

## OSPFv3 Demand Circuit Ignore

---

This feature enables you to prevent an interface from accepting demand-circuit requests from other devices by specifying the ignore keyword in the **ipv6 ospf demand-circuit** command.

## Finding Feature Information

Your software release may not support all the features documented in this module. For the latest caveats and feature information, see [Bug Search Tool](#) and the release notes for your platform and software release. To find information about the features documented in this module, and to see a list of the releases in which each feature is supported, see the feature information table.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.

## Information About OSPFv3 Demand Circuit Ignore

### Demand Circuit Ignore Support

Demand Circuit Ignore Support enables you to prevent an interface from accepting demand-circuit requests from other devices by specifying the ignore keyword in the **ipv6 ospf demand-circuit** command. Demand circuit ignore instructs the router not to accept Demand Circuit (DC) negotiation and is a useful configuration option on the point-to-multipoint interface of the Hub router.

# How to Configure OSPFv3 Demand Circuit Ignore

## Configuring Demand Circuit Ignore Support for OSPFv3

### SUMMARY STEPS

1. **enable**
2. **configure terminal**
3. **interface** *type number*
4. Enter one of the following commands:
  - **ipv6 ospf demand-circuit ignore**
  - **ospfv3 demand-circuit ignore**
5. **end**
6. **show ospfv3** *process-id* [*area-id*] [*address-family*] [**vrf** {*vrf-name* [\*]}] **interface** [*type number*] [**brief**]

### DETAILED STEPS

	Command or Action	Purpose
<b>Step 1</b>	<b>enable</b>  <b>Example:</b> Device> enable	Enables privileged EXEC mode. <ul style="list-style-type: none"> <li>• Enter your password if prompted.</li> </ul>
<b>Step 2</b>	<b>configure terminal</b>  <b>Example:</b> Device# configure terminal	Enters global configuration mode.
<b>Step 3</b>	<b>interface</b> <i>type number</i>  <b>Example:</b> Device(config)# interface GigabitEthernet 0/1/0	Configures an interface type and number and enters interface configuration mode.
<b>Step 4</b>	Enter one of the following commands: <ul style="list-style-type: none"> <li>• <b>ipv6 ospf demand-circuit ignore</b></li> <li>• <b>ospfv3 demand-circuit ignore</b></li> </ul>	Prevents an interface from accepting demand-circuit requests from other devices.

	Command or Action	Purpose
	<p><b>Example:</b></p> <pre>Device(config-if)# ipv6 ospf demand-circuit ignore</pre> <p><b>Example:</b></p> <pre>Device(config-if)# ospfv3 demand-circuit ignore</pre>	
<b>Step 5</b>	<p><b>end</b></p> <p><b>Example:</b></p> <pre>Device(config-if)# end</pre>	Returns to privileged EXEC mode.
<b>Step 6</b>	<p><b>show ospfv3</b> <i>process-id</i> [<i>area-id</i>] [<i>address-family</i>] [<b>vrf</b> {<i>vrf-name</i>  *}] <b>interface</b> [<i>type number</i>] [<b>brief</b>]</p> <p><b>Example:</b></p> <pre>Device# show ospfv3 interface GigabitEthernet 0/1/0</pre>	(Optional) Displays OSPFv3-related interface information.

## Configuration Examples for OSPFv3 Demand Circuit Ignore

### Example: Demand Circuit Ignore Support for OSPFv3

The following example shows how to configure demand circuit ignore support for OSPFv3:

```
interface Serial0/0
 ip address 6.1.1.1 255.255.255.0
 ipv6 enable
 ospfv3 network point-to-multipoint
 ospfv3 demand-circuit ignore
 ospfv3 1 ipv6 area 0
```

## Feature Information for OSPFv3 Demand Circuit Ignore

The following table provides release information about the feature or features described in this module. This table lists only the software release that introduced support for a given feature in a given software release train. Unless noted otherwise, subsequent releases of that software release train also support that feature.

Use Cisco Feature Navigator to find information about platform support and Cisco software image support. To access Cisco Feature Navigator, go to [www.cisco.com/go/cfn](http://www.cisco.com/go/cfn). An account on Cisco.com is not required.

**Table 1: Feature Information for OSPFv3 Demand Circuit Ignore**

Feature Name	Releases	Feature Information
OSPFv3 Demand Circuit Ignore	Cisco IOS XE Release 3.8	<p>The OSPFv3 Demand Circuit Ignore feature enables you to prevent an interface from accepting demand-circuit requests from other devices by specifying the ignore keyword in the <b>ipv6 ospf demand-circuit</b> command.</p> <p>The following commands were introduced or modified:</p> <ul style="list-style-type: none"> <li>• <b>ipv6 ospf demand-circuit</b></li> <li>• <b>ospfv3 demand-circuit</b></li> </ul>
