How do I renew the licenses on an ASA CSC Security Services Module?
Related Information

Introduction

This document describes how to renew licenses on a Cisco ASA Content Security and Control (CSC) Security Services Module.

Refer to Cisco Technical Tips Conventions for information on document conventions.

Q. How do I renew the licenses on an ASA CSC Security Services Module?

A. Complete these steps in order to renew licenses on an ASA CSC Security Services Module:

1. Determine appropriate SKU.

   In order to renew licenses on an ASA CSC Security Services Module, you must first determine the appropriate SKU for your licenses. Consider this example CSC module JAB101900KH licensing screen:

Base License   View detailed license online

Product:	Base license for InterScan for CSC SSM	
Version:	Standard	
Activation code:	PX-EL4Y-E5HJ6-36QRM-N4N6W-TH6S3-3TF5Q	Enter a new code
Seats:	000500	
Status:	Activated	
Expiration date:	08/30/2012	

Check Status Online

Last Status Check:10/26/2011

Plus License   View detailed license online

Product:	Plus license for InterScan for CSC SSM	
Version:	Standard	
Activation code:	PX-N6TY-RBYHZ-ERD8V-4D8SQ-3ELPQ-VYBBB	Enter a new code
Status:	Activated	
Expiration date:	08/30/2012	

Check Status Online

Last Status Check:10/26/2011

This example shows a BASE license and a PLUS license on a CSC−10 module with 500 users. In order to choose the appropriate renewal, you must match the seat count and the module type, and decide which license or licenses to renew (BASE or PLUS or both).

Use these SKUs as examples: *L−ASACSC10−500UP1Y* or *ASA−CSC10−500UP−1Y*

This table lists the elements of the SKU that determine the characteristics of the renewal.

SKU Element	Description
10	Identifies CSC module CSC−SSM−10.
500	Identifies seat count of the module.
U	Renew the BASE license only.
P	Renews the PLUS license only.
1Y	Extends the license for 1 year from current expiration.

Note: The SKU can include a U, or a P, or both. If the SKU shows only a U, it renews the BASE license only. If it shows only a P, it renews the PLUS license only.

Refer to the *Cisco ASA 5500 Series Content Security Renewals* section of Electronic License Delivery (ELD) SKUs for a list of available renewal SKUs.

2. Once you determine the appropriate SKU, purchase the SKU from a reseller or your account team. Once you purchase one of the renewal SKUs, you receive a unique PAK number.

3. Once you receive the PAK number, enter it on the Cisco Product License Registration (registered customers only) web page.
4. Within the Cisco Product License Registration (registered customers only) web page, follow the onscreen instructions, and provide the CSC serial number when prompted.
5. When the process is complete, open the module interface, and click **Check Status Online** for the licenses.
