SYS-3-INTPRINT	3-Error	Illegal printing attempt from interrupt level.	An internal software error occurred.	Determine the component from the stack trace and process name displayed in the error message. Use Topic to search for a similar DDTS. If you find none write a DDTS for this problem. If the stack trace indicates that the buffer code was called from an interrupt handler use the interrupt handler to determine the DDTS component. Otherwise use the process name to determine the DDTS component.	"Copy the error message exactly as it appears and report it to your technical support representative."
SYS-3-INTUNWEDGE	3-Error	%llu packets were forcefully unwedged %llu packets were forcefully deallocated	This is an auxiliary message to indicate that packet buffers were forcefully deallocated/unaccounted from interfaces through CLI.	Include this error message in any other DDTS that was written for any other problems reported on this router after leak debugging was configured.
