

Caveats

This chapter describes open severity 1 and 2 caveats and select severity 3 caveats.

The *Open Caveats* section lists open caveats that apply to the current release and may apply to previous releases. A caveat that is open for a prior release and is still unresolved applies to all future releases until it is resolved.

The bug IDs are sorted alphanumerically.

The *Caveats* section includes the bug ID and a short description of the bug. For details on the symptoms, conditions, and workaround for a specific caveat you must use the Bug Search Tool.

Cisco Bug Search

Use the [Cisco Bug Search Tool](#) to access open and resolved bugs for a release.

The tool allows you to search for a specific bug ID, or for all bugs specific to a product and a release.

Save Search Load Saved Search Clear Search Email Current Search

Search For:

Examples: CSCId10124, router crash, etc...

Product: Series/Model

Releases: Affecting or Fixed in these Release

If you have a specific bug ID, enter it here

Start typing product name to view suggestions or expand list to choose your product

Enter release number

368025

You can filter the search results by last modified date, bug status (open, resolved), severity, rating, and support cases.
