grants to any Recipient (other than those set forth in this Agreement) as a result of such Recipient's receipt of the Program under the terms of a Secondary License (if permitted under the terms of Section 3).

### ### 3. Requirements

**\*\*3.1\*\*** If a Contributor Distributes the Program in any form, then:

\* \*\*a)\*\*\* the Program must also be made available as Source Code, in accordance with section 3.2, and the Contributor must accompany the Program with a statement that the Source Code for the Program is available under this Agreement, and informs Recipients how to obtain it in a reasonable manner on or through a medium customarily used for software exchange; and

\* \*\*b)\*\*\* the Contributor may Distribute the Program under a license different than this Agreement, provided that such license:

\* \*\*i)\*\*\* effectively disclaims on behalf of all other Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

\* \*\*ii)\*\*\* effectively excludes on behalf of all other Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

\* \*\*iii)\*\*\* does not attempt to limit or alter the recipients' rights in the Source Code under section 3.2; and

\* \*\*iv)\*\*\* requires any subsequent distribution of the Program by any party to be under a license that satisfies the requirements of this section 3.

\*\*3.2\*\* When the Program is Distributed as Source Code:

\* \*\*a)\*\*\* it must be made available under this Agreement, or if the Program \*(i)\* is combined with other material in a separate file or files made available under a Secondary License, and \*(ii)\* the initial Contributor attached to the Source Code the notice described in Exhibit A of this Agreement, then the Program may be made available under the terms of such Secondary Licenses, and

\* \*\*b)\*\*\* a copy of this Agreement must be included with each copy of the Program.

\*\*3.3\*\* Contributors may not remove or alter any copyright, patent, trademark, attribution notices, disclaimers of warranty, or limitations of liability (notices) contained within the Program from any copy of the Program which they Distribute, provided that Contributors may add their own appropriate notices.

#### ### 4. Commercial Distribution

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor (Commercial Contributor) hereby agrees to defend and indemnify every other Contributor (Indemnified Contributor) against any losses, damages and costs (collectively Losses) arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: \*\*a)\*\* promptly notify the Commercial Contributor in writing of such claim, and \*\*b)\*\* allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's

responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

### ### 5. No Warranty

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE PROGRAM IS PROVIDED ON AN AS IS BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

### ### 6. Disclaimer of Liability

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

### ### 7. General

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable

separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be Distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to Distribute the Program (including its Contributions) under the new version.

Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved. Nothing in this Agreement is intended to be enforceable by any entity that is not a Contributor or Recipient. No third-party beneficiary rights are created under this Agreement.

#### #### Exhibit A - Form of Secondary Licenses Notice

> This Source Code may also be made available under the following Secondary Licenses when the conditions for such availability set forth in the Eclipse Public License, v. 2.0 are satisfied: {name license(s), version(s), and exceptions or additional permissions here}.

Simply including a copy of this Agreement, including this Exhibit A is not sufficient to license the Source Code under Secondary Licenses.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

Apache License

=====

\_Version 2.0, January 2004\_

\_&lt;<<https://www.apache.org/licenses/>>>&gt;\_

#### ### Terms and Conditions for use, reproduction, and distribution

##### #### 1. Definitions

License shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

Licensors shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

Legal Entity shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, control means **(i)** the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or **(ii)** ownership of fifty percent (50%) or more of the outstanding shares, or **(iii)** beneficial ownership of such entity.

You (or Your) shall mean an individual or Legal Entity exercising

permissions granted by this License.

Source form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

Object form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

Work shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

Derivative Works shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

Contribution shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, submitted means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as Not a Contribution.

Contributor shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

#### #### 2. Grant of Copyright License

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

#### #### 3. Grant of Patent License

Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

#### #### 4. Redistribution

You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- \* **(a)** You must give any other recipients of the Work or Derivative Works a copy of this License; and
- \* **(b)** You must cause any modified files to carry prominent notices stating that You changed the files; and
- \* **(c)** You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- \* **(d)** If the Work includes a NOTICE text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

#### #### 5. Submission of Contributions

Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

#### #### 6. Trademarks

This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

#### #### 7. Disclaimer of Warranty

Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an AS IS BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

#### #### 8. Limitation of Liability

In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

#### #### 9. Accepting Warranty or Additional Liability

While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

\_END OF TERMS AND CONDITIONS\_

### APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets `[]` replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same printed page as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

*signed* integers. See the from* functions below for more\r\n * convenient ways of constructing Longs.\r\n * \r\n * The internal representation of a long is the two given signed, 32-bit values.\r\n * We use 32-bit pieces because these
are the size of integers on which\r\n * Javascript performs bit-operations. For operations like addition and\r\n *
multiplication, we split each number into 16-bit pieces, which can easily be\r\n * multiplied within Javascript's
floating-point representation without overflow\r\n * or change in sign.\r\n * \r\n * In the algorithms below, we
frequently reduce the negative case to the\r\n * positive case by negating the input(s) and then post-processing the
result.\r\n * Note that we must ALWAYS check specially whether those values are MIN_VALUE\r\n * (-2^63)
because -MIN_VALUE == MIN_VALUE (since 2^63 cannot be represented as\r\n * a positive number, it
```

```

overflows back into a negative). Not handling this case would often result in infinite recursion.

```

sequence that matches the given regular expression with the given [replacement]. The [replacement] can consist of any combination of literal text and \$-substitutions. To treat the replacement string literally escape it with the [kotlin.text.Regex.Companion.escapeReplacement] method.

```

@kotlin.internal.InlineOnly
public inline fun CharSequence.replace(regex: Regex, replacement: String):
String = regex.replace(this, replacement)
Returns a new string obtained by replacing each substring
of this char sequence that matches the given regular expression with the result of the given function [transform]
that takes [MatchResult] and returns a string to be used as a replacement for that match.

@kotlin.internal.InlineOnly
public inline fun CharSequence.replace(regex: Regex, noinline transform:
(MatchResult) -> CharSequence): String =
    regex.replace(this, transform)
Replaces the first
occurrence of the given regular expression [regex] in this char sequence with specified [replacement] expression.

@param replacement A replacement expression that can include substitutions. See [Regex.replaceFirst] for
details.

@kotlin.internal.InlineOnly
public inline fun CharSequence.replaceFirst(regex: Regex,
replacement: String): String = regex.replaceFirst(this, replacement)
Returns `true` if this char
sequence matches the given regular expression.

@kotlin.internal.InlineOnly
public infix fun
CharSequence.matches(regex: Regex): Boolean = regex.matches(this)
Implementation of
[regionMatches] for CharSequences.
Invoked when it's already known that arguments are not Strings, so that
no additional type checks are performed.

internal fun CharSequence.regionMatchesImpl(thisOffset: Int,
other: CharSequence, otherOffset: Int, length: Int, ignoreCase: Boolean): Boolean {
    if ((otherOffset < 0) ||
(thisOffset < 0) || (thisOffset > this.length - length) || (otherOffset > other.length - length)) {
        return false
    }
    for (index in 0 until length) {
        if (!this[thisOffset + index].equals(other[otherOffset + index],
ignoreCase))
            return false
    }
    return true
}
Returns `true` if this char sequence
starts with the specified character.

public fun CharSequence.startsWith(char: Char, ignoreCase: Boolean =
false): Boolean =
    this.length > 0 && this[0].equals(char, ignoreCase)
Returns `true` if this char
sequence ends with the specified character.

public fun CharSequence.endsWith(char: Char, ignoreCase:
Boolean = false): Boolean =
    this.length > 0 && this[lastIndex].equals(char, ignoreCase)
Returns `true` if this char sequence starts with the specified prefix.

public fun
CharSequence.startsWith(prefix: CharSequence, ignoreCase: Boolean = false): Boolean {
    if (!ignoreCase &&
this is String && prefix is String)
        return this.startsWith(prefix)
    else
        return
regionMatchesImpl(0, prefix, 0, prefix.length, ignoreCase)
}
Returns `true` if a substring of this
char sequence starting at the specified offset [startIndex] starts with the specified prefix.

public fun
CharSequence.startsWith(prefix: CharSequence, startIndex: Int, ignoreCase: Boolean = false): Boolean {
    if
(!ignoreCase && this is String && prefix is String)
        return this.startsWith(prefix, startIndex)
    else
        return
regionMatchesImpl(startIndex, prefix, 0, prefix.length, ignoreCase)
}
Returns `true` if this
char sequence ends with the specified suffix.

public fun CharSequence.endsWith(suffix: CharSequence,
ignoreCase: Boolean = false): Boolean {
    if (!ignoreCase && this is String && suffix is String)
        return
this.endsWith(suffix)
    else
        return
regionMatchesImpl(length - suffix.length, suffix, 0, suffix.length,
ignoreCase)
}
Returns the longest string `prefix` such that
this char sequence and [other] char sequence both start with this prefix, taking care not to split surrogate
pairs.
If this and [other] have no common prefix, returns the empty string.

@param ignoreCase `true`
to ignore character case when matching a character. By default `false`.

@sample
samples.text.Strings.commonPrefixWith

public fun CharSequence.commonPrefixWith(other:
CharSequence, ignoreCase: Boolean = false): String {
    val shortestLength = minOf(this.length,
other.length)
    var i = 0
    while (i < shortestLength && this[i].equals(other[i], ignoreCase = ignoreCase))
        i++
    if (this.hasSurrogatePairAt(i - 1) || other.hasSurrogatePairAt(i - 1))
        i--
    return subSequence(0, i).toString()
}
Returns the longest string `suffix` such that this char
sequence and [other] char sequence both end with this suffix, taking care not to split surrogate pairs.
If this and [other] have no common suffix, returns the empty string.

@param ignoreCase `true` to ignore
character case when matching a character. By default `false`.

@sample

```

limit The maximum number of substrings to return. Zero by default means no limit is set.

To avoid ambiguous results when strings in [delimiters] have characters in common, this method proceeds from the beginning to the end of this string, and finds at each position the first element in [delimiters] that matches this string at that position.

```
private fun CharSequence.rangesDelimitedBy(delimiters: Array<out String>,
startIndex: Int = 0, ignoreCase: Boolean = false, limit: Int = 0): Sequence<IntRange> {
    require(limit >= 0, {
        "Limit must be non-negative, but was $limit."
    })
    val delimitersList = delimiters.asList()
    return DelimitedRangesSequence(this, startIndex, limit, {
        currentIndex -> findAnyOf(delimitersList, currentIndex,
            ignoreCase = ignoreCase, last = false)
    }.let { it.first to it.second.length })
}
```

Splits this char sequence to a sequence of strings around occurrences of the specified [delimiters].

@param delimiters One or more strings to be used as delimiters.

@param ignoreCase `true` to ignore character case when matching a delimiter. By default `false`.

@param limit The maximum number of substrings to return. Zero by default means no limit is set.

To avoid ambiguous results when strings in [delimiters] have characters in common, this method proceeds from the beginning to the end of this string, and finds at each position the first element in [delimiters] that matches this string at that position.

```
public fun CharSequence.splitToSequence(vararg delimiters: String, ignoreCase: Boolean = false, limit: Int = 0):
Sequence<String> = rangesDelimitedBy(delimiters, ignoreCase = ignoreCase, limit = limit).map { substring(it) }
```

Splits this char sequence to a list of strings around occurrences of the specified [delimiters].

@param delimiters One or more strings to be used as delimiters.

@param ignoreCase `true` to ignore character case when matching a delimiter. By default `false`.

@param limit The maximum number of substrings to return. Zero by default means no limit is set.

To avoid ambiguous results when strings in [delimiters] have characters in common, this method proceeds from the beginning to the end of this string, and matches at each position the first element in [delimiters] that is equal to a delimiter in this instance at that position.

```
public fun CharSequence.split(vararg delimiters: String, ignoreCase: Boolean = false, limit: Int = 0): List<String> {
    if (delimiters.size == 1) {
        val delimiter = delimiters[0]
        if (!delimiter.isEmpty())
            return split(delimiter, ignoreCase, limit)
    }
    return rangesDelimitedBy(delimiters, ignoreCase = ignoreCase, limit = limit).asIterable().map { substring(it) }
```

Splits this char sequence to a sequence of strings around occurrences of the specified [delimiters].

@param delimiters One or more characters to be used as delimiters.

@param ignoreCase `true` to ignore character case when matching a delimiter. By default `false`.

@param limit The maximum number of substrings to return.

```
public fun CharSequence.splitToSequence(vararg delimiters: Char, ignoreCase: Boolean = false, limit: Int = 0): Sequence<String> =
rangesDelimitedBy(delimiters, ignoreCase = ignoreCase, limit = limit).map { substring(it) }
```

Splits this char sequence to a list of strings around occurrences of the specified [delimiter].

\* This is specialized version of split which receives single non-empty delimiter and offers better performance

@param delimiter String used as delimiter

@param ignoreCase `true` to ignore character case when matching a delimiter. By default `false`.

@param limit The maximum number of substrings to return.

```
private fun CharSequence.split(delimiter: String, ignoreCase: Boolean, limit: Int): List<String> {
    require(limit >= 0, {
        "Limit must be non-negative, but was $limit."
    })

`kotlin.reflect` Visibility is an aspect of a Kotlin declaration regulating where that declaration is accessible in the source code. Visibility can be changed with one of the following modifiers: `public`, `protected`, `internal`, `private`. Note that some Java visibilities such as package-private and protected (which also gives access to items from the same package) cannot be represented in Kotlin, so there's no [KVisibility] value corresponding to them. See the [Kotlin language documentation](https://kotlinlang.org/docs/reference/visibility-modifiers.html) for more information.

```

enum class KVisibility {
    /**
     * Visibility of declarations marked with the `public` modifier, or with no modifier at all.
     */
    PUBLIC,
    /**
     * Visibility of declarations marked with the `protected` modifier.
     */
    PROTECTED,
    /**
     * Visibility of declarations marked with the `internal` modifier.
     */
    INTERNAL,
    /**
     * Visibility of declarations marked with the `private` modifier.
     */
    PRIVATE,
}

```

```

exception if it does not suspend or [COROUTINE\_SUSPENDED] if it suspends. In the latter case, the [completion] continuation is invoked when the coroutine completes with a result or an exception. The coroutine is started directly in the invoker's thread without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established. This function is designed to be used from inside of [suspendCoroutineUninterceptedOrReturn] to resume the execution of the suspended coroutine using a reference to the suspending function.

```

@SinceKotlin("1.3")@InlineOnly public actual inline fun <R, T> (suspend R.() -> T).startCoroutineUninterceptedOrReturn(
    receiver: R, completion: Continuation<T>) {
    Any? = this.asDynamic()(receiver, completion, false)
}

```

Creates unintercepted coroutine without receiver and with result type [T]. This function creates a new, fresh instance of suspendable computation every time it is invoked. To start executing the created coroutine, invoke `resume(Unit)` on the returned [Continuation] instance. The [completion] continuation is invoked when coroutine completes with result or exception. This function returns unintercepted continuation. Invocation of `resume(Unit)` starts coroutine immediately in the invoker's call stack without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established. Note that [completion] of this function may get invoked in an arbitrary context. [Continuation.intercepted] can be used to acquire the intercepted continuation. Invocation of `resume(Unit)` on intercepted continuation guarantees that execution of both the coroutine and [completion] happens in the invocation context established by [ContinuationInterceptor]. Repeated invocation of any resume function on the resulting continuation corrupts the state machine of the coroutine and may result in arbitrary behaviour or exception.

```

@SinceKotlin("1.3") public actual fun <T> (suspend () -> T).createCoroutineUnintercepted(
    completion: Continuation<T>) {
    Continuation<Unit> = // Kotlin/JS suspend lambdas have an extra parameter `suspended` if (this.asDynamic().length == 2)
    { // When `suspended` is true the continuation is created, but not executed
    this.asDynamic()(completion, true) } else {
        createCoroutineFromSuspendFunction(completion) {
            this.asDynamic()(completion)
        }
}
}

```

Creates unintercepted coroutine with receiver type [R] and result type [T]. This function creates a new, fresh instance of suspendable computation every time it is invoked. To start executing the created coroutine, invoke `resume(Unit)` on the returned [Continuation] instance. The [completion] continuation is invoked when coroutine completes with result or exception. This function returns unintercepted continuation. Invocation of `resume(Unit)` starts coroutine immediately in the invoker's call stack without going through the [ContinuationInterceptor] that might be present in the completion's [CoroutineContext]. It is the invoker's responsibility to ensure that a proper invocation context is established. Note that [completion] of this function may get invoked in an arbitrary context. [Continuation.intercepted] can be used to acquire the intercepted continuation. Invocation of `resume(Unit)` on intercepted continuation guarantees that execution of both the coroutine and [completion] happens in the invocation context established by [ContinuationInterceptor]. Repeated invocation of any resume function on the resulting continuation corrupts the state machine of the coroutine and may result in arbitrary behaviour or exception.

```

@SinceKotlin("1.3") public actual fun <R, T> (suspend R.() -> T).createCoroutineUnintercepted(
    receiver: R, completion: Continuation<T>) {
    Continuation<Unit> = // Kotlin/JS suspend lambdas have an extra parameter `suspended` if
    (this.asDynamic().length == 3) { // When `suspended` is true the continuation is created, but not executed
        this.asDynamic()(receiver, completion, true) } else {
        createCoroutineFromSuspendFunction(completion) {
            this.asDynamic()(receiver, completion)
        }
}
}

```

Intercepts this continuation with [ContinuationInterceptor]. This function shall be used on the immediate result of [createCoroutineUnintercepted] or [suspendCoroutineUninterceptedOrReturn], in which case it checks for [ContinuationInterceptor] in the continuation's [context][Continuation.context], invokes [ContinuationInterceptor.interceptContinuation], caches and returns the result. If this function is invoked on other [Continuation] instances it returns `this` continuation unchanged.

marker\r\n\r\n\r\n/\r\n * Gives a declaration (a function, a property or a class) specific name in JavaScript.\r\n\r\n *
This may be useful in the following cases:\r\n\r\n * * There are two functions for which the compiler gives same
name in JavaScript, you can\r\n\r\n * mark one with `@JsName(...)` to prevent the compiler from reporting error.\r\n\r\n
* * You are writing a JavaScript library in Kotlin. The compiler produces mangled names\r\n\r\n * for functions
with parameters, which is unnatural for usual JavaScript developer.\r\n\r\n * You can put `@JsName(...)` on
functions you want to be available from JavaScript.\r\n\r\n * * For some reason you want to rename declaration, e.g.
there's common term in JavaScript\r\n\r\n * for a concept provided by the declaration, which is uncommon in
Kotlin.\r\n\r\n * Example:\r\n\r\n * ``` kotlin\r\n\r\n * class Person(val name: String) {\r\n\r\n * fun hello() {\r\n\r\n *
println("Hello $name!")\r\n\r\n * }\r\n\r\n * @JsName("helloWithGreeting")\r\n\r\n * fun hello(greeting:
String) {\r\n\r\n * println("\r\n$greeting $name!")\r\n\r\n * }\r\n\r\n * }\r\n\r\n * ```\r\n\r\n * @property name the name
which compiler uses both for declaration itself and for all references to the declaration.\r\n\r\n * It's required to
denote a valid JavaScript identifier.\r\n\r\n */\r\n\r\n@Retention(AnnotationRetention.BINARY)\r\n@Target(CLASS,
FUNCTION, PROPERTY, CONSTRUCTOR, PROPERTY_GETTER, PROPERTY_SETTER)\r\n\r\npublic actual
annotation class JsName(actual val name: String)\r\n\r\n\r\n/\r\n * Denotes an `external` declaration that must be
imported from native JavaScript library.\r\n\r\n * The compiler produces the code relevant for the target module
system, for example, in case of CommonJS,\r\n\r\n * it will import the declaration via the `require(...)` function.\r\n\r\n
*\r\n\r\n * The annotation can be used on top-level external declarations (classes, properties, functions) and files.\r\n\r\n
*\r\n\r\n * In case of file (which can't be `external`) the following rule applies: all the declarations in\r\n\r\n * the
file must be `external`. By applying `@JsModule(...)` on a file you tell the compiler to import a JavaScript object\r\n\r\n
* that contain all the declarations from the file.\r\n\r\n * Example:\r\n\r\n * ``` kotlin\r\n\r\n * @JsModule("jquery")\r\n\r\n
* external abstract class JQuery() {\r\n\r\n * // some declarations here\r\n\r\n * }\r\n\r\n * @JsModule("jquery")\r\n\r\n
* external fun JQuery(element: Element): JQuery\r\n\r\n * ```\r\n\r\n * @property import name of a module to import
declaration from.\r\n\r\n * It is not interpreted by the Kotlin compiler, it's passed as is directly to the target
module system.\r\n\r\n * @see JsNonModule\r\n\r\n
*/\r\n\r\n@Retention(AnnotationRetention.BINARY)\r\n@Target(CLASS, PROPERTY, FUNCTION, FILE)\r\n\r\npublic
annotation class JsModule(val import: String)\r\n\r\n\r\n/\r\n * Denotes an `external` declaration that can be used
without module system.\r\n\r\n * By default, an `external` declaration is available regardless your target module
system.\r\n\r\n * However, by applying [JsModule] annotation you can make a declaration unavailable to *plain*
module system.\r\n\r\n * Some JavaScript libraries are distributed both as a standalone downloadable piece of
JavaScript and as a module available\r\n\r\n * as an npm package.\r\n\r\n * To tell the Kotlin compiler to accept both
cases, you can augment [JsModule] with the `@JsNonModule` annotation.\r\n\r\n * For example:\r\n\r\n * ``` kotlin\r\n\r\n
* @JsModule("jquery")\r\n\r\n * @JsNonModule\r\n\r\n * @JsName("$")\r\n\r\n * external abstract class JQuery() {\r\n\r\n
* // some declarations here\r\n\r\n * }\r\n\r\n * @JsModule("jquery")\r\n\r\n * @JsNonModule\r\n\r\n * @JsName("$")\r\n\r\n
* external fun JQuery(element: Element): JQuery\r\n\r\n * ```\r\n\r\n * @see JsModule\r\n\r\n

```

\*`@Retention(AnnotationRetention.BINARY)``@Target(CLASS, PROPERTY, FUNCTION, FILE)``public`  
 annotation class `JsNonModule`  
 \* Adds prefix to `external` declarations in a source file.  
 \* JavaScript does not have concept of packages (namespaces). They are usually emulated by nested objects.  
 \* The compiler turns references to `external` declarations either to plain unprefix names (in case of `*plain*` modules)  
 \* or to plain imports.  
 \* However, if a JavaScript library provides its declarations in packages, you won't be satisfied with this.  
 \* You can tell the compiler to generate additional prefix before references to `external` declarations using the `@JsQualifier(...)` annotation.  
 \* Note that a file marked with the `@JsQualifier(...)` annotation can't contain non-`external` declarations.  
 \* Example:  
`@file:JsQualifier("my.jsPackageName")`  
`package some.kotlinPackage`  
`external fun foo(x: Int)`  
`external fun bar(): String`  
 \* Example: `@property value` the qualifier to add to the declarations in the generated code.  
 \* It must be a sequence of valid JavaScript identifiers separated by the ``.`` character.

Examples of valid qualifiers are: ``foo``, ``bar.Baz``, ``_.$0.f``.  
`@see JsModule`

\*`@Retention(AnnotationRetention.BINARY)``@Target(AnnotationTarget.FILE)``public` annotation class `JsQualifier`  
`(val value: String)`  
 \* Exports top-level declaration.  
 \* Used in future IR-based backend.  
 \* Has no effect in current JS backend.

```

Computes the inverse hyperbolic tangent of the value [x]. The returned value is  $y$  such that  $\text{tanh}(y) == x$ . Special cases:  $\text{atanh}(\text{NaN})$  is  $\text{NaN}$ ;  $\text{atanh}(x)$  is  $\text{NaN}$  when  $x > 1$  or  $x < -1$ ;  $\text{atanh}(1.0)$  is  $+\text{Inf}$ ;  $\text{atanh}(-1.0)$  is  $-\text{Inf}$ .

```

@SinceKotlin("1.2")@InlineOnly@JvmPublic actual inline fun atanh(x: Double): Double = nativeMath.atanh(x)

```

Computes  $\sqrt{x^2 + y^2}$  without intermediate overflow or underflow. Special cases: returns  $+\text{Inf}$  if any of arguments is infinite; returns  $\text{NaN}$  if any of arguments is  $\text{NaN}$  and the other is not infinite.

```

@SinceKotlin("1.2")@InlineOnly@JvmPublic actual inline fun hypot(x: Double, y: Double): Double = nativeMath.hypot(x, y)

```

Computes the positive square root of the value [x]. Special cases:  $\sqrt{x}$  is  $\text{NaN}$  when  $x < 0$  or  $x$  is  $\text{NaN}$ .

```

@SinceKotlin("1.2")@InlineOnly@JvmPublic actual inline fun sqrt(x: Double): Double = nativeMath.sqrt(x)

```

Computes Euler's number  $e$  raised to the power of the value [x]. Special cases:  $\text{exp}(\text{NaN})$  is  $\text{NaN}$ ;  $\text{exp}(+\text{Inf})$  is  $+\text{Inf}$ ;  $\text{exp}(-\text{Inf})$  is  $0.0$ .

```

@SinceKotlin("1.2")@InlineOnly@JvmPublic actual inline fun exp(x: Double): Double = nativeMath.exp(x)

```

Computes  $\text{exp}(x) - 1$ . This function can be implemented to produce more precise result for [x] near zero. Special cases:  $\text{expm1}(\text{NaN})$  is  $\text{NaN}$ ;  $\text{expm1}(+\text{Inf})$  is  $+\text{Inf}$ ;  $\text{expm1}(-\text{Inf})$  is  $-1.0$ . @see [exp] function.

```

@SinceKotlin("1.2")@InlineOnly@JvmPublic actual inline fun expm1(x: Double): Double =

```

`nativeMath.expm1(x)` Computes the logarithm of the value [x] to the given [base].  
 Special cases: `-log(x, b)` is `NaN` if either `x` or `b` are `NaN`. `-log(x, b)` is `NaN` when `x < 0` or `b <= 0` or `b == 1.0`. `-log(+Inf, +Inf)` is `NaN`. `-log(+Inf, b)` is `+Inf` for `b > 1` and `-Inf` for `b < 1`. `-log(0.0, b)` is `-Inf` for `b > 1` and `+Inf` for `b > 1`. See also logarithm functions for common fixed bases: `[ln]`, `[log10]` and `[log2]`.  
 @SinceKotlin("1.2")  
 public actual fun log(x: Double, base: Double): Double {  
 if (base <= 0.0 || base == 1.0) return Double.NaN  
 return nativeMath.log(x) /  
 nativeMath.log(base)  
 }  
 Computes the natural logarithm (base `E`) of the value [x].  
 Special cases: `-ln(NaN)` is `NaN`. `-ln(x)` is `NaN` when `x < 0.0`. `-ln(+Inf)` is `+Inf`. `-ln(0.0)` is `-Inf`.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun ln(x: Double): Double = nativeMath.log(x)  
 Computes the common logarithm (base 10) of the value [x].  
 @see `[ln]` function for special cases.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun log10(x: Double): Double = nativeMath.log10(x)  
 Computes the binary logarithm (base 2) of the value [x].  
 @see `[ln]` function for special cases.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun log2(x: Double): Double = nativeMath.log2(x)  
 Computes `ln(x + 1)`.  
 This function can be implemented to produce more precise result for [x] near zero.  
 Special cases: `-ln1p(NaN)` is `NaN`. `-ln1p(x)` is `NaN` where `x < -1.0`. `-ln1p(-1.0)` is `-Inf`. `-ln1p(+Inf)` is `+Inf`.  
 @see `[ln]` function  
 @see `[expm1]` function  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun ln1p(x: Double): Double = nativeMath.log1p(x)  
 Rounds the given value [x] to an integer towards positive infinity.  
 @return the smallest double value that is greater than or equal to the given value [x] and is a mathematical integer.  
 Special cases: `-ceil(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun ceil(x: Double): Double = nativeMath.ceil(x).unsafeCast<Double>() // TODO: Remove unsafe cast after removing public js.math  
 Rounds the given value [x] to an integer towards negative infinity.  
 @return the largest double value that is smaller than or equal to the given value [x] and is a mathematical integer.  
 Special cases: `-floor(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun floor(x: Double): Double = nativeMath.floor(x).unsafeCast<Double>()  
 Rounds the given value [x] to an integer towards zero.  
 @return the value [x] having its fractional part truncated.  
 Special cases: `-truncate(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun truncate(x: Double): Double = nativeMath.trunc(x)  
 Rounds the given value [x] towards the closest integer with ties rounded towards even integer.  
 Special cases: `-round(x)` is `x` where `x` is `NaN` or `+Inf` or `-Inf` or already a mathematical integer.  
 @SinceKotlin("1.2")  
 public actual fun round(x: Double): Double {  
 if (x % 0.5 != 0.0) {  
 return nativeMath.round(x).unsafeCast<Double>()  
 }  
 val floor = floor(x)  
 return if (floor % 2 == 0.0) floor else ceil(x)  
 }  
 Returns the absolute value of the given value [x].  
 Special cases: `-abs(NaN)` is `NaN`.  
 @see `absoluteValue` extension property for `[Double]`.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun abs(x: Double): Double = nativeMath.abs(x)  
 Returns the sign of the given value [x]: `-1.0` if the value is negative, `0.0` if the value is zero, `1.0` if the value is positive.  
 Special case: `-sign(NaN)` is `NaN`.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun sign(x: Double): Double = nativeMath.sign(x)  
 Returns the smaller of two values.  
 If either value is `NaN`, then the result is `NaN`.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun min(a: Double, b: Double): Double = nativeMath.min(a, b)  
 Returns the greater of two values.  
 If either value is `NaN`, then the result is `NaN`.  
 @SinceKotlin("1.2")  
 @InlineOnly  
 public actual inline fun max(a: Double, b: Double): Double = nativeMath.max(a, b)  
 // extensions  
 Raises this value to the power [x].  
 Special cases: `-b.pow(0.0)` is `1.0`. `-b.pow(1.0) == b`. `-b.pow(NaN)` is `NaN`. `-NaN.pow(x)` is `NaN` for `x != 0.0`. `-b.pow(Inf)` is `NaN` for `abs(b) == 1.0`. `-b.pow(x)` is `NaN` for `b < 0` and `x` is finite and not an integer.

```

Special cases:  $\cos(\text{NaN}|\pm\text{Inf}|\text{Inf})$  is  $\text{NaN}$

actual inline fun `cos(x: Float): Float = nativeMath.cos(x.toDouble()).toFloat()`

Computes the tangent of the angle [x] given in radians.

Special cases:  $\tan(\text{NaN}|\pm\text{Inf}|\text{Inf})$  is  $\text{NaN}$

actual inline fun `tan(x: Float): Float = nativeMath.tan(x.toDouble()).toFloat()`

Computes the arc sine of the value [x]; the returned value is an angle in the range from  $-\text{PI}/2$  to  $\text{PI}/2$  radians.

Special cases:  $\sin(x)$  is  $\text{NaN}$ , when  $|\text{abs}(x)| > 1$  or x is  $\text{NaN}$

actual inline fun `asin(x: Float): Float = nativeMath.asin(x.toDouble()).toFloat()`

Computes the arc cosine of the value [x]; the returned value is an angle in the range from  $0.0$  to  $\text{PI}$  radians.

Special cases:  $\cos(x)$  is  $\text{NaN}$ , when  $|\text{abs}(x)| > 1$  or x is  $\text{NaN}$

actual inline fun `acos(x: Float): Float = nativeMath.acos(x.toDouble()).toFloat()`

Computes the arc tangent of the value [x]; the returned value is an angle in the range from  $-\text{PI}/2$  to  $\text{PI}/2$  radians.

Special cases:  $\text{atan}(\text{NaN})$  is  $\text{NaN}$

actual inline fun `atan(x: Float): Float = nativeMath.atan(x.toDouble()).toFloat()`

Returns the angle  $\theta$  of the polar coordinates  $(r, \theta)$  that correspond to the rectangular coordinates  $(x, y)$  by computing the arc tangent of the value  $y/x$ ; the returned value is an angle in the range from  $-\text{PI}$  to  $\text{PI}$  radians.

Special cases:  $\text{atan2}(0.0, 0.0)$  is  $0.0$ ;  $\text{atan2}(0.0, x)$  is  $0.0$  for  $x > 0$  and  $\text{PI}$  for  $x < 0$ ;  $\text{atan2}(-0.0, x)$  is  $-0.0$  for  $x > 0$  and  $-\text{PI}$  for  $x < 0$ ;  $\text{atan2}(y, +\text{Inf})$  is  $0.0$  for  $0 < y < +\text{Inf}$  and  $-0.0$  for  $-\text{Inf} < y < 0$ ;  $\text{atan2}(y, -\text{Inf})$  is  $\text{PI}$  for  $0 < y < +\text{Inf}$  and  $-\text{PI}$  for  $-\text{Inf} < y < 0$ ;  $\text{atan2}(y, 0.0)$  is  $\text{PI}/2$  for  $y > 0$  and  $-\text{PI}/2$  for  $y < 0$ ;  $\text{atan2}(+\text{Inf}, x)$  is  $\text{PI}/2$  for finite  $x$ ;  $\text{atan2}(-\text{Inf}, x)$  is  $-\text{PI}/2$  for finite  $x$ ;  $\text{atan2}(\text{NaN}, x)$  and  $\text{atan2}(y, \text{NaN})$  is  $\text{NaN}$

actual inline fun `atan2(y: Float, x: Float): Float = nativeMath.atan2(y.toDouble(), x.toDouble()).toFloat()`

Computes the hyperbolic sine of the value [x].

Special cases:  $\sinh(\text{NaN})$  is  $\text{NaN}$ ;  $\sinh(+\text{Inf})$  is  $+\text{Inf}$ ;  $\sinh(-\text{Inf})$  is  $-\text{Inf}$

actual inline fun `sinh(x: Float): Float = nativeMath.sinh(x.toDouble()).toFloat()`

Computes the hyperbolic cosine of the value [x].

Special cases:  $\cosh(\text{NaN})$  is  $\text{NaN}$ ;  $\cosh(+\text{Inf}|\text{Inf})$  is  $+\text{Inf}$

actual inline fun `cosh(x: Float): Float = nativeMath.cosh(x.toDouble()).toFloat()`

Computes the hyperbolic tangent of the value [x].

Special cases:  $\tanh(\text{NaN})$  is  $\text{NaN}$ ;  $\tanh(+\text{Inf})$  is  $1.0$ ;  $\tanh(-\text{Inf})$  is  $-1.0$

actual inline fun `tanh(x: Float): Float = nativeMath.tanh(x.toDouble()).toFloat()`

Computes the inverse hyperbolic sine of the value [x].

The returned value is  $y$  such that  $\sinh(y) == x$ .

Special cases:  $\text{asinh}(\text{NaN})$  is  $\text{NaN}$ ;  $\text{asinh}(+\text{Inf})$  is  $+\text{Inf}$ ;  $\text{asinh}(-\text{Inf})$  is  $-\text{Inf}$

actual inline fun `asinh(x: Float): Float = nativeMath.asinh(x.toDouble()).toFloat()`

Computes the inverse hyperbolic cosine of the value [x].

The returned value is positive  $y$  such that  $\cosh(y) == x$ .

Special cases:  $\text{acosh}(\text{NaN})$  is  $\text{NaN}$ ;  $\text{acosh}(x)$  is  $\text{NaN}$  when  $x < 1$ ;  $\text{acosh}(+\text{Inf})$  is  $+\text{Inf}$

actual inline fun `acosh(x: Float): Float = nativeMath.acosh(x.toDouble()).toFloat()`

Computes the inverse hyperbolic tangent of the value [x].

The returned value is  $y$  such that  $\tanh(y) == x$ .

Special cases:  $\text{atanh}(\text{NaN})$  is  $\text{NaN}$ ;  $\text{atanh}(x)$  is  $\text{NaN}$  when  $|x| > 1$  or  $x < -1$ ;  $\text{atanh}(1.0)$  is  $+\text{Inf}$ ;  $\text{atanh}(-1.0)$  is  $-\text{Inf}$

actual inline fun `atanh(x: Float): Float = nativeMath.atanh(x.toDouble()).toFloat()`

Computes  $\sqrt{x^2 + y^2}$  without intermediate overflow or underflow.

Special cases: returns  $+\text{Inf}$  if any of arguments is infinite; returns  $\text{NaN}$  if any of arguments is  $\text{NaN}$  and the other is not infinite

actual inline fun `hypot(x: Float, y: Float): Float = nativeMath.hypot(x.toDouble(), y.toDouble()).toFloat()`

Computes the positive square root of the value [x].

Special cases:  $\sqrt{x}$  is  $\text{NaN}$  when  $x < 0$  or  $x$  is  $\text{NaN}$
