# New and Changed Information

This chapter contains the following sections:

## New and Changed Information

The following table provides an overview of the significant changes up to the current release. The table does not provide an exhaustive list of all changes or of the new features up to this release.

*Table 1: New Features and Changed Behavior in the Cisco Network Insights for Resources application for Release 2.1.x*

| Feature | Description | Release |
|---|---|---|
| Endpoint Analytics (Beta) | The Endpoint Analytics provides detailed analytics of endpoints learnt in the fabric. The anomalies detected as part of endpoint analytics include duplicate IP address, rapid endpoint moves across nodes, interface, and endpoint groups, and endpoints that do not get learnt back after a reboot.<br><br>The Early Access Mode in the Network Insights Setup page lets the user enable beta Network Insights features and enhancements. Once the beta features are enabled they can not be disabled. | 2.1.2 |
| Anomaly Details enhancement | Support for Diagnostics, Recommendation, and Impact for Interface Anomalies. | 2.1.2 |
| UI enhancements | The UI enhancements in this release include cross launch navigation, the addition of top nodes in the dashboard, a fabric overview, and viewing of node details. | 2.1.2 |
| PC/vPC interface types | Support for PC/vPC interface types in the Interface Statistics tab. | 2.1.2 |

| Feature | Description | Release |
|---|---|---|
| BGP Statistics Telemetry | Support for BGP operational and statistical data in the Protocol Statistics tab. | 2.1.2 |
| Flow Telemetry enhancements | Support for Cisco Nexus FX, FX2, and EX switches. | 2.1.2 |
