

DHCP Features in Cisco IOS Release 12.2(28)SB

Many Dynamic Host Configuration Protocol (DHCP) features are now integrated into Cisco IOS Release 12.2(28)SB. See the “[DHCP Features Roadmap](#)” for information about which release trains support DHCP features.

Configuration Information

Configuration information is included in the *Cisco IOS IP Addressing Services Configuration Guide*, Release 12.4T, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tgc/tiad_c/dhcp/index.htm

Command Reference Information

Command reference information is included in the “[DHCP Commands](#)” chapter of the *Cisco IOS IP Addressing Services Command Reference*, Release 12.4T, at the following URL:

- http://www.cisco.com/univercd/cc/td/doc/product/software/ios124/124tcr/tiad_r/index.htm

See the command history table on each command reference page to determine if a command is supported on Cisco IOS Release 12.2(28)SB.
