## Introduction

This document describes how to join a Webex Meeting from a QR code on Android phones.

## Prerequisites

### Requirements

- Android phone with a camera.

### Components Used

The information in this document is based on Android version 11; Webex Meeting Version 44.2.0

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, ensure that you understand the potential impact of any command.

## Configure

1. Open camera and hold QR code image in front of camera.
2. Select the **yellow QR code** icon that appears.
3. A URL link appears at the bottom of the phone screen; Click the **URL**.
4. A web page with the Webex Meeting details opens.
5. Select **Download Webex Meetings** link. - If you already have Webex Meeting installed; skip to step 8.
6. You are then redirected to the Google Play Store Webex Meeting Application.
7. Select **Install**. Once the install complete, there are two options: Uninstall and Open.
8. Go back to the Webex Meeting web page and select **Join Meeting** link.
9. A Webex Meeting notification pops up. Select **Allow** and **Accept**.
10. A Join the Meeting window appears. Fill out your **name**, and **email address**.
11. Click **Join as Guest**.
12. You are now entered into the meeting.
