## Product Migration Options

There is no replacement available for the Third-Party Device Support for Cisco Prime Network 4.2 and Later at this time.

Future releases of Cisco Prime Network, starting with release 4.2, will no longer natively support third-party devices and their related services. If customers wish to manage third-party devices after transitioning to version 4.2, they will need to engage Cisco Advanced Services for support.

Service prices for Cisco products are subject to change after the product End-of-Sale date.

The Cisco Takeback and Recycle program helps businesses dispose properly of surplus products that have reached their end of useful life. The program is open to all business users of Cisco equipment and its associated brands and subsidiaries. For more information, go to:
