Introduction

This document describes the procedure for obtaining Technical Support through your newly adopted case management system through the Cisco[®] Technical Assistance Center (TAC). This document covers the Cisco.com user ID registration process, how to contact technical support, as well as how to manage your support case online.

We want you to know that this is only a change in the process through which you receive technical support. We at Cisco are committed to delivering the same high level of quality service that you are accustomed to receiving.

The Cisco TAC will allow you to:

- Open support cases by phone, web, or email 24 hours a day, 365 days a year
- Download software updates (maintenance and minor releases) for your covered software
- Access Cisco's online support, including database of product and service information, support case
 tracking, and a robust set of tools that help facilitate knowledge transfer to your staff and help answer
 questions more quickly

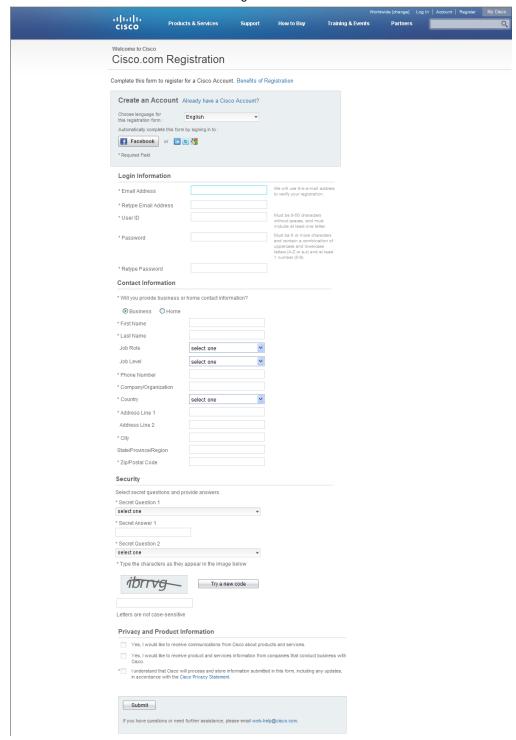

Registration for a Cisco.com User ID

To contact Cisco Technical Support for questions or issues with your Cisco Quantum SON Suite (formerly Intucell) products, you first need to register for a Cisco.com user ID. If you already have a Cisco.com user ID, go to step 5, as you do not need to reregister.

1. Navigate to www.cisco.com and click "Register."

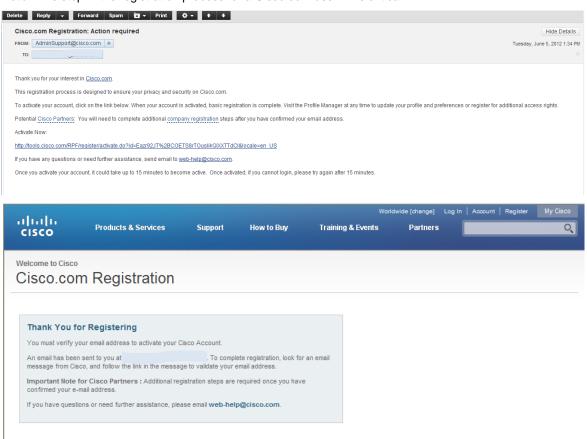

2. Fill out the information on the Cisco.com Registration form.

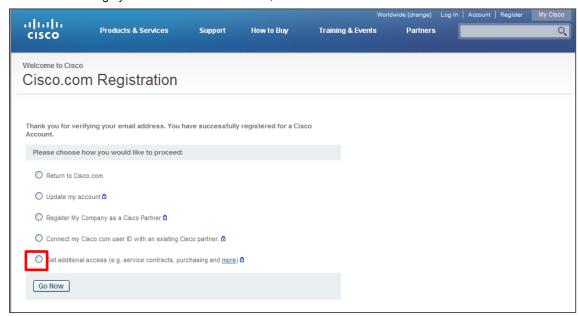

3. Upon clicking "Submit" on the first page, you will receive an email sent from Cisco. From the link provided in this email, you will be directed to this Cisco.com Registration confirmation page. This step is to verify, confirm, and activate your Cisco.com registration.

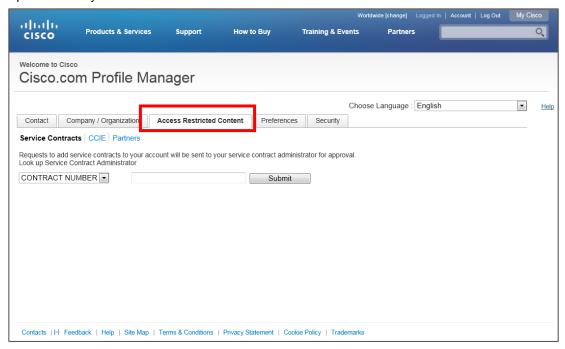

Note: This step in the registration process for a Cisco.com user ID is critical.

4. You will need to select the "Get additional access (e.g. service contracts, purchasing and more)" radio button to view and manage your Service Contract online, then click "Go Now."

5. You will be directed to the <u>Cisco.com Profile Manager</u>. From there, select the "Access Restricted Content" tab and enter your Service contract number(s) as provided in the Welcome to Cisco Services letter or contact your Cisco authorized partner or distributor for your contract number. Partners can access their new contract numbers in the <u>Cisco Service Contract Center (CSCC)</u>. If you have multiple service contract numbers, please separate them by commas.

If you have any problems with this web registration process, you may send an email to Cisco at web-help@cisco.com. If you are located in North America, you may call 1-800-553-2447 for assistance to reach Cisco's TAC support organization. For the rest of the world, it is recommended you consult the worldwide toll-free number list at www.cisco.com/en/US/support/tsd_cisco_worldwide_contacts.html, and one of the support agents will assist you in completing the registration process.

Service Access Management Tool

The Service Access Management Tool is an application that enables Partners or Customer Administrators to determine which of their service contract numbers are present in Cisco.com user profiles. It is ideal for organizations that want to manage and associate multiple Cisco.com profiles.

By using the Service Access Management Tool, Cisco partners and customers can manage access to the services provided by their contracts (e.g., TAC support, hardware replacement). This management can be done either using Bill to ID or contract number. To manage access by Bill to ID, the Bill to ID must be in an individual's Cisco.com profile and selected (enabled) for support access. This will ensure that all the contracts under the Bill to ID can be utilized for service. To manage access by contract number, a contract number must be in an individual's Cisco.com profile in order for that individual to be able to obtain service.

Access the Service Access Management Tool, training, and related content for more information.

Opening a Support Case by Phone

Support Numbers

1-800-553-2447 U.S.

For worldwide support numbers, refer to Cisco worldwide contacts: www.cisco.com/en/US/partner/support/tsd_cisco_worldwide_contacts.html

When you want to report a case, make sure you have the following information available:

- Cisco.com user ID that has been associated to the service contract
- · Service contract number
- Business effect (case severity)

Cisco entitles customers by contract number and Cisco.com ID. You must know your Cisco.com user name and have the contract number of the product when you are calling for support.

Once the agent has all the appropriate information he/she will open a case, provide you with a case tracking number and route your case to a support engineer. They will contact you to provide technical assistance.

Defining the Severity of a Support Case

Severity 1 and 2 Support Cases must be opened by phone.

Severity 3 and 4 Support Cases should be opened online or by email, but may be opened by phone.

- Severity 1 (S1) shall mean reported Error(s) in Covered Software that causes all or substantially all of a system to be functionally inoperative severely affecting delivery to Customers and requiring immediate corrective action, regardless of time of day or day of the week.
 - Product and/or covered software are in operable for 100% of Customers
 - Loss of service>0.5% of Customers
- Severity 2 (S2) shall mean reported Error(s) in covered products causing the loss of one or more major
 functions of the system, causing perceptible degradation or interruption of services delivery to Customers or
 seriously affecting Customer's ability to operate, administer, or maintain their system and requiring
 immediate attention. Urgency is less than Severity 1 situation because of a lesser immediate or impending
 effect on system performance, Customer's operation and revenue.
 - · Management system failure
 - No backup is available
- Severity 3 (S3) shall mean reported Error(s) in covered products disabling specific noncritical functions of
 the system that do not significantly affect delivery services to Customers. The lost or degraded functionality
 impairs Customer's ability to operate, administer, or maintain the system, but does not significantly affect
 services delivery to Customers.
 - System functionality or performance is reduced
 - System is working on backup
 - Loss of service <0.5 % of Subscribers

- Severity 4 (S4) shall mean reported Error(s) in covered products which is an irritant only and has no significant effect on the functionality or operation of the system and requests for informational support assistance, including product information requests and configuration assistance.
 - · Conditions that do not significantly impair the function of the system
 - Documentation
 - System enhancement/functionality request

Opening a Support Case by Web

The online support case management tool, called Support Case Manager (SCM), allows users to open a support case, assign a severity (level 3 or 4), receive information through the web or email, maintain and track support cases online, and upload files.

SCM allows you to create Cisco TAC support cases for issues covered under the terms of your Cisco support contract(s). At this time, SCM can assist you only with products currently covered by a Cisco service contract. If you would like assistance with a product that is not covered by a contract or is covered under warranty, contact the Cisco TAC by phone.

Before you use SCM, you must be logged in with your Cisco.com user ID and password, and your Cisco.com ID must contain all of your appropriate Cisco support contracts in order for you to access the services covered by those contracts. You can use the Cisco Profile Manager to associate all of your Cisco service contracts to your profile.

Note: If you have a Service Access Management Administrator, you can ask them to make sure that all of your service contracts are associated with your Cisco.com user ID. If you are unsure of your contract number(s), your Cisco Partner, Reseller, or Service Account Manager can provide you with a complete list of your service contracts.

The main steps for opening a support case using SCM include:

- Identify Type of Support Case and Verify Contact Information enter Cisco.com user ID, assign severity, and so on
- 2. Specify Associated Service Contract verify the product is covered by a service contract
- 3. Describe the Problem enter details about the product
- 4. Provide Shipping Information if you select "Replace my Product" as the support case type
- 5. Attach Files help diagnose your problem more quickly
- 6. Submit Your Support Case confirm information and edit accordingly

You can access the online support case tool using this link: tools.cisco.com/ServiceRequestTool/scm/mgmt/case

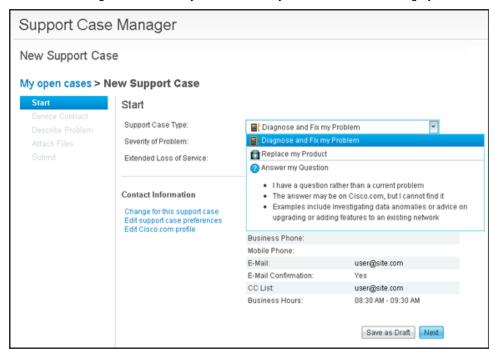

You will be required to log in with your Cisco.com ID and Password. Please make sure that you have your service contract number available with your Cisco.com ID.

To open a new support case, click on + New Case and then follow the instructions below.

Identify Type of Support Case and Verify Contact Information

Identify the type of support case, severity of the problem, extended loss of service (if applicable), and whether you would like the engineer to contact you. In addition, you can review and change your contact information.

Note: At any time during the process, you can click the Save a Draft button (shown in the image above) in order to save a draft of your support case. See the Save a Draft section in this document for the steps required to delete or continue submitting a saved support case.

Complete these steps in order to identify the type of support case and verify your contact information:

- 1. Choose one of the following options from the Support Case Type drop-down list.
 - Diagnose and Fix my Problem
 - Replace my Product
 - Answer my Question
- 2. Choose the severity from the Severity of Problem drop-down list. The Severity of Problem drop-down list is automatically populated based on the type of support case:

- Diagnose and Fix my Problem = Severity 3 Network Impaired
- Replace my Product = Severity 3 Network Impaired
- Answer my Question = Severity 4 Normal Response Time

If you need to open a severity 1 or 2 network-down emergency support case, please call the Technical Assistance Center (TAC) nearest you.

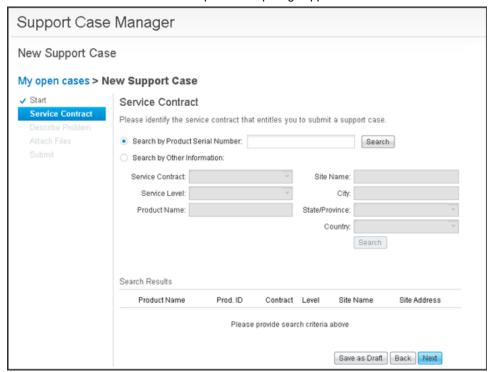

- 3. Choose one of the following values from the Extended Loss of Service drop-down list:
 - No: There is no extended loss of service. (Default)
 - Yes: Users are experiencing a loss of service for more than 15 seconds.

The Extended Loss of Service drop-down list does not appear if you selected **Answer my Question** from the Support Case Type drop-down list.

- 4. Review your contact information in the Contact Information section. Your contact information is automatically provided based on the Cisco.com username you used to log in to the tool. You can click the links located beneath Contact Information heading in order to make changes:
 - Click Change for this support case in order to change your contact information for this specific support case.
 - Click Edit support case preferences in order to edit your contact information preferences for all support case requests.
 - Click Edit Cisco.com profile in order to edit your profile.
- 5. Click Next to continue.

Specify Associated Service Contract

Enter the Product Serial Number and click on "Search." For software products enter the Service Contract number or other information to search for the product requiring support.

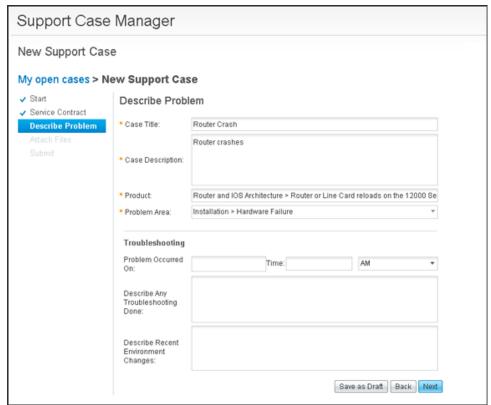

- 1. Choose the service contract for this product using one of these options:
 - Search by Product Serial Number
 - Search by Other Information
- 2. Select a product from the Search Results table.
- 3. Click Next.

Describe the Problem

Keep these guidelines in mind when describing your problem:

- Include a meaningful case title that states the problem accurately. A meaningful title permits assignment of the case to the appropriate technical resources.
- Describe the problem and symptoms (only one per support case).
- Include a history of the problem and any troubleshooting steps you completed.
- Describe your network topology.
- Include any recent changes to your network or data center environment.
- Include output from the show tech command (if applicable) and all other relevant output.
- Include software versions and types of equipment.

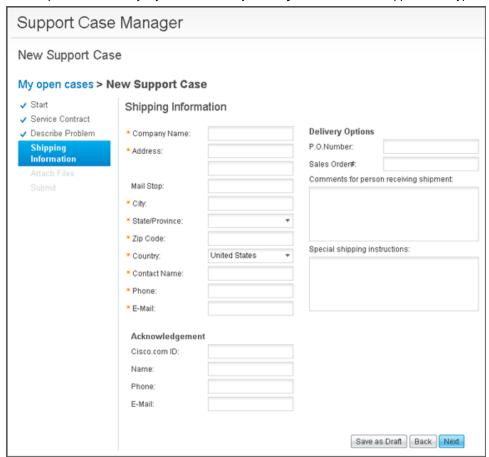

Complete these steps in order to describe the problem:

- 1. Enter the following required information:
 - Problem title
 - Problem description
 - Product
 - o For Cisco Intucell products choose Mobile Wireless (2G/3G/4g) and Wimax ➤ Quantum SON
 - Problem Area
- 2. Enter optional information in the remaining fields (as described in the guidelines above) to help expedite your support case.
- Click Next.

Provide Shipping Information

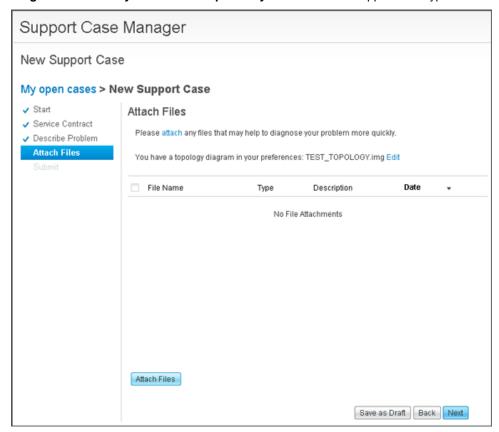

This step is available only if you selected **Replace my Product** as the support case type.

On the Shipping Information page, the default mailing address and contact information are populated from your service contract profile. You can add additional information in the **Acknowledgement** and **Delivery Options** sections. Once you enter the necessary information, click **Next**.

Attach Files

You can attach files that might help diagnose your problem more quickly. This step is available only if you selected **Diagnose and Fix my Problem** or **Replace my Product** as the support case type.

Complete these steps in order to attach files:

1. Click the **Attach Files** button, and select your files.

After you select your files, the files appear with the status as Upload Pending.

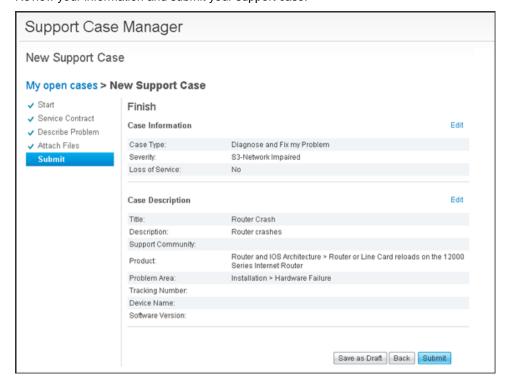

2. Click Next to upload these files.

The Type and Description fields in the first row contain a prompt to click the fields to add more information about the file. Click the Type field to trigger a drop-down list with a set of attachment types. In the Description field, you can type a brief description of the file.

3. Once the files show the status of Uploaded, click **Next** to continue.

Submit Your Support Case

Review your information and submit your support case.

- 1. Review the summary of your support case. If you need to update a section, click the **Edit** link located next to the section heading.
- 2. Click Submit in order to submit your support case.

Your support case number will appear at the top of the page.

Save as Draft

During your process to open a support case, you can click the **Save as Draft** button located at the bottom of the page in order to complete the process at a later time. When you click the Save as Draft button, all information you entered is saved, and you are redirected to your open support cases page. Each saved draft has an expiration date, after which it will be automatically deleted.

To continue submitting a saved draft, click the title of the support case.

To delete a saved draft, click the checkbox located next to the support case, and click the Delete button.

Opening a Support Case by Email

Open new support cases by email using the Cisco support email address: tac@cisco.com. If you are opening a new support case, put "Cisco Intucell" in the subject line of your email. This will help the agent processing the incoming email to determine the correct support case queue to route your support request.

Include the following information in your email:

- · Company name
- Contact name
- · Contact phone number
- · Cisco.com User ID
- · Contact email address
- Contract number
- Product type (e.g. Cisco Quantum Policy Suite for Mobile, etc.)
- Business effect (support case severity as defined above)
- · Brief problem description
- Equipment location (e.g., address)
- · Alternate contact name
- · Alternate contact phone number

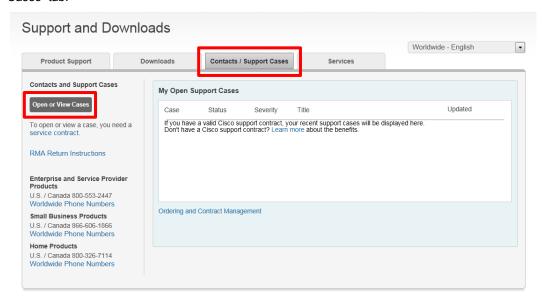

Providing this information will help expedite the processing of the support case through the Cisco TAC agent.

Once the agent has processed the email, he/she will open a support case and you will receive a support case number by email. A support engineer will contact you shortly regarding your support case.

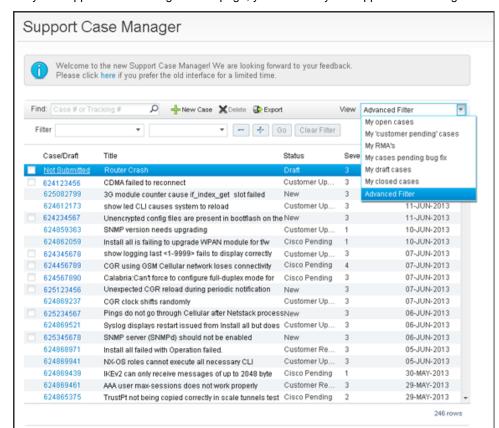

Managing Your Support Case

After you have created your support case, you can view the status, update the notes, upload files, turn automatic updates on or off, and request case closure.

Navigate to <u>www.cisco.com</u> and click "Support," then select "<u>Open or View Cases</u>" from the "Contacts/Support Cases" tab.

Or you may go directly to: tools.cisco.com/ServiceRequestTool/scm/mgmt/case

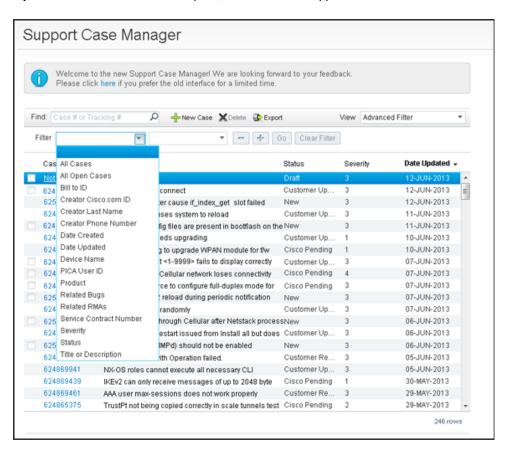

On your Support Case Manager home page, you can filter your support cases using the View menu.

Here are the available options:

- My open cases
- My 'customer pending' cases
- My RMAs
- My cases pending bug fix
- My draft cases
- · My closed cases
- Advanced Filter

If you select the Advanced Filter option, additional fields appear.

Select an option from the Filter menu, and enter additional information in the remaining fields in order to further filter your support cases. Here are the Filter menu options:

- All Cases
- All Open Cases
- Bill to ID
- Creator Cisco.com ID
- Creator Last Name
- Creator Phone Number
- Date Created
- Date Updated
- Device Name
- PICA User ID
- Product
- Related Bugs
- Related RMAs
- Service Contract Number
- Severity
- Status
- Title or Description
