

Cisco Meraki Solutions Specialist Certification

Certification in Meraki Technologies

Cisco Meraki is a complete networking solution for environments ranging from small office deployments to very large enterprises. Cisco Meraki products comprise WAN connectivity and security, application assurance, wired and wireless access, physical security, and Internet of Things (IOT), as well as endpoint management. While Meraki is designed to be remotely managed and monitored, as the complexity of deployments grow, organizations need people they can count on to run a smoothly operating, secure, and safe network.

The Cisco Meraki Solutions Specialist certification ensures that you have the proper skill set to adequately manage and grow the Meraki deployment as the needs of the network grow. As a Cisco Meraki Solutions Specialist, you will be highly valued in your organization, giving your team confidence in the resilience and capabilities of their Meraki technologies, and helping them realize the full return on their investment.

Benefits:

- **Increase your value** to your organization
- **Grow your confidence** in deploying and managing Cisco® Meraki™ technologies
- **Update your resume** with the only Cisco Meraki technical certification
- **Demonstrate your expertise** with Cisco Meraki solutions
- **Link your digital certification badge** to your social media profiles

Reduce risk and grow your competencies

The Cisco Meraki Solutions Specialist certification gives you—and hiring managers—confidence in your ability to deploy, manage, and grow a Meraki networking solution in an enterprise. You will have the real-world skills and knowledge to work with Meraki networks.

The Cisco Meraki Solutions Specialist Certification enables you to:

- Design, implement, and manage a Meraki solution
- Optimize a current deployment, ensuring that the full value is realized
- Work to grow or add capabilities as requirements on the network evolve with time

To earn your Cisco Meraki Solutions Specialist, you need to pass one 90-minute exam:

500-220 Engineering Cisco Meraki Solutions (ECMS). Download the [exam blueprint](#) today. If you can do the tasks listed on the blueprint successfully, you should be ready for the exam.

If you need to brush up on the technology, two Cisco courses are available to help you prepare for the exam:

- **Engineering Cisco Meraki Solutions Part 1 (ECMS1)** is a 1-day baseline course
- **Engineering Cisco Meraki Solutions Part 2 (ECMS2)** is a 3-day deep dive into Meraki solutions

Visit the [Cisco Learning Locator](#) to find course listings.
