## What's New

### **WBS29.13**

#### **In-meeting audio prompts**

English language audio prompts have been updated to improve consistency of prompt tone and voice quality.

## Features

### **WebEx Audio (hybrid audio)**

WebEx Audio (hybrid audio) provides flexibility for the attendees to join an audio conference using their computer (VoIP) or a phone. There are no meeting-level options to enable or disable this feature; it is available at all times that the WebEx audio is available within a WebEx meeting. Features such as muting and un-muting, icons, and active-talker notification operate identically for attendees. Attendees may transition at any time from using their computer to phone or vice a versa. Attendee status and the mode that they are using to connect to the conference can be seen in the Participant list.

WebEx Audio (hybrid audio) is supported on the following services and platforms:

Support for WebEx Audio (Hybrid Audio)	Windows	Macintosh	Linux/Solaris
Solaris Meeting Center	Yes	Yes	Yes
Training Center	Yes	Yes	Yes
Event Center	No	No	No
Support Center	No	No	No

## Frequently Asked Questions

### Q. What's the capacity for WebEx Audio?

A. WebEx Audio capacity is 1000 attendees for all supported WebEx services with 500 attendees on telephony and 500 on WebEx integrated VoIP.

### Q. Are there any calling restrictions from certain locations?

A. Yes, this document outlines those restrictions: [http://www.webex.com/pdf/tollfree\\_restrictions.pdf](http://www.webex.com/pdf/tollfree_restrictions.pdf)

### Q. Does WebEx Audio support a mixed-mode or hybrid audio conference with VoIP attendees?

A. Yes, WebEx Audio supports a hybrid audio in selected services. (Refer to the table above.)

### Q. What are the known issues and limitations for CMR Hybrid (WebEx-enabled TelePresence) and CMR Cloud meetings that use telephony service provider (TSP) audio?

A. For some telephony service provider (TSP) audio accounts, if a host with a TSP account schedules two adjacent CMR Hybrid or CMR Cloud meetings, with the second one scheduled to start immediately after the first one ends, and if the TelePresence scheduling system automatically extends the first meeting past the scheduled end, the second meeting will end automatically because the same TSP audio account and host access code cannot be used for both meetings at the same time.

To work around this problem, hosts can set up two different TSP audio accounts with different host access codes, and use one account for the first meeting and the other account for the second meeting. Another option is for the administrator to turn off the option for the TelePresence systems to automatically extend the meeting.

## Audio Options

### Note

For information about audio options supported for each operating system, see [Cross-platform Features and Known Issues](#).

		Available In			
Feature	Description	Meeting Center	Event Center	Support Center	Training Center
WebEx Teleconference	<p>This audio option is integrated into your WebEx online session. Choose from these options:</p> <ul style="list-style-type: none"> <li>• Call in: WebEx provides a toll or toll-free phone number to call when joining a session (global numbers are also available).</li> <li>• Call back: When you join a session, enter your phone number and WebEx calls you.</li> </ul>	Yes	Yes	No	Yes
Audio broadcast	One-way audio, for meetings where attendees only listen. A host speaks by using a microphone connected to their computer.	No	Yes	No	No

		Available In
