- [Determining the Software Version for Cisco cnBR 20.3, on page 1](#)

## Determining the Software Version for Cisco cnBR 20.3

From Cisco cnBR 20.3 onwards, you can choose to view the versions in Operations Hub.

On the Operations Hub, click **Configurator** > **cnBR Cluster Manager** > **cnBR Clusters**.

On the Cisco cnBR clusters that are listed, click the **i** icon next to the cluster name. Information regarding the cnBR cluster component and the version are displayed.

| Status | Name            | Namespace | Host Name | Username | Operation |
|--------|-----------------|-----------|-----------|----------|-----------|
| ✓      | csi-sj-ccmts4 ⓘ |           |           | admin ✓  | 🗑️        |
| ✓      | cnbr3 ⓘ         |           |           | admin ✓  | 🗑️        |

  

| Version: 20.3   |  |
|-----------------|--|
| COMPONENT       | VERSION                                |
| cloud-infra-app | 0.1.0-stable-0106-201015122047-9ab0301 |
| cmnts-app       | 0.1.0-stable-00017-20201017.131651     |
