

Unified security from the store to the cloud to the data center.

Retail Security should be your first thought, not an afterthought. As hackers become more sophisticated and ruthless, Cisco is evolving right along with them with security solutions and services that are simple, open, automated and effective.

Hackers love retail.

Lots of personal financial data.

Distributed systems with many vulnerabilities.

3X

Retailers suffer 3X more attacks than financial industry¹.

53% of all attacks resulted in financial damages of more than US\$500,000.¹

The average cost per lost or stolen record is **\$158**².

Cisco Security keeps hackers out, enables growth and gives you protection from the store to the cloud to the data center.

Cisco's Time to Detection (TTD) is **9 hours**. The industry average is **100 days**³.

Cisco delivers a comprehensive approach to security.

Talos, world-class, threat intelligence.

Protection from device, network, cloud, and data center.

Solutions that simplify deployment, management, scalability.

Accelerated security enables innovation.

Intercommunication is critical which is why Cisco security products talk to each other.

- Event Information improves visibility.
- Automation allows faster response.
- Threat Intelligence speed TTD.
- Contextual Awareness builds granular controls across network.

Cisco security protects the entire retail environment.

- Store
- Data Center
- Cloud
- Customers & Employees

A secure network is a Cisco Network.
