**Note**

- Starting from Cisco vManage Release 20.9.1, the Control components software version must be the same or be higher than the WAN edge device software version. If the WAN edge device software version is higher than the Control components software version, policy download to the device fails.
- All device and controller combinations listed in this table have been validated. However, there are no software changes in this control components software release, which impact the device-to-control components backwards compatibility for previous releases that are not listed in the table.
- UCS-E Series using External Interfaces are supported from Cisco SD-WAN Release 19.2.1 and later releases.
- UCS-E Series using Internal Backplane Interfaces such as ucse x/y/0 and ucse x/y/1 have a limited feature support configurable using only Cisco SD-WAN Manager CLI templates, starting from Cisco SD-WAN Release 20.1.1 and later releases.
- The Cisco vEdge 100M, Cisco vEdge 100B, Cisco vEdge 100wm and Cisco vEdge 1000 devices are impacted by a certificate expiry incident. For more information see, [Troubleshooting certificate expiry incident](#).
