

# Accelerating Hybrid Workspace Productivity

With Cisco and NVIDIA Innovation

## Adapt to IT and User Expectations in the Evolving Workplace

## Simplify the Complexity of Supporting Hybrid Workforces

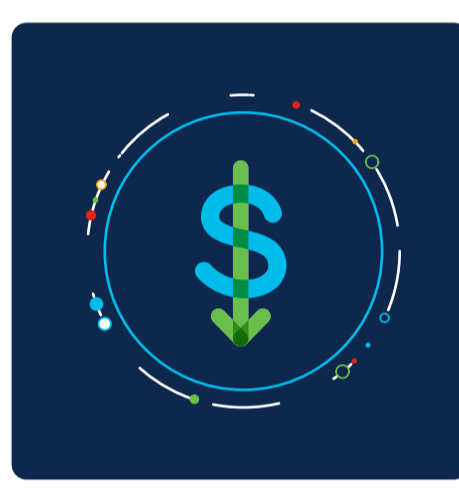

### Resiliency

Support an increasingly mobile and distributed workforce, anywhere on any device

### Scalability

Deploy new or updated systems and applications without business disruption

### Cost Savings

Efficiently centralize patches and upgrades while leveraging lower-cost endpoint devices

## Raise the Bar on Productivity and Experience for Flexible Employees

Businesses are turning to flexible hybrid workspace models to allow seamless transition between the office and home

Cisco and NVIDIA virtual desktop and workstation solutions transform workflows to liberate users and data from the confines of PCs, workstations, offices, and distributed locations

Teams will be able to seamlessly collaborate in real-time, regardless of member locations, using any device they choose to be productive

## Ensure High Performance with Enterprise-Grade Manageability

IT organizations must support a broad and diverse workforce today that includes flexible, hybrid offices, as well as mobile users

Cisco and NVIDIA virtual desktop and workstation solutions allow IT to centrally manage data and apps and extend the reach of VDI to the whole workforce

Centrally managing virtual workspaces will help IT boost security, performance, and user satisfaction while reducing support costs

## Protect Mission-Critical Assets and Intellectual Property

Businesses need to ensure their most valued technology assets are safe from theft or loss amidst growing cybersecurity threats and breaches

Cisco and NVIDIA virtual desktop and workstation solutions improve IT's ability to improve security by ensuring data and IP are centrally stored in the data center

Teams can securely collaborate without risk of breaches or damage causing costly or irreparable harm to their business

## Modern Hybrid Workspaces powered by Cisco and NVIDIA

Cisco HyperFlex and Cisco UCS® X-Series powered by Intersight™  
NVIDIA Virtual PC, NVIDIA vGPU, and NVIDIA RTX Virtual Workstation
