

Cisco Education Discount Pricing for Expanding Digital Learning in your Community

Discounts for K-12, Higher Education, and Public Libraries on real-time collaboration solutions and advanced security

Now is the time

With the unprecedented availability of public funding, [including E-rate](#), now is the time to address your institution's strategic initiatives to enhance and expand digital learning in your community.

K-12, Higher Education, and Public Libraries can leverage Cisco Education Discount Pricing in combination with a variety of public funding sources to maximize purchasing power. Also take advantage of [Meraki Education Advantage pricing](#) for K-12 Schools and Libraries. Contact your [Cisco Meraki sales representative](#) for more details.

“Originally we planned to only provide wireless to our 1:1 schools. But with the affordable pricing of Meraki products, we were able to do the entire district.”

John Wilds, Network Manager
Alvin Independent School District (ISD), TX

We're here to help

Cisco experts in education and public funding can help you affordably deploy Cisco solutions for hybrid learning environments that enable secure and reliable technologies for real-time video collaboration, and security.

You can learn more about our affordable and trusted solutions for education at [Cisco Portfolio Explorer for Education](#). Plus, you can get help from our team of education experts at cisco.com/go/education and the [Cisco Public Funding Office](#).

The future of education

As learning needs continue to change, Cisco and our customers continue to reimagine education in real-time. The future of education is based on new learning models and solutions that are secure, simple to use, work together seamlessly, and are backed by world-class support.

That's where Cisco comes in

Since Cisco's founding on the campus of Stanford University in 1984, education has been in our blood. We work with tens of thousands of schools, colleges, and universities around the world to support education inside and outside the classroom. This includes networking and data center technologies that speed collaboration and provide greater data privacy.

We're also opening windows to a world of opportunity through [Skills for All](#), enhancing skills and knowledge for current and future tech workers. And it's available to anyone, anywhere— for free via courses and resources from Cisco's acclaimed [Cisco Networking Academy](#).
