Introduction

This document provides information about character issues with Tidal Server Provisioner (TSP).

Prerequisites

Components Used

The information in this document is based on the Tidal Server Provisioner 6.3 or later.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Issue

Tidal Enterprise Orchestrator (TEO) has issues when using TSP and non-English characters.

Solution

TSP does not support non-English characters. These cannot be used.
