## Introduction

This document describes the installation steps for CVVB.

Contributed by Kabeer Noorudeen, Cisco TAC Engineer.

## Prerequisites

### Requirements

There are no specific requirements for this document.

### Components Used

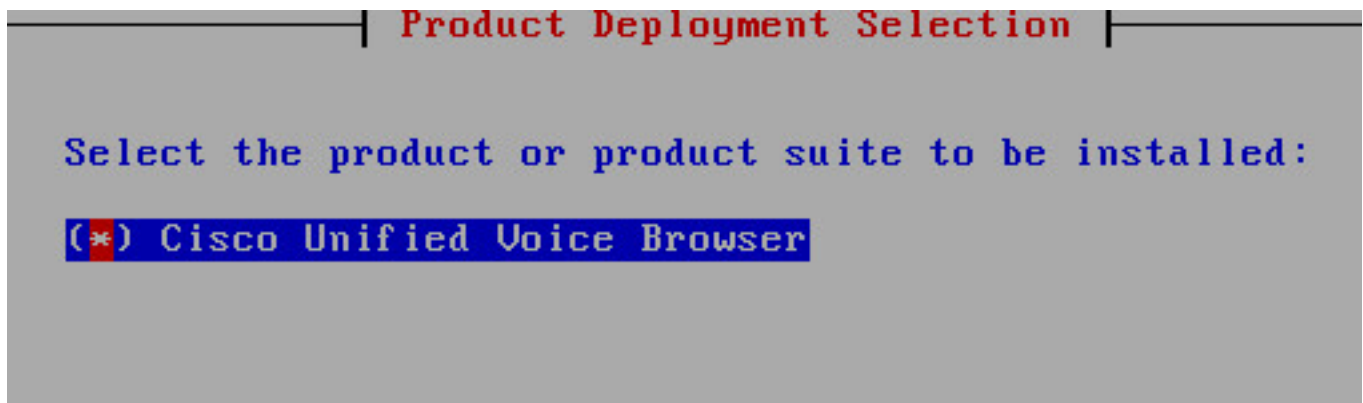

The information in this document is based on CVVB 11.0 Hosted environment.

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

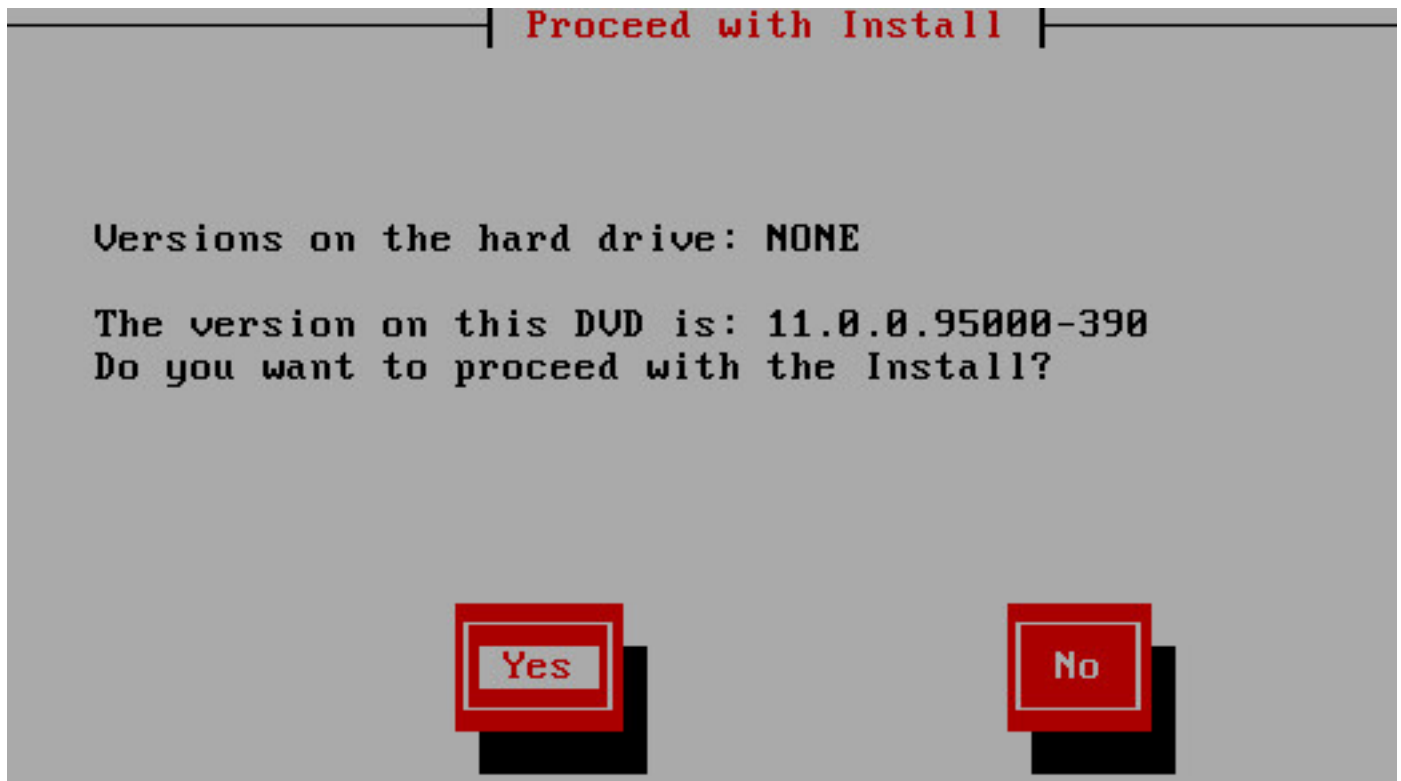

## Installation

These are the steps to install CVVB:

Step 1. Boot from the bootable CD for the CVVB. Select the product to be installed.

Step 2. Confirm for the installation of the CVVB.

Step 3. Choose **Proceed** for the platform installation wizard.

Step 4. Choose the right option for patch install, in this example you do not have a patch installation.

## Apply Patch

Would you like to apply an upgrade patch as part of this installation?

This option will install the software from the DVD and then prompt you for the location of the additional patch to apply after the system reboots.

Yes

No

Back

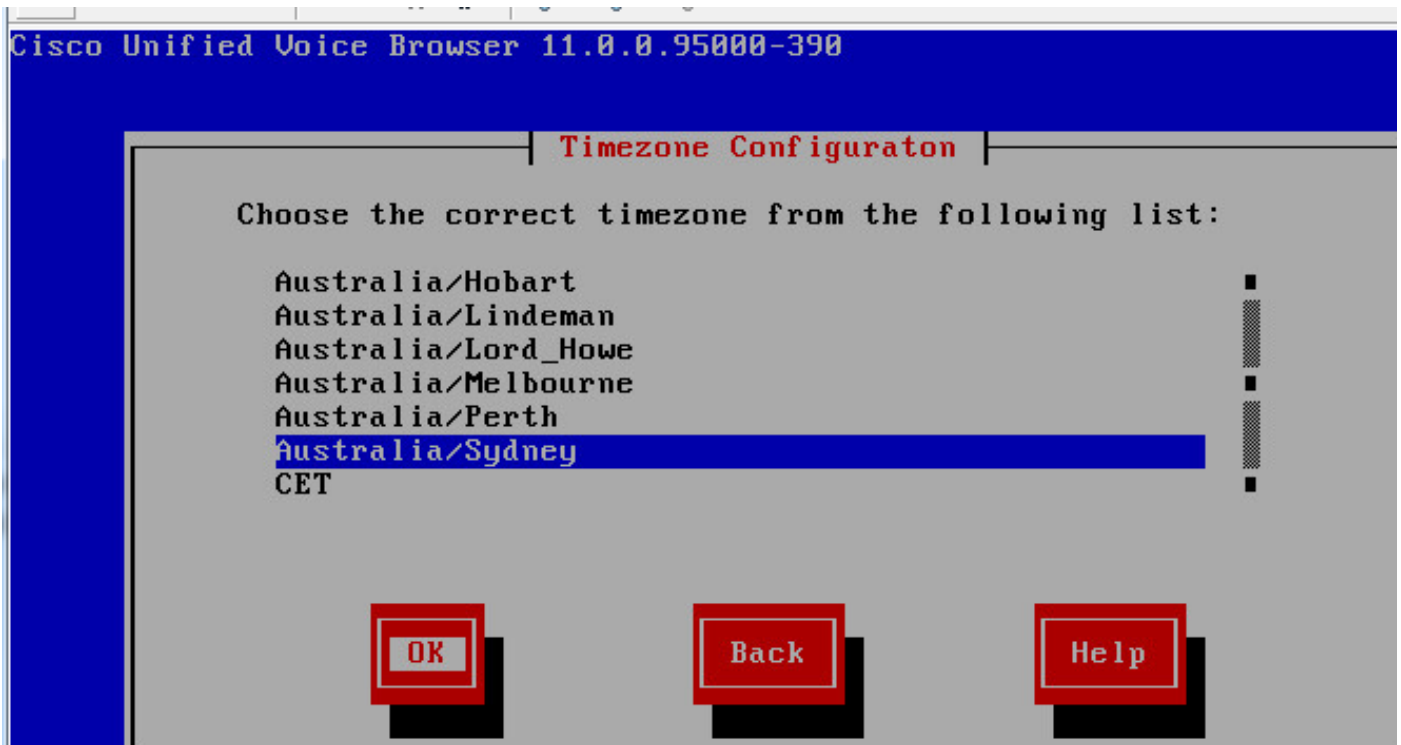

Step 5. Click on **Continue** to continue the installation.

## Basic Install

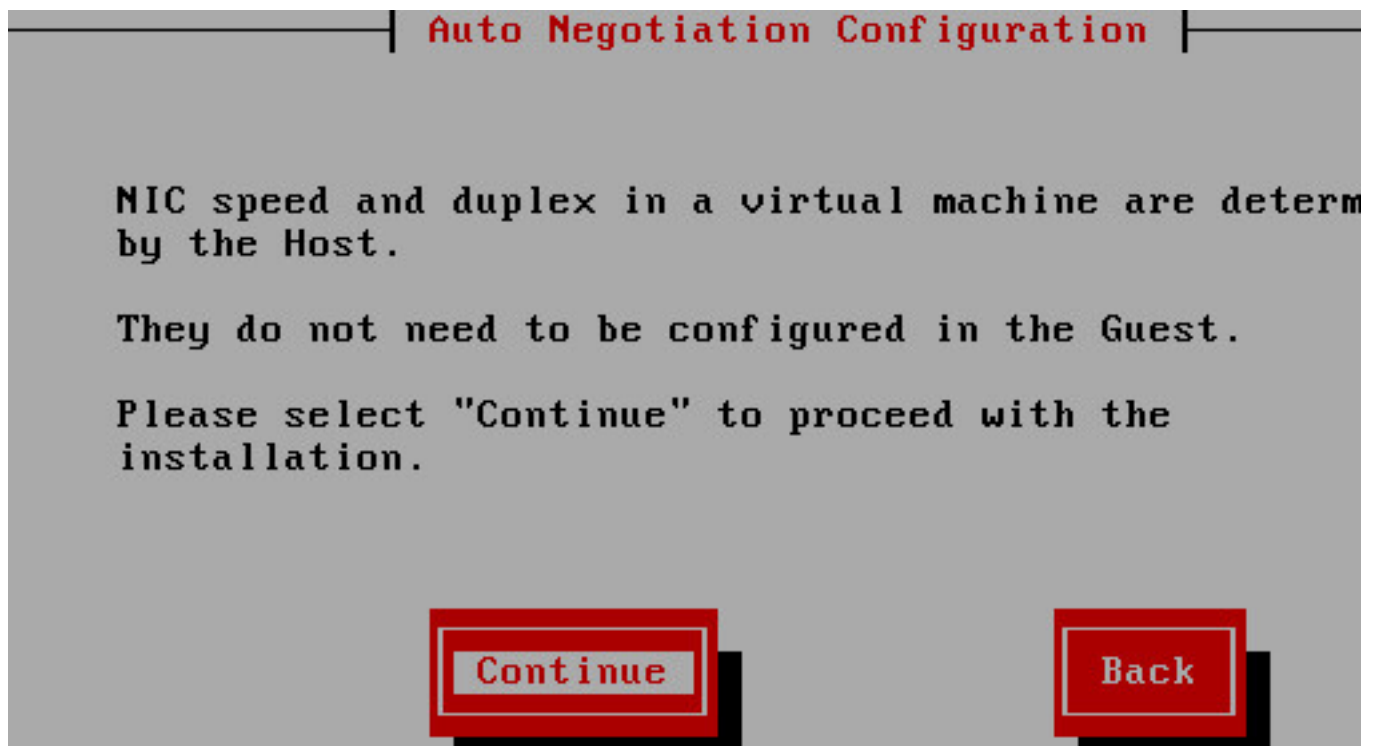

This is the "Basic" installation option. This option installs the software version from the DVD and does not use any imported data. It asks for configuration information and then completes the install.

Continue

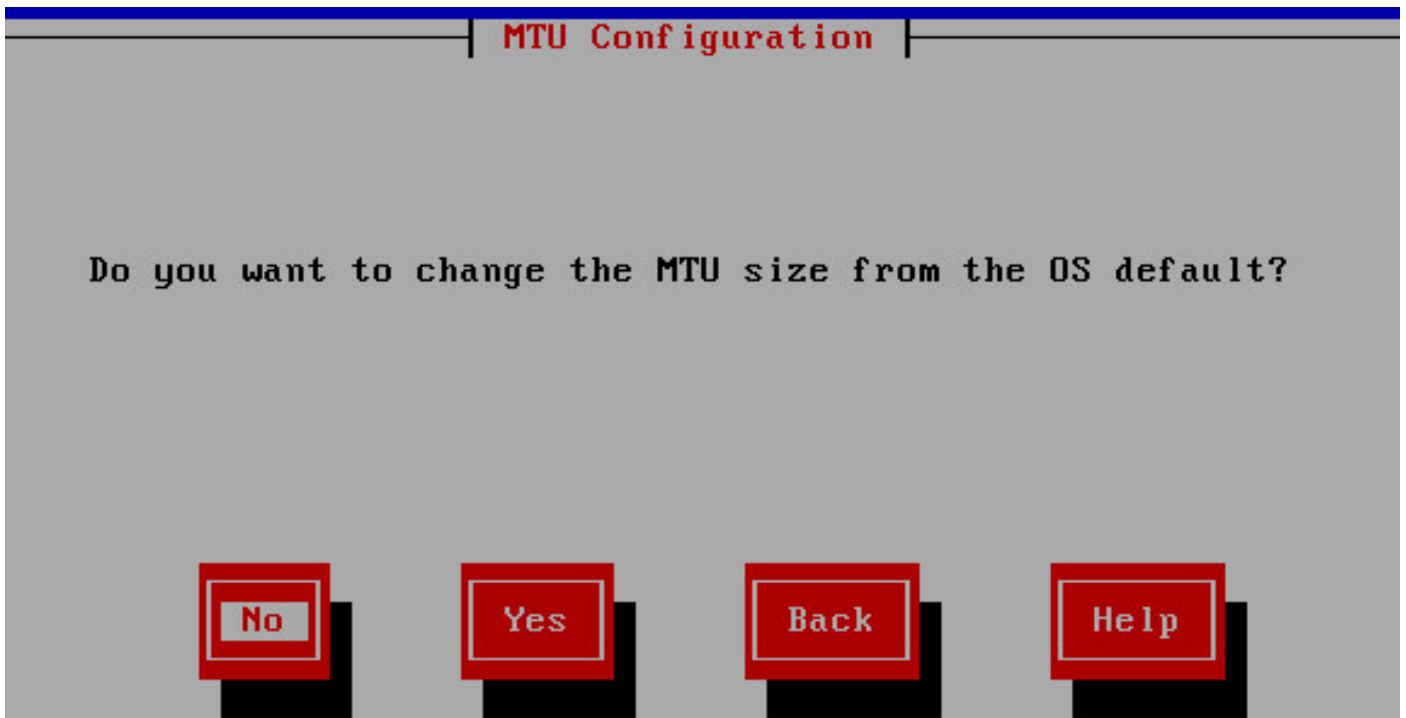

Step 6. Choose the time zone for installation.

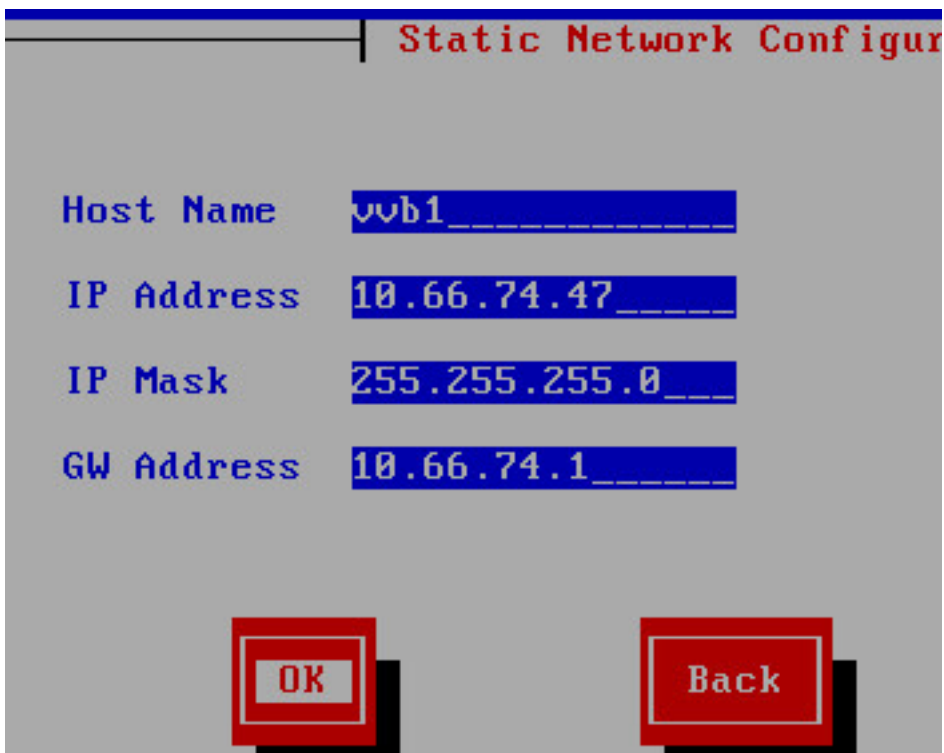

Step 7. Continue with the installation for auto negotiation configuration.

Step 8. Keep the default MTU size.

Step 9. Enter the server details.

Step 10. Enter the DNS details of the server.

**DNS Client Configuration**

Primary DNS

Secondary DNS (optional)

Domain

Step 11. Enter the user credentials.

**Administrator Login Configuration**

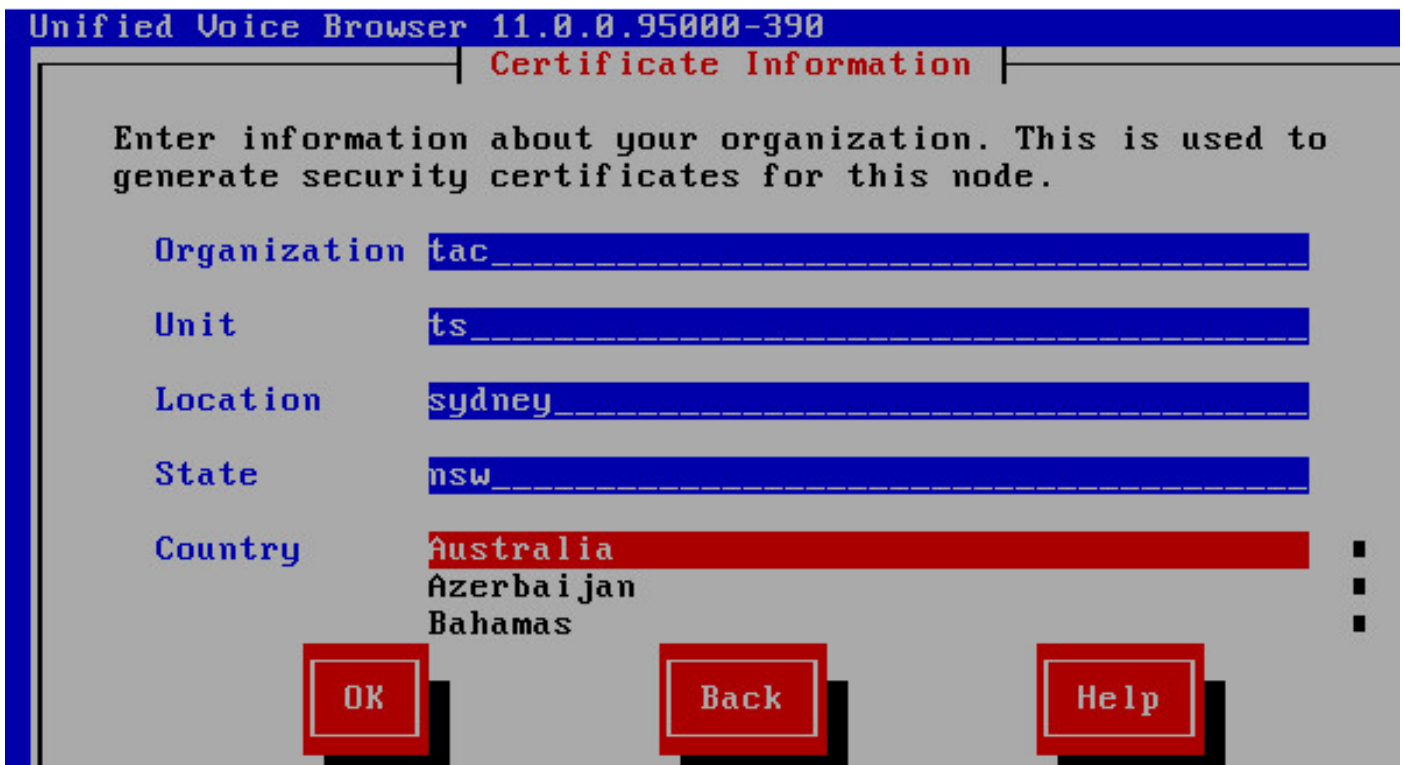

Enter the Platform administration username and password  
Choose Help for username and password guidelines.

Administrator ID

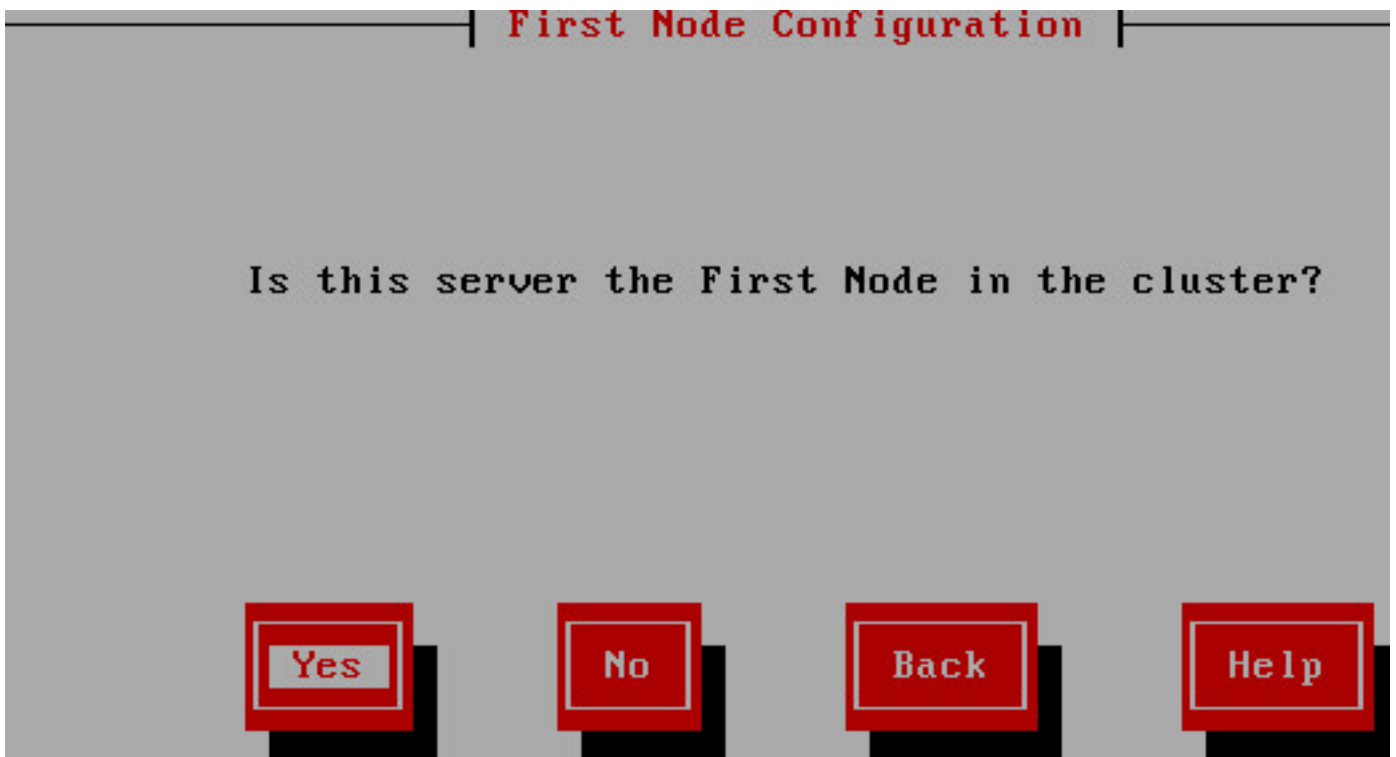

Password

Confirm Password

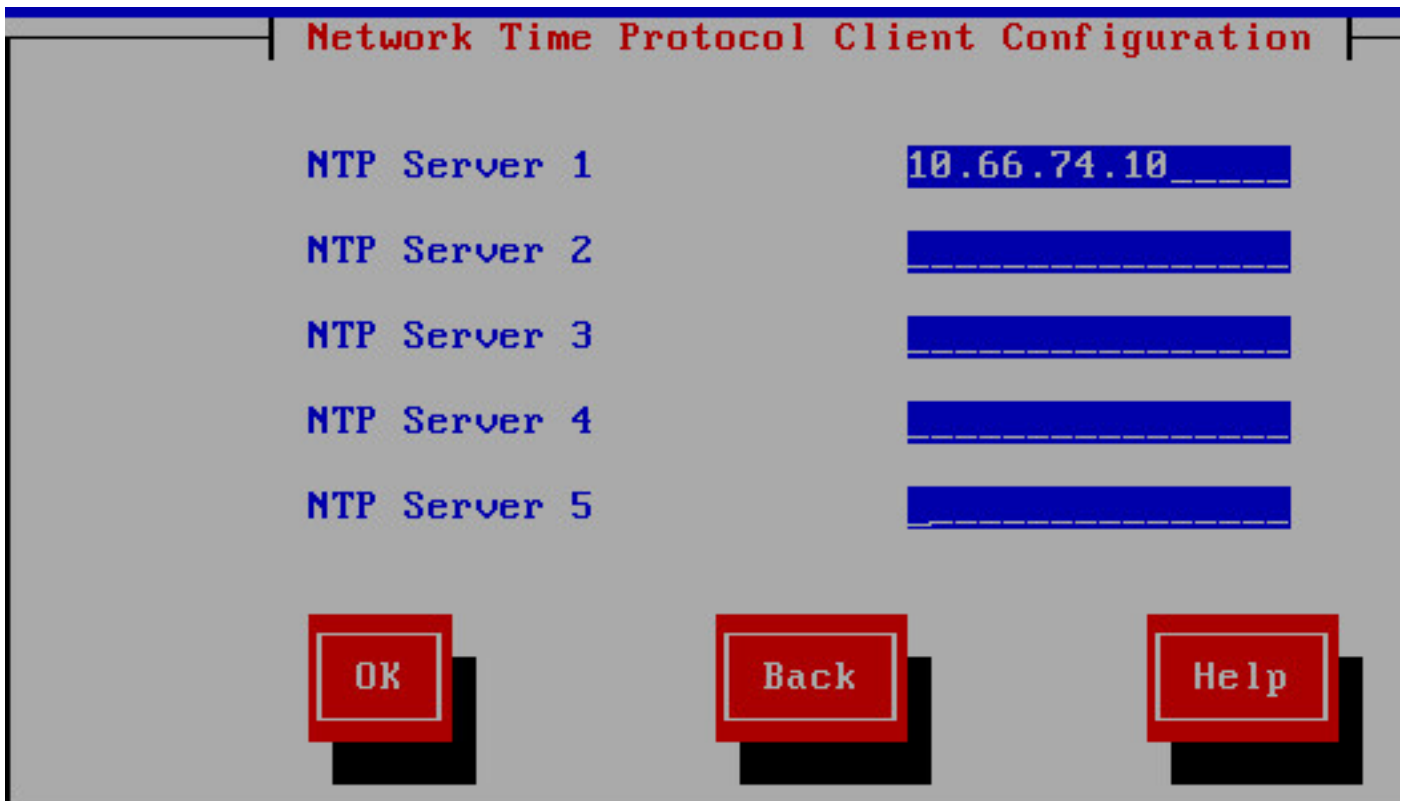

Step 12. Enter the **Organization** details.

Step 13. Select it as the first node.

Step 14. Capture the correct NTP address.

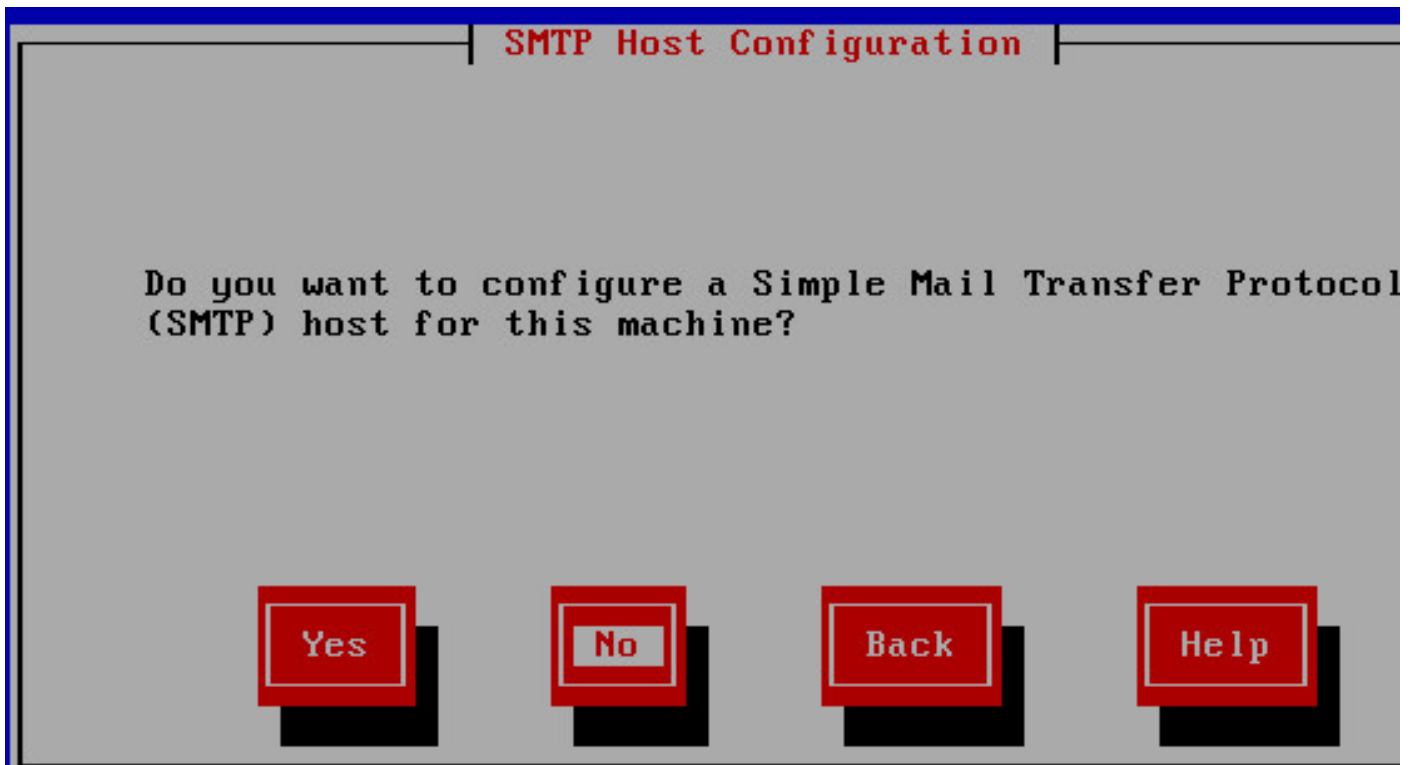

Step 15. Provide the security password that would be used for clustering.

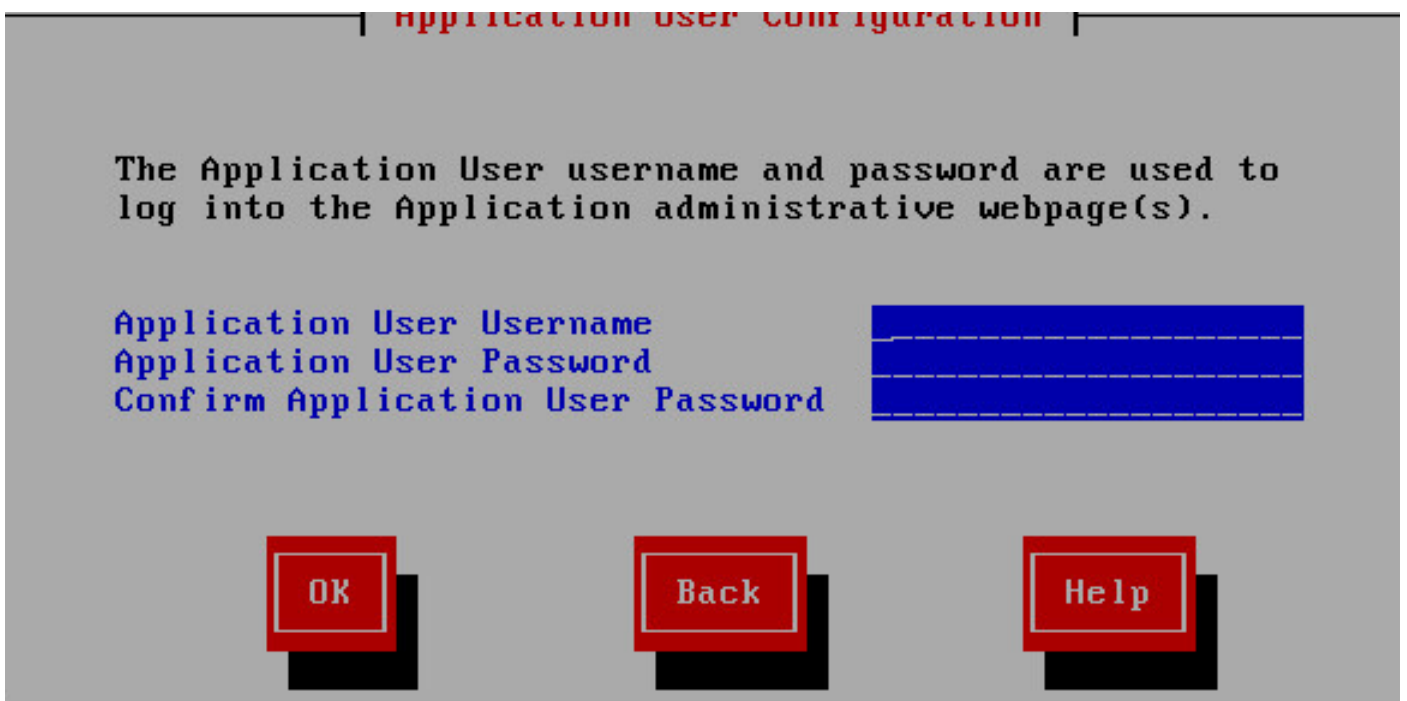

Step 16. Select **No** if you do not need an SMTP host.

Step 17. Enter the application User Credentials.

Step 18. Complete the installation steps.

## Platform Configuration Confirmation

The Platform Configuration is complete.

Select OK to continue or Back to change the configuration.

Warning: Once you select OK, you will no longer be able to modify the Platform Configuration.

OK

Back

Cancel

Step 19. Once the installation is completed, open the CVVB app-admin page <https://<CVVB>/appadmin>

## License Information

Next

The system default IVR Language is "en\_US". This can be m

Step 24. Once the configuration is completed successfully, the CVVB restarts.

## Cisco VVB Setup Result Information

Cisco VVB Setup Status.	Cisco VVB Setup completed.
Cisco Unified SIP Configuration Status.	Cisco Unified SIP Configuration is done.
License Upload Status.	License Upload is done.
Publisher Activation Status.	Publisher Activation is done.
Cisco VVB Historical Datastore	Publisher is Activated
Cisco VVB Repository Datastore	Publisher is Activated
System Parameters update Status.	System Parameter Configuration is done.
Language update Status.	Language Configuration is done.
User configuration Status.	User Configuration is done.
Setup completed. The Cisco VVB Engine is restarting.	

Please close your web browser now!

Step 25. The CVVB is available for configuration.
