# How can I block Google Images searches with SafeSearch turned off?

## Contents

## Question

How can I block Google Images searches with SafeSearch turned off?

## Environment

Cisco Web Security Appliance (WSA), all versions of AsyncOS

## Solution

With Safe Search option disabled on WSA, in order to block Google images on Google, you need to create a new custom URL category using the following regular expression:

www.google.*/imghp\?hl=
google.*/.*&tbm=isch

Afterwards please make sure that all requests to Google are decrypted by the appliance.
