Cisco UCS B200 Blade Server Ready2Ship Program – Customer Overview

Expedited shipping, choice of five pre-configurations

Post COVID-19, IT organizations are moving at hyper speed. You are building out an infrastructure to accommodate remote workers, adding cloud services, and tweaking business models and supply chains. You want to implement solutions quickly and need critical infrastructure to meet the demands of your business.

We hear you. The Cisco UCS B200 Ready2Ship Program is all about speed and simplicity. Cisco is ramping up to support **shipping within 3–5 business days* the most popular Cisco UCS blade server – the UCS B200 M5**. We are doing this in partnership with our authorized Build-To-Order (BTO) Distributor, Tech Data, and our partners.

BTO is a value-add process that leverages the technology, expertise and inventory of our highly qualified and trained BTO Distributor, Tech Data, who stocks the Cisco UCS B200 components, assembles the configurations, tests and, on behalf of the partner, ships directly to you, the customer. We're bringing our supply chain closer to you so you get what you need--when you need it.

* The phrase "within 3–5 business days" refers to business days (Monday through Friday, exclusive of holidays), US deals only, does not include delivery time, and begins on receipt of a final partner PO. It is also subject to parts in stock at time of the final PO.

Benefits

- **Reduced shipping time** – in days instead of weeks

- **Pre-validated** Cisco UCS® B200 M5 Blade Servers – in a choice of five popular configurations

- **Simple** to order – select, order, receive

- Need it faster? **Expedited delivery** options are available

How it works

It's simple. Select one of the five standard configurations below. Work with your partner to order. They will place the order with Tech Data who will configure your order and ship.

Five Ready2Ship standard configurations Cisco UCS B200 M5 Blade Server	
UCSB-B200M5-RSV1A	• Qty 1 B200 M5 Blade Server with Qty 2 Intel® 6252 • Qty 12 64GB Memory • Qty 1 1340 MLOM • Qty 1 M2 240GB (HW RAID)
UCSB-B200M5-RSV1B	• Qty 1 B200 M5 Blade Server with Qty 2 Intel 6226R • Qty 12 64GB Memory • Qty 1 1440 MLOM • Qty 1 M2 240GB (HW RAID)
UCSB-B200M5-RSV1C	• Qty 1 B200 M5 Blade Server with Qty 2 Intel 6248 • Qty 12 32GB Memory • Qty 1 1340 MLOM • Qty 1 M2 240GB (HW RAID)
UCSB-B200M5-RSV1D	• Qty 1 B200 M5 Blade Server with Qty 2 Intel 6254 • Qty 12 64GB Memory • Qty 1 1340 MLOM • Qty 1 M2 240GB (HW RAID)
UCSB-B200M5-RSV1E	• Qty 1 B200 M5 Blade Server with Qty 2 Intel 5218R • Qty 12 64GB Memory • Qty 1 1440 MLOM • Qty 1 M2 240GB (HW RAID)

The Ready2ship configurations come half-populated with memory, ensuring flexibility and allowing for future growth. With Cisco UCS B200 Ready2Ship, we're bringing the Cisco supply chain closer to you, our customers.
