

Cisco Certified CyberOps Associate Certification and Training Program

Introducing the Cisco Certified CyberOps Associate certification program

As the sophistication, stealth, and frequency of cybersecurity threats continue to increase, the complexity of attacks means every organization needs security expertise before, during, and after an attack. For this reason, the demand for cybersecurity operations (CyberOps) personnel keeps going up.

The updated **Cisco Certified CyberOps Associate** certification program validates the day-to-day, tactical knowledge and skills that Security Operations Center (SOC) teams need to detect and respond to cybersecurity threats. The certification validates the fundamentals needed for associate-level job roles, with one exam and one training course to help you prepare. The exam and training cover knowledge and skills related to security concepts, security monitoring, host-based analysis, network intrusion analysis, and security policies and procedures.

From a recognized provider of security solutions and certifications, the CyberOps Associate certification and training program is your pathway to a career in cybersecurity operations. And the process couldn't be simpler: pass one exam and you are on your way.

Benefits

- **Launch your career in cybersecurity operations** with the Cisco® Certified CyberOps Associate certification
- **Master the essentials** to prevent, detect, and respond to cybersecurity threats and breaches
- **Rev up your resume** with training and certification on cybersecurity operations knowledge and skills
- **Boost your confidence** by gaining real-world knowledge
- **Tell the world what you've achieved** with a digital certification badge on your social media profiles

The exam is now live.

When you pass the current exam or if you already have an active Cisco CCNA CyberOps certification, you will receive the Cisco Certified CyberOps Associate certification and digital badge.

Earning your Cisco Certified CyberOps Associate certification

The updated Cisco CyberOps Associate training and certification program prepares you for an associate-level job role so you can prevent, detect, and defend against cybersecurity threats. The program can launch your career, by showing hiring managers you have the real-world knowledge and skills to be a valuable member of any SOC team.

To earn the CyberOps Associate certification, you pass one exam. The **200-201 Understanding Cisco Cybersecurity Operations Fundamentals (CBROPS)** exam, focuses on your knowledge of associate-level cyber operations including security concepts, security monitoring, host-based analysis, network intrusion analysis, and security policies and procedures.

The **Understanding Cisco Cybersecurity Operations Fundamentals (CBROPS)** course prepares you to pass the exam with practical skills you can apply to jobs in cybersecurity.

Cisco Certified CyberOps Associate certification can launch your career. Certify your CyberOps skills and show hiring managers that you have the real-world know-how to prevent, detect, and defend their networks against cybersecurity threats.
