

## Resolved Issues

For your convenience, the release notes list the resolved issues for each patch.

If you have a support contract, you can use the [Cisco Bug Search Tool](#) to obtain up-to-date bug lists. You can constrain searches to bugs affecting specific platforms and versions. You can also search by bug status, bug ID, and for specific keywords.

### Important

Bug lists are auto-generated *once* and are not subsequently updated. Depending on how and when a bug was categorized or updated in our system, it may not appear in the release notes. You should regard the [Cisco Bug Search Tool](#) as the source of truth.

- [Version 6.3.0.5 Resolved Issues, on page 1](#)
- [Version 6.3.0.4 Resolved Issues, on page 5](#)
- [Version 6.3.0.3 Resolved Issues, on page 9](#)
- [Version 6.3.0.2 Resolved Issues, on page 12](#)
- [Version 6.3.0.1 Resolved Issues, on page 14](#)

## Version 6.3.0.5 Resolved Issues

**Table 1: Version 6.3.0.5 Resolved Issues**

Bug ID	Headline
<a href="#">CSCve24102</a>	GUI should allow max 256 addresses per DHCP pool
<a href="#">CSCvh73096</a>	Read sAMAccountUserName from ISE when it is available
<a href="#">CSCvk26612</a>	"default Keyring's certificate is invalid, reason: expired" health alert
<a href="#">CSCvk43854</a>	Cisco Firepower Threat Defense Detection Engine Policy Bypass Vulnerability
<a href="#">CSCvm40288</a>	Port-Channel issues on HA link
<a href="#">CSCvm48451</a>	Intrusion Event Performance Graphs load blank on 4100 and 9300
<a href="#">CSCvm68648</a>	review of CVE-2016-8858 (OpenSSH) on Firepower software

Bug ID	Headline
<a href="#">CSCvm76266</a>	Lina traceback in Thread Name: cli_xml_server
<a href="#">CSCvm82966</a>	Linux Kernel 4.14 Vulnerabilities
<a href="#">CSCvn24594</a>	add NTPDATE update of blade sysclock from the supervisor before starting NTPD
<a href="#">CSCvn77388</a>	SDI - SUSPENDED servers cause 15sec delay in the completion of a authentication with a good server
<a href="#">CSCvn81898</a>	Device name doesn't exist in a syslog message if syslog alerting for connection events is configured
<a href="#">CSCvn83385</a>	Cisco FTD, FMC, and FXOS Software PAM Denial of Service Vulnerability
<a href="#">CSCvo11280</a>	ASA Enhancement: Generate syslog message once member of the SDI cluster changes state
<a href="#">CSCvo14961</a>	ASA may traceback and reload while waiting for "dns_cache_timer" process to finish.
<a href="#">CSCvo28118</a>	Traceback in VPN Clustering HA timer thread when member tries to join the cluster
<a href="#">CSCvo29989</a>	Cisco FirePower Threat Defense Information Disclosure Vulnerability
<a href="#">CSCvo43795</a>	OSPF Process ID doesnot change even after clearing OSPF process
<a href="#">CSCvo66546</a>	Firepower frequent traceback and restart on SFDataCorrelator process
<a href="#">CSCvo68448</a>	ASA report SFR module as 'Unresponsive' after reloading ASA module on 5585 platform
<a href="#">CSCvo73250</a>	ENH: ACE details for warning "found duplicate element"
<a href="#">CSCvo74397</a>	ENH: Add process information to "Command Ignored, configuration in progress..."
<a href="#">CSCvo83169</a>	Cisco ASA Software and FTD Software FTP Inspection Denial of Service Vulnerability
<a href="#">CSCvo86038</a>	Simultaneous FINs on flow-offloaded flows lead to stale conns
<a href="#">CSCvo86940</a>	PROMPTING FOR PASSWORD WHEN TRYING TO CONFIGURE enic, vfio-pci, igb_uio ON BLADE
<a href="#">CSCvo90998</a>	LACPDUs should not be sent to snort for inline-set interfaces
<a href="#">CSCvp04186</a>	cts import-pac tftp: syntax does not work
<a href="#">CSCvp12582</a>	Option to display port number on access-list instead of well known port name on ASA
<a href="#">CSCvp19910</a>	Unable to process gtpv1 identification req message for header TEID : 0
<a href="#">CSCvp19998</a>	ASA drops GTPV1 SGSN Context Req message with header TEID:0
<a href="#">CSCvp23579</a>	Network File Trajectory page takes 90 seconds to load each time

Bug ID	Headline
<a href="#">CSCvp33052</a>	Firepower 8000 interfaces might flap due to unhandled resource temporarily unavailable issue
<a href="#">CSCvp33341</a>	Cisco ASA and Firepower Threat Defense Software WebVPN Cross-Site Scripting Vulnerability
<a href="#">CSCvp46173</a>	Changes in interface-group or interface-zone in subdomain overwrites Global domain.
<a href="#">CSCvp49576</a>	FTD traceback due to watchdog on xlate_detach
<a href="#">CSCvp54261</a>	Audit syslog for SFR module/7000/8000 devices uses TCP instead of UDP for syslog communication
<a href="#">CSCvp55901</a>	LINA traceback on ASA in HA Active Unit repeatedly
<a href="#">CSCvp55941</a>	FILE RESUME BLOCK being randomly thrown causing access issues on files from SMB share.
<a href="#">CSCvp58028</a>	natd thread of nfm_exceptiond uses about 90% to 100% CPU time
<a href="#">CSCvp67257</a>	USGv6 Failures From Kernel Upgrade [3.10 to 4.14]
<a href="#">CSCvp67626</a>	2100 upgrade failure in 000_start/125_verify_bundle.sh when gateway IP improperly set
<a href="#">CSCvp72244</a>	Evaluate Cisco 8000 series for CVE-2019-11815
<a href="#">CSCvp76944</a>	Cisco ASA and FTD Software WebVPN CPU Denial of Service Vulnerability
<a href="#">CSCvp84546</a>	ASA 9.9.2 Clientless WebVPN - HTML entities are incorrectly decoded when processing HTML
<a href="#">CSCvp87623</a>	Upload an update gives "update request entity too large" error when using CAC(HTTPS Client Certs)
<a href="#">CSCvp97061</a>	URL Filtering Shows All URLs as Uncategorized
<a href="#">CSCvp97799</a>	Policy deploy failure 6.5.0-1148 post upgrade with CC mode with openssl call during SSL pol Export
<a href="#">CSCvp98066</a>	On reset CD not clearing its flags[parseFailoverReqIssued] which prevents further node join attempts
<a href="#">CSCvp99137</a>	ASA on Firepower 2100: Excessive amount of DNS queries on Management Interface
<a href="#">CSCvq00675</a>	Linux Kernel sas_expander.c Race Condition Arbitrary Code Execution ...
<a href="#">CSCvq01459</a>	LINA Traceback after upgrade to 9.12.2.1
<a href="#">CSCvq05113</a>	ASA failover LANTEST messages are sent on first 10 interfaces in the configuration.
<a href="#">CSCvq06790</a>	Snort processes dump core with memory corruption on Series 3 devices
<a href="#">CSCvq08684</a>	Policy Deployment Failure due to Special Characters & encoding

Bug ID	Headline
<a href="#">CSCvq09093</a>	VPN Pre-deploy validations takes around 20 seconds for each device
<a href="#">CSCvq11513</a>	Traceback: "saml identity-provider" command will crash multi-context ASAs
<a href="#">CSCvq12411</a>	ASA may traceback due to SCTP traffic despite fix CSCvj98964
<a href="#">CSCvq13442</a>	When deleting context the ssh key-exchange goes to Default GLOBALLY!
<a href="#">CSCvq16123</a>	Firepower Dynamic Snort Rules are Disabled After a Deployment Involving a Snort Reload
<a href="#">CSCvq17263</a>	FTD LINA traceback at DATAPATH-8-15821
<a href="#">CSCvq19525</a>	Evaluation of sfims for TCP_SACK
<a href="#">CSCvq21607</a>	"ssl trust-point" command will be removed when restoring backup via CLI
<a href="#">CSCvq24134</a>	ASA IKEv2 - ASA sends additional delete message after initiating a phase 2 rekey
<a href="#">CSCvq25626</a>	Watchdog on ASAv when logging to buffer
<a href="#">CSCvq25775</a>	FTD Firepower 2100: external authentication fails if bind user password contains special characters
<a href="#">CSCvq26794</a>	GTP response messages with non existent cause are getting dropped with error message TID is 0
<a href="#">CSCvq27010</a>	Memory leak observed when ASA-SFR dataplane communication flaps
<a href="#">CSCvq28250</a>	ENH: ASA Cluster debug for syn cookie issues
<a href="#">CSCvq32681</a>	Fail to Wire configuration disabled for multiple interface-pair inline-sets during FTD upgrades
<a href="#">CSCvq36042</a>	lost heartbeat causing reload
<a href="#">CSCvq39083</a>	Security Intelligence does not drop HTTPS connections to blacklisted URLs when SSL policy is enabled
<a href="#">CSCvq39317</a>	ASA is unable to verify the file integrity
<a href="#">CSCvq40943</a>	FTD 4150 VPN s2s deployment failure with 6K spokes
<a href="#">CSCvq44665</a>	FTD/ASA : Traceback in Datapath with assert snp_tcp_intercept_assert_disabled
<a href="#">CSCvq46918</a>	SNMPv3 User(s) deleted after upgrade
<a href="#">CSCvq50314</a>	Failed SSH Login attempts not being exported via syslog
<a href="#">CSCvq54242</a>	Warning "There is an empty group in the source networks" in SSL policy
<a href="#">CSCvq54667</a>	SSL VPN may not be able to establish due to SSL negotiation issue

Bug ID	Headline
<a href="#">CSCvq56138</a>	User login fails into FMC GUI for LDAP user if the password contains SPACE in the string
<a href="#">CSCvq56462</a>	File policy not inspecting some malware document (.doc) and Adobe flash (.swf) files.
<a href="#">CSCvq60131</a>	ASA traceback observed when moving EZVPN spokes to the device.
<a href="#">CSCvq63024</a>	Dual stacked ASA v manual failover issues
<a href="#">CSCvq64742</a>	ASA5515-K9 standby traceback in Thread Name ssh
<a href="#">CSCvq65092</a>	Slow device related REST API calls
<a href="#">CSCvq65241</a>	ASA Traceback on Saleen in Thread Name: IPv6 IDB
<a href="#">CSCvq65542</a>	Disable asp load-balance per-packet functionality from fp2100 until all bugs fixed
<a href="#">CSCvq69111</a>	Traceback: Cluster unit lina assertion in thread name:Cluster controller
<a href="#">CSCvq70468</a>	ASA cluster does not flush OSPF routes
<a href="#">CSCvq70485</a>	Slow "securityzones" REST API
<a href="#">CSCvq75743</a>	ASA:BGP recursive route lookup for destination 3 hop away is failing.
<a href="#">CSCvq76533</a>	F_RNA_EVENT_LIMIT for MC4000 should be 20 million
<a href="#">CSCvq77547</a>	Connections fail to replicate in failover due to failover descriptor mis-match on port-channels
<a href="#">CSCvq80318</a>	ASA generates incorrect error message about PCI cfg space when enumerating Internal-Data0/1
<a href="#">CSCvq80735</a>	Cannot add neighbor in BGP when the neighbor is on the same subnet as one interface
<a href="#">CSCvq81516</a>	VPN events between 12 and 1 PM UTC are not displayed on the FMC
<a href="#">CSCvq91645</a>	Flow Offload Hashing Change of Behavior

## Version 6.3.0.4 Resolved Issues

*Table 2: Version 6.3.0.4 Resolved Issues*

Bug ID	Headline
<a href="#">CSCvf83160</a>	Traceback on Thread Name: DATAPATH-2-1785
<a href="#">CSCvg01007</a>	https pdf attachment issues
<a href="#">CSCvg74603</a>	eStreamer archive events are not pruned correctly by diskmanager
<a href="#">CSCvi63474</a>	Unable to edit the system policy of a SFR module via ASDM after upgrading to 6.2.2

Bug ID	Headline
<a href="#">CSCvk14242</a>	sfstunnel process in FTD is holding large cloud db files that are already deleted
<a href="#">CSCvm27111</a>	FTD Lina traceback while removing OSPF configuration.
<a href="#">CSCvm36362</a>	Route tracking failure
<a href="#">CSCvm50421</a>	ASA traceback on slave/standby during sync config due to OSPF/EIGRP and IPv6 used together in ACE
<a href="#">CSCvm70274</a>	tep proxy: ASA traceback on DATAPATH
<a href="#">CSCvm88294</a>	High Disk utilization due to partition force drain not occurring
<a href="#">CSCvn25605</a>	FTW: Bypass LED stays on solid amber even after total recovery of sensor
<a href="#">CSCvn34246</a>	Loading AC policy editor takes too long, needs loading indicator
<a href="#">CSCvn45750</a>	FMC Audit Logs will only display Admin and System as owners when deploying to 3D devices -GUI/SYSLOG
<a href="#">CSCvn57284</a>	Unsupported EC curve x25519 on FTD
<a href="#">CSCvn66248</a>	Configuring "boot config" has no effect if file was modified off-box and copied back on
<a href="#">CSCvn76875</a>	Graceful Restart BGP does not work intermittently
<a href="#">CSCvn78597</a>	Firepower block page not displayed on MS IE11 and Edge for HTTPS blocked sites when proxy is enabled
<a href="#">CSCvo03700</a>	ASA may traceback in thread logger when cluster is enabled on slave unit
<a href="#">CSCvo24145</a>	ids_event_alerter high memory usage due to large firewall_rule_cache table
<a href="#">CSCvo31695</a>	Traceback in threadname DATAPATH-0-1668 while freeing memory block
<a href="#">CSCvo33348</a>	Mysql traffic on non standard port is not correctly classified
<a href="#">CSCvo33851</a>	ngfwManager doesn't start if ngfw.properties is empty
<a href="#">CSCvo43679</a>	FTD Lina traceback, due to packet looping in the system by normaliser
<a href="#">CSCvo48838</a>	Lina does not properly report the error for configuration line that is too long
<a href="#">CSCvo50168</a>	Audit Log Settings Failing Leading to being unable to edit System Settings
<a href="#">CSCvo51265</a>	SCP large file transfer to the box result in a traceback
<a href="#">CSCvo54799</a>	ssh to device fails due to corrupted devpts entry in fstab
<a href="#">CSCvo56836</a>	SCALE: with 500+ devices, UMS causes the UI to hang, especially during deploy
<a href="#">CSCvo60862</a>	Internal Error when editing an Access Control Policy
<a href="#">CSCvo62060</a>	Telemetry not sent when FMC managing lots of devices

Bug ID	Headline
<a href="#">CSCvo65464</a>	FPR2100: EIGRP routes with learned over port channel interface become Infinite FD
<a href="#">CSCvo66534</a>	Traceback and reload citing Datapath as affected thread
<a href="#">CSCvo70866</a>	SGT tag shows untagged in server packet for every client packet with SGT tag with some value
<a href="#">CSCvo72179</a>	For SMB, remote storage configuration should allow configuring version string with dot(.)
<a href="#">CSCvo72232</a>	ERR_SSL_BAD_RECORD_MAC_ALERT or SSL_ERROR_BAD_MAC_ALERT in the browser
<a href="#">CSCvo74350</a>	ASA may traceback and reload. Potentially related to WebVPN traffic
<a href="#">CSCvo74625</a>	6.4.0 - IPv6 routing doesn't work for WM and KP when mgmt gateway configure as data-interfaces
<a href="#">CSCvo74745</a>	cloud agent core after generating a large number of continuous URL lookups (>30M)
<a href="#">CSCvo78789</a>	Cisco Adaptive Security Appliance Smart Tunnel Vulnerabilities
<a href="#">CSCvo80501</a>	Standby Firewall reloads with a traceback upon doing a manual failover
<a href="#">CSCvo81073</a>	Unable to load Device Management page or upgrade FMC due to missing NGFWHA EO
<a href="#">CSCvo81260</a>	FMC "FQDN" via API causes all objects within a network attribute to be "ANY"
<a href="#">CSCvo83574</a>	Device goes into a bad state when switching the inline set from TAP mode
<a href="#">CSCvo87930</a>	HTTP with ipv6 using w3m is failing
<a href="#">CSCvo88188</a>	SSL rules with App-ID conditions can limit decryption capability
<a href="#">CSCvo88306</a>	NAT rules can get applied in the wrong order when you have duplicate rules
<a href="#">CSCvo89224</a>	FMC times out after 10 mins to fetch device list for deployment
<a href="#">CSCvo90153</a>	ASA unable to authenticate users with special characters via https
<a href="#">CSCvo90550</a>	Firepower Recommendations does not enable IPS rules that are GID 3
<a href="#">CSCvo90805</a>	Cisco Firepower Management Center RSS Cross-Site Scripting Vulnerabilities
<a href="#">CSCvo93872</a>	Memory leak while inspecting GTP traffic
<a href="#">CSCvo94486</a>	Snort process exits while processing Security Intelligence.
<a href="#">CSCvp03498</a>	Health monitoring options for user identity functionality on FMC.
<a href="#">CSCvp07143</a>	DTLS 1.2 and AnyConnect oMTU

Bug ID	Headline
<a href="#">CSCvp09150</a>	Cisco ASA Software Web-Based Management Interface Privilege Escalation Vulnerability
<a href="#">CSCvp12052</a>	ASA may traceback and reload. suspecting webvpn related
<a href="#">CSCvp16979</a>	ssl and daq debug logs can't be enabled/disabled dynamically
<a href="#">CSCvp18878</a>	ASA: Watchdog traceback in Datapath
<a href="#">CSCvp21837</a>	Allow FTDs to perform URL lookups directly without having to go through the FMC Pre 6.5.0
<a href="#">CSCvp23137</a>	ASA/FTD generates syslog for missing SSD 2: /dev/sdb is present. Status: Inoperable.
<a href="#">CSCvp24787</a>	(snort)File is not getting detected when going over HTTPS (SSL Resign)
<a href="#">CSCvp25581</a>	in FMC-HA user_group_map entries are wiped out in split-brain
<a href="#">CSCvp25583</a>	FTD sets automatically metric 0 when we redistribute OSPF into BGP via FMC GUI.
<a href="#">CSCvp25782</a>	EventHandler core while pruning metadata cache
<a href="#">CSCvp27263</a>	Multiple ClamAV Vulnerabilities For Cisco Firepower Management Center for pre 6.5.0
<a href="#">CSCvp29245</a>	FTD and FDM operations fail due to depleted disk space from excessive eventing logs
<a href="#">CSCvp32617</a>	"established tcp" does not work post 9.6.2
<a href="#">CSCvp35359</a>	FMC-ISE integration doesn't work if explicit UPN doesn't match implicit UPN
<a href="#">CSCvp36425</a>	Cisco ASA & FTD Software Cryptographic TLS and SSL Driver Denial of Service Vulnerability
<a href="#">CSCvp37779</a>	FTD show tech from troubleshooting files incomplete
<a href="#">CSCvp38808</a>	FP2100: Removal of fault "The password encryption key has not been set."
<a href="#">CSCvp43474</a>	REST API query /api/fmc_config/v1/domain/UUID/devices/devicerecords fails
<a href="#">CSCvp43536</a>	On upgraded FMC Device FXOS devices are shown dirty even after successful deployment.
<a href="#">CSCvp46341</a>	Fail-to-Wire (FTW) Ports fail to recover on 2100 Firepower platforms.
<a href="#">CSCvp54634</a>	Wrong rule matched when using ambiguous DND
<a href="#">CSCvp58310</a>	integrate pxgrid capability, connection hang, curl hang issues
<a href="#">CSCvp72488</a>	Firepower: AMP for network connectivity failure after upgrading to 6.3.0.2+
<a href="#">CSCvp72601</a>	FMC UI: VPN Hub and Spoke topology slow loading

Bug ID	Headline
<a href="#">CSCvp72770</a>	BCDB file copy from FMC on to vFTD getting truncated, vFTD running on Azure platform.
<a href="#">CSCvp78197</a>	Policy deployment remove and add back ospf neighbor
<a href="#">CSCvp81967</a>	Slowness in loading Device Management page on FMC when there are over 500 managed devices
<a href="#">CSCvp82945</a>	NAT policy apply failing with error duplicate
<a href="#">CSCvp96934</a>	Ensure Error Message with Dup NATs Is Clear and Actionable
<a href="#">CSCvq08684</a>	Policy Deployment Failure due to Special Characters & encoding
<a href="#">CSCvq34224</a>	Firepower Primary Detection Engine process terminated after Manager upgrade
<a href="#">CSCvq61651</a>	URL DB download failure alerts on FMC; new URL DB updates not taking effect on FMC/FDM

## Version 6.3.0.3 Resolved Issues

*Table 3: Version 6.3.0.3 Resolved Issues*

Bug ID	Headline
<a href="#">CSCvi16224</a>	snmp-server host command for SNMPv3 doesn't apply properly when deploy ASAv VM on NFVIS (KVM) system
<a href="#">CSCvi62112</a>	Blocking BPDU via FlexConfig on FTD Transparent causes deployment and registration issues
<a href="#">CSCvj06993</a>	ASA HA with NSF: NSF is not triggered properly when there is an Interface failure in ASA HA
<a href="#">CSCvj82652</a>	Deployment changes are not pushed to the device due to disk0 mounted on read-only
<a href="#">CSCvk06386</a>	FTD Files are Allowed Through Multiple Pre-existing Connections Despite the File Policy Verdict
<a href="#">CSCvm00066</a>	ASA is stuck on "reading from flash" for several hours
<a href="#">CSCvm16724</a>	FXOS ASA/FTD needs means to poll Internal-data interface counters
<a href="#">CSCvm35373</a>	Pruner process fails to start due to configuration
<a href="#">CSCvm62846</a>	restore of TID   Config only backup failed:
<a href="#">CSCvm86008</a>	Policy Deployment: Delta config doesn't get copied to running config, LINA config remains unchanged
<a href="#">CSCvn07452</a>	712x devices become unstable when switching inline set from TAP to inline

Bug ID	Headline
<a href="#">CSCvn09383</a>	Manual URL lookup returns Uncategorized if same URL is entered second time without "www." part
<a href="#">CSCvn25949</a>	Digital Signature Verification Failed during upload of Rest-API image to ASA
<a href="#">CSCvn30108</a>	The 'show memory' CLI output is incorrect on ASAv
<a href="#">CSCvn31347</a>	ACL Unable to configure an ACL after access-group configuration error
<a href="#">CSCvn38453</a>	ASA: Not able to load Quovadis Root Certificate as trustpoint when FIPS is enabled
<a href="#">CSCvn44222</a>	6.3.0-79: HA upgrade/deployment fails from from missing RAVPN diskfiles on secondary
<a href="#">CSCvn49854</a>	Subsequent HTTP requests not retrieving URL and XFF
<a href="#">CSCvn67137</a>	ASA5506 may slowly leak memory when using NetFlow
<a href="#">CSCvn67570</a>	amp-stunnel.conf does not point to correct amp cloud server post FMC upgrade
<a href="#">CSCvn68527</a>	KP:AnyConnect used IP from pool shows as available
<a href="#">CSCvn71592</a>	After FMC reboot, intrusion events generated by Snort are not sent to FMC and show up in webGUI
<a href="#">CSCvn74112</a>	FTDv does not have configuration on initial bringup with mix of vmxnet3 and ixgbev interfaces
<a href="#">CSCvn75368</a>	FPR platform IPsec VPN goes down intermittently
<a href="#">CSCvn78593</a>	Control-plane ACL doesn't work correctly on FTD
<a href="#">CSCvn78870</a>	ASA Multicontext traceback and reload due to allocate-interface out of range command
<a href="#">CSCvn82895</a>	Diskmanager may not track all event files
<a href="#">CSCvn87965</a>	While associating FMC with TG account, FMC should not redirect users to TG console
<a href="#">CSCvn95711</a>	Traceback on Thread Name: Unicorn Admin Handler after adding protocol to IKEV2 ipsec-proposal
<a href="#">CSCvn96898</a>	Memory Leak in DMA_Pool in binsize 1024 with SCP download
<a href="#">CSCvn99712</a>	Cisco Firepower Management Center Persistent Cross-Site Scripting Vulnerability
<a href="#">CSCvo02097</a>	Upgrading ASA cluster to 9.10.1.7 cause traceback
<a href="#">CSCvo04444</a>	Ikev2 tunnel creation fails
<a href="#">CSCvo06216</a>	Support more than 255 chars for Split DNS-commit issue in hanover for CSCuz22961
<a href="#">CSCvo09046</a>	Upgrading ASA cluster to 9.10.1.7 cause low memory
<a href="#">CSCvo13497</a>	Unable to remove access-list with 'log default' keyword

Bug ID	Headline
<a href="#">CSCvo19247</a>	Traceback while processing an outbound SSL packet
<a href="#">CSCvo21210</a>	PDTS has incorrect numa node info resulting in incorrect load balancing
<a href="#">CSCvo23222</a>	AnyConnect session rejected due to resource issue in multi context deployments
<a href="#">CSCvo23366</a>	Deploy failed because adaptive profiling config file corrupt
<a href="#">CSCvo27109</a>	Standby may enter reboot loop upon upgrading to 9.6(4)20 from 9.6(4)6
<a href="#">CSCvo29973</a>	ssl rules with cipher suite conditions can cause unneeded tls 1.3 downgrade
<a href="#">CSCvo31353</a>	SSL connections may fail when URL categories are used and certificate common name doesn't match
<a href="#">CSCvo39094</a>	Delay/Longer processing time to insert policy deploy task after selecting the device for deploy
<a href="#">CSCvo40210</a>	Update Talos RSS feed in dashboard widget
<a href="#">CSCvo42174</a>	ASA IPsec VPN EAP Fails to Load Valid Certificate in PKI
<a href="#">CSCvo42884</a>	Cannot make Site-to-site VPN changes on FTD after upgrading to 6.3
<a href="#">CSCvo43693</a>	FTD HA creation fails due to multiple files modules*.tgz and vdb*.tgz being transferred from FMC
<a href="#">CSCvo44064</a>	aggressive downgrade action is taken when url look up is pending due to no sni
<a href="#">CSCvo45209</a>	FTD-CLUSTER:Adding new unit in cluster can cause traffic drop
<a href="#">CSCvo45675</a>	FMC upgrade process should check configuration that would be invalid after upgrade
<a href="#">CSCvo50230</a>	SSL Connections to uncategorized URLs may fail repeatedly
<a href="#">CSCvo55151</a>	crypto ipsec inner-routing-lookup should not be allowed to be configured with VTI present
<a href="#">CSCvo55282</a>	Policy deploy fails when user is able to enter invalid inline port range in AC Rule accidentally
<a href="#">CSCvo56675</a>	ASA or FTD traceback and reload due to failover state change or xlates cleared
<a href="#">CSCvo56895</a>	Some donut charts on the Context Explorer failing to load
<a href="#">CSCvo61091</a>	eStreamer memory and CPU grow when sending NAP policy metadata
<a href="#">CSCvo63168</a>	temp_id leak if Sybase connection fails
<a href="#">CSCvo63232</a>	UIMP not updating users from a realm that resides in a child domain.
<a href="#">CSCvo63240</a>	Smart Tunnel bookmarks don't work after upgrade giving certificate error
<a href="#">CSCvo67454</a>	Invalid port range object causes AC policy deploy to fail

Bug ID	Headline
<a href="#">CSCvo72238</a>	FMC backup fails when FTD cluster is managed in domain and sub-domain AC Policy is assigned to it
<a href="#">CSCvo74743</a>	FMC-HA changes to child domain on primary, not getting to ADI.conf on secondary

## Version 6.3.0.2 Resolved Issues

Table 4: Version 6.3.0.2 Resolved Issues

Bug ID	Headline
<a href="#">CSCuz28594</a>	Diskmanager - critical alert on /var/storage due to disk manager not pruning till 99%
<a href="#">CSCvh26064</a>	Unable to use "Change Reconciliation" on 7000/8000 sensors
<a href="#">CSCvi28763</a>	FTD Platform Settings: change default DH-group in SSL custom settings to 2
<a href="#">CSCvi34533</a>	Cannot save modification in Access List if there's no SNMPv3 user defined
<a href="#">CSCvi55841</a>	errors saving blacklist config file are not detected
<a href="#">CSCvk16876</a>	Traffic matches incorrect Access Control Rule
<a href="#">CSCvk31472</a>	Smart License logging is polluting syslog AND causing fast log rotation
<a href="#">CSCvk40964</a>	Deployment of empty interface config to device lead to traffic outage
<a href="#">CSCvm14875</a>	Large number of stale cloudconfig EO causing performance issues
<a href="#">CSCvm24210</a>	One of the two schedule tasks running on same timestamp fails if they both access the same file
<a href="#">CSCvm40545</a>	downgrading FTD twice in a row without updating in between results in wrong lina version
<a href="#">CSCvm58799</a>	During deploy, if multiple Snorts are not responding, recovery takes too long
<a href="#">CSCvm60039</a>	Custom DNS security intelligence feed fail to download intermittently
<a href="#">CSCvm60548</a>	Security Intelligence synchronization tasks fail
<a href="#">CSCvm66743</a>	Domain page takes long time to load on scale setup
<a href="#">CSCvm87892</a>	sfls crash in snort found when traffic is soaked overnight
<a href="#">CSCvn10634</a>	Files are not detected in HTTP flows when there's an Out of Order (ACK before actual data)
<a href="#">CSCvn16102</a>	Diskmanager file capture data not increasing for hours at a time
<a href="#">CSCvn17347</a>	Traceback and reload when displaying CPU profiling results

Bug ID	Headline
<a href="#">CSCvn19074</a>	MSP -Access Control Rule to Block with Reset for CIP Write application is not blocking
<a href="#">CSCvn38010</a>	Let remove_peers.pl scripts bailout when it is run in FTD HA setup
<a href="#">CSCvn38082</a>	FMC should identify and recover from mongo corruption
<a href="#">CSCvn38189</a>	SFDataCorrelator is not restarted after backup scripts died
<a href="#">CSCvn41903</a>	Snort reload fails and causes restart due to dce2-mem-reloader memory adjustments taking too long
<a href="#">CSCvn43798</a>	Deleting a domain fails to delete some objects if a Realm is in that domain
<a href="#">CSCvn46474</a>	FP2120 FTD went unresponsive after power outage
<a href="#">CSCvn47788</a>	UI validation fails on a valid hostname IP for Audit Log Host in Firepower platform setting policy
<a href="#">CSCvn48739</a>	FTD show tech taken from CLISH mode and in troubleshoot may be truncated
<a href="#">CSCvn48790</a>	Slave node kicked out of cluster if SI task running during policy apply
<a href="#">CSCvn49561</a>	update FireAMP curl calls to use CA path
<a href="#">CSCvn53145</a>	Policy deploy throws "Variable set has invalid excluded values"
<a href="#">CSCvn65575</a>	Snort termination can occur when active authentication is enabled and an SSL policy is not enabled
<a href="#">CSCvn67888</a>	Object added using REST API result in policy deploy failure
<a href="#">CSCvn68145</a>	Snort Unexpectedly Exiting when using SSL decryption
<a href="#">CSCvn69019</a>	usernames with single quotes are not written into user_ip_map file
<a href="#">CSCvn72650</a>	FTD Address not mapped traceback on 6.3.0.x release
<a href="#">CSCvn72683</a>	FMC webGUI device management page loading time is too long around 45s with 25s fetching license
<a href="#">CSCvn73244</a>	After upgrading to 6.3, unable to deploy RA VPN policy due to anyconnect-custom-attr
<a href="#">CSCvn76046</a>	Preshared key with " character will not deploy after upgrading to 6.3
<a href="#">CSCvn76783</a>	Monitor rule with enabled logging to syslog server does not report connection events to the server.
<a href="#">CSCvn77285</a>	After upgrading to 6.3, SI Health Alert is no longer accurate
<a href="#">CSCvn93499</a>	Snort/Data Correlator can crash while exiting on Firepower 4100/9300 devices.
<a href="#">CSCvo00887</a>	ssl client hello should not be modified if "Do Not Decrypt" rule will be the only possible verdict

Bug ID	Headline
<a href="#">CSCvo03186</a>	Domain page in Firepower Management Center takes long time to load
<a href="#">CSCvo03808</a>	Deploy from FMC fails due to OOM with no indication of why
<a href="#">CSCvo11077</a>	Memory leak found in IPsec when we establish and terminate a new IKEv1 tunnel.
<a href="#">CSCvo15484</a>	Unable to delete User IOC if user info is inconsistent between mysql & sybase - part fix
<a href="#">CSCvo23150</a>	excessive DB queries for user identities causes slowness in user session processing.
<a href="#">CSCvo27164</a>	SFDataCorrelator logs inappropriate "Resuming storage of old events" messages
<a href="#">CSCvo32329</a>	Deleted realm is causing many user_id's loaded into user_identities cache
<a href="#">CSCvo56616</a>	Deployment times out in some cases resulting in non-terminated AQ

## Version 6.3.0.1 Resolved Issues

Bug ID	Headline
<a href="#">CSCuy90400</a>	Enhancement to support extended master secret in SSL
<a href="#">CSCva62256</a>	Appliance status widget taking too long with 500 sensors
<a href="#">CSCvd03903</a>	Firepower is affected by TCP Dump Vulnerability
<a href="#">CSCvd12834</a>	FP Audit Logs do not log passed and failed SSH authentication attempts
<a href="#">CSCve29930</a>	Cannot configure LOM on secondary FMC from HA pair
<a href="#">CSCvf20266</a>	Firepower Management Center System Configuration Email Notification Password Length Too Short
<a href="#">CSCvh13022</a>	SSL decryption is bypassed when client hello payload is < 6 bytes
<a href="#">CSCvi97028</a>	fmc GUI too slow when configuring unreachable syslog server
<a href="#">CSCvi97500</a>	AMP Cloud event on Firepower Management Center are seen with different file types
<a href="#">CSCvj65154</a>	FMC failing to communicate with SSM when proxy password contains @ character
<a href="#">CSCvj74643</a>	Enabling Use CAC authentication and authorization on AD breaks RADIUS when changed.
<a href="#">CSCvj87287</a>	simultaneous flood of REST-API requests to FMC results in inaccessibility
<a href="#">CSCvj97229</a>	'User Name Template' should be required field for external authentication object for CAC in FMC
<a href="#">CSCvk19946</a>	Sftunnel service broken due to cache archive data flooding

Bug ID	Headline
<a href="#">CSCvk39339</a>	Unable to run the scheduling report generation on Japanese FMC
<a href="#">CSCvk55634</a>	Random policy deployment failure due to stuck notification for policy deployment
<a href="#">CSCvk56988</a>	Cisco ClamAV MEW unpacker Denial of Service Vulnerability
<a href="#">CSCvm46014</a>	Copy config should not fail if standby device is corrupted on FTD HA
<a href="#">CSCvm47713</a>	SSL policy disallows viewing of PDF on *.lightning.force.com when Chrome browser is used
<a href="#">CSCvm59983</a>	The file-size directive returns invalid input error and breaks the captures from clish
<a href="#">CSCvm64230</a>	verify_firmwareRunning() return code not checked
<a href="#">CSCvm76760</a>	FMC - External RADIUS authentication - Text in the "Shell Access Filter" field is not validated
<a href="#">CSCvm80933</a>	ssl policy can match incorrect rule when server uses a cert with wildcard common name
<a href="#">CSCvm87315</a>	FTD registration can fail because of TID in RegistrationTR::addToLamplighter
<a href="#">CSCvm91280</a>	Intrusion Events Report Date, Hour Of Day, Day Of Week comes in UTC and Time comes in local timezone
<a href="#">CSCvm96339</a>	/dev/root partition will fill to 100% due to archive_cache_seed.sensor file
<a href="#">CSCvn03507</a>	"set ip next-hop verify-availability" is applied incorrectly with subsequent deployments
<a href="#">CSCvn05797</a>	Cisco Firepower Management Center Cross-Site Scripting Vulnerability
<a href="#">CSCvn06618</a>	On LINA config rollback the startup-config is being merged with the default running
<a href="#">CSCvn08146</a>	Missing audit detail for changes to x509 certificates and keys
<a href="#">CSCvn14650</a>	Linux Kernel Use-After-Free Race Condition Vulnerability
<a href="#">CSCvn16489</a>	AMP Dynamic Analysis's clouds should be tracked separately for submission rates.
<a href="#">CSCvn19289</a>	Multiple Vulnerabilities in curl
<a href="#">CSCvn20411</a>	Device management page never loads and times out after an error message
<a href="#">CSCvn21899</a>	Firepower: Disable TLS 1.0 permanently for SFTunnel communication
<a href="#">CSCvn23701</a>	Deployment failed with - ftp_telnet.conf(4) => Invalid keyword 'memcap' for 'global' configuration.
<a href="#">CSCvn30118</a>	mysql-server.err file is not fully deleted and keeps consuming Firepower disk space
<a href="#">CSCvn31753</a>	ssl inspection policy may cause SEC_ERROR_REUSED_ISSUER_AND_SERIAL browser error

<b>Bug ID</b>	<b>Headline</b>
<a href="#">CSCvn31793</a>	TLS 1.3 connections reported as 1.2 in FMC connection events
<a href="#">CSCvn36393</a>	exclude tls1.0 and tls1.1 in stunnel config file
<a href="#">CSCvn46121</a>	Security Intelligence IP monitor Events are not sent to syslog if default action logs to syslog
<a href="#">CSCvn53131</a>	snort validation error during policy apply after FMC upgrade
<a href="#">CSCvn53732</a>	Modified SSL connections that are not decrypted should be closed
<a href="#">CSCvo02577</a>	Buffer exhaustion with SSL HW decryption
<a href="#">CSCvo11743</a>	fpreplication snapshot streaming loops when last batch is 100% full.
