

Traffic Monitoring Commands

This module describes the Cisco IOS XR Software commands to monitor traffic on the router.

For detailed information about monitoring traffic concepts, configuration tasks, and examples, see the *Traffic Monitoring* chapter in the *System Monitoring Configuration Guide for Cisco NCS 5500 Series Routers*.

- [show drops all](#), on page 2

show drops all

show drops all

To display the exact packet drop location in a node, use the **show drops all** command in the XR EXEC mode.

```
show drops all { commands location | location | ongoing location } { node-id | all }
```

Syntax Description	commands Displays commands executed. location Specifies location of line card or route processor. ongoing Shows drops occurring since last executed.					
Command Default	None					
Command Modes	XR EXEC mode					
Command History	<table border="1"> <thead> <tr> <th>Release</th><th>Modification</th></tr> </thead> <tbody> <tr> <td>Release 7.3.5</td><td>This command was introduced.</td></tr> </tbody> </table>		Release	Modification	Release 7.3.5	This command was introduced.
Release	Modification					
Release 7.3.5	This command was introduced.					
Usage Guidelines	No specific guidelines impact the use of this command.					
Task ID	Task ID	Operations				
	interface	read				
	cisco-support	read				

The **show drops all location all** command displays packet drops for all nodes on all locations.

The command outputs given here are truncated.

```
RP/0/RP0/CPU0:ios#show drops all location all
