Check the Wireless Settings on a Cisco Small Business VoIP Router

Contents

Introduction

This article is one in a series to assist in the setup, troubleshooting, and maintenance of Cisco Small Business products.

Q. How do I get the wireless settings on my network?

A.

The wireless settings that you need to note are:

> a.) SSID
> b.) SSID Broadcast
> c.) Wireless Security

In order to check the wireless settings on the Cisco Small Business router, complete these steps:

Checking the Wireless Settings on the Cisco Small Business Router

> **Step 1:**
> Access the router's web-based setup page. For instructions, click here.
>
> **Step 2:**
> When the router's web-based setup page appears, click **Wireless**.
>
> **Step 3:**
> Look for **Wireless Network Name (SSID)**. If it is still set to "linksys", change it to something unique and note if Wireless SSID Broadcast is set to **Enable** or **Disable**.
>
> **Step 4:**
> Click **Wireless Security**, and note the current **Security Mode**.
>
> If Security Mode is set to **WEP**:
>
> If Security Mode is set to **WPA**:
>
> **Step 5:**
>
> Click .
