

ISG: Policy Control: RADIUS Proxy Enhancement

The ISG RADIUS proxy feature enables ISG to serve as a proxy between a client device that uses RADIUS authentication and a AAA server. ISG RADIUS proxy functionality enables ISG to “sniff” (look at) the RADIUS packet flows and, upon successful authentication, transparently create a corresponding ISG session.

Configuration Information

Configuration information is included in the “Configuring ISG as a RADIUS Proxy” module of the *Cisco IOS Intelligent Services Gateway Configuration Guide*, at the following URL:

http://www.cisco.com/en/US/docs/ios/isg/configuration/guide/isg_radius_proxy.html

Command Reference Information

Command reference information is included in the *Cisco IOS Intelligent Services Gateway Command Reference*, at the following URL:

http://www.cisco.com/en/US/docs/ios/isg/command/reference/isg_book.html

New or Modified Commands

The following commands are new or modified for this feature:

- **aaa authorization radius-proxy**
- **aaa server radius proxy**
- **accounting method-list**
- **accounting port**
- **authentication port**
- **clear radius-proxy client**
- **clear radius-proxy session**
- **client** (ISG RADIUS proxy)
- **debug radius-proxy**
- **key** (ISG RADIUS proxy)
- **message-authenticator ignore**
- **proxy** (RADIUS proxy)
