Cisco IP Camera Audio Analytics Client Application Suite

Product Overview

The Cisco IP Camera Audio Analytics Client Application Suite adds a powerful set of tools to Cisco Video Surveillance IP Cameras equipped with a microphone.

The Audio Analytics suite generates alerts based on a set of parameters configured to listen for. By adding audio alerts to the IP Camera, its video capabilities become a full-fledged sensor platform. Alerts can be used to generate alarms and trigger recording of video for later analysis by law enforcement or safety personnel.

Audio Applications

- **Aggression**
  - Detects the specific sound associated with pitch, tone, and intonation changes of someone becoming aggressive.
- **Car Alarm**
  - Detects typical car alarms.
- **Glass Break**
  - Detects four types of glass breakage: laminated, plate, tempered and wired.
- **Gunshot**
  - Detects a range of firearm discharges most commonly used in civilian gun crimes.

Product Support

Supported cameras may need an additional microphone. Check individual IP Camera data sheets for more information. The Audio Analytics Client Application is compatible from Firmware Version 2.0, and later. For more information, the Audio Analytics User Guide is available in the Cisco IP Camera Apps Reference Guide.

The Cisco IP Camera Audio Analytics Client Application supports the following Cisco Video Surveillance IP Cameras (listed by part number):

Table 1.   Compatible Cisco IP Cameras

Domes	
CIVS-IPC-3520	CIVS-IPC-3535

Cisco Services

Cisco and our certified partners can help you accelerate success and improve the return on your investment in a Cisco Physical Security solution. The Cisco lifecycle approach to services defines the requisite activities at each phase of the solution lifecycle:

- Reduce deployment costs by identifying the features that will best meet your business requirements.
- Accelerate migration by assessing the readiness of your network to support the system and by developing a sound design.
- Support smooth implementation through effective planning and expert installation, configuration, and integration.
- Increase operational efficiency and extend the value of your investment with award-winning technical support.
