

Cisco Catalyst 2960-L Series Switches

Compact switches for smaller businesses

Deliver better network experience to customers and employees while simplifying operations with Cisco® Catalyst® 2960-L and 2960-L Smart Managed switches. These are entry-level, fixed-configuration, Gigabit Ethernet switches that provide enterprise-class Layer 2 access for branch offices, conventional workspaces, and out-of-wiring-closet applications.

Cisco Catalyst 2960-L and 2960-L Smart Managed switches pack Power over Ethernet Plus (PoE+) and basic Layer 2 features into a slim and fanless body, bringing flexibility and reducing cables for places such as retail outlets, hotels, schools, and small offices that have confined space or out-of-wiring-closet requirements.

Offerings such as PoE provide data and power for Point-Of-Sale (POS) machines, phones, and video displays, as well as other devices. 802.1X authentication increases the security of wireless access points.

The Cisco Catalyst 2960-L fixed managed switches provide a richer feature set, with more advanced functions such as multicast, sFlow, and AutoQoS. The Cisco Catalyst 2960-L Smart Managed switches provide the same reliability and speed at a lower cost, with configuration and management via a simple, on-premises web-based interface.

Benefits

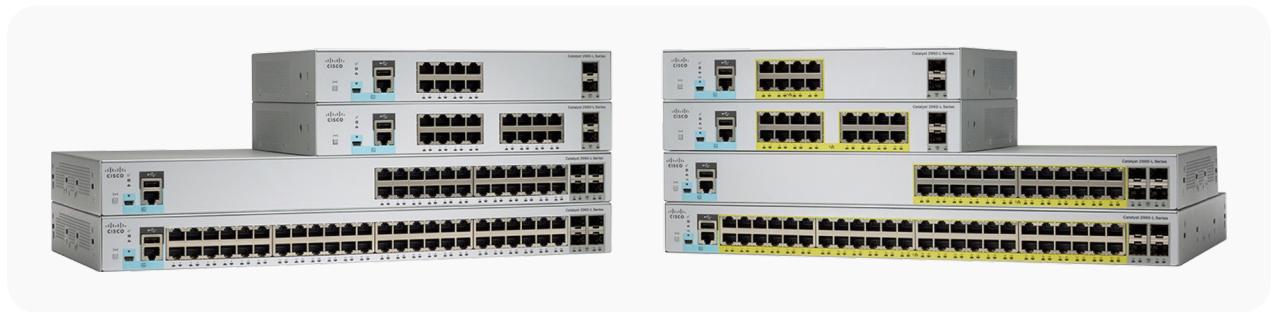

- **Increase flexibility** by extending your LAN beyond the wiring closet in a slim and noiseless body.
- **Improve experiences** by offering enterprise-class switching and Cisco Catalyst quality and support at a great value.
- **Reduce operating cost** by simplifying management over wire or air, and lowering energy consumption through Cisco EnergyWise® technology.

Cisco Services

Successfully manage, support, and troubleshoot Cisco Catalyst 2960-L Series Switches with Cisco Customer Experience services. Our team of experts can help you proactively manage your network, reduce costs, and minimize risk as you introduce new switches into the network. [Learn more.](#)

Next steps

Is the number of mobile users outgrowing your legacy Fast Ethernet network? Get the flexibility, simplicity, and quality you need with Cisco Catalyst 2960-L Series Switches. For additional information, visit <https://www.cisco.com/go/2960L>.

The Cisco Catalyst 2960-L Series switches include both fixed and smart managed options.
