Connect a Wireless Adapter to a Cisco Small Business VoIP Router

Contents

Introduction

This article is one in a series to assist in the setup, troubleshooting, and maintenance of Cisco Small Business products.

Q. How do I connect a wireless adapter to a Cisco Small Business VoIP router? A.

This article assumes that your wireless adapter is already properly installed and/or enabled on the computer. Before you try to connect your wireless adapter to a Cisco Small Business wireless router, know the following: SSID, Wireless Security and/or Network Key. If you do not have these settings, click here.

Configure your Wireless Adapter to Connect to a Cisco Small Business Wireless Router

Note: These steps are for Windows XP with Service Pack 2.

Step 1:
Right-click the **Wireless Network Connection** icon at the bottom-right of the screen, and select **View Available Wireless Networks**.

Step 2:
Select your wireless network's name or SSID, and click **Connect**.

If **WEP** is enabled on the router:

If **WPA** is enabled on the router:

Step 3:

Click .
