

## Known Issues

For your convenience, the release notes list the known issues for major releases. We do not list known issues for maintenance releases or patches.

If you have a support contract, you can use the [Cisco Bug Search Tool](#) to obtain up-to-date bug lists. You can constrain searches to bugs affecting specific platforms and versions. You can also search by bug status, bug ID, and for specific keywords.

### Important

Bug lists are auto-generated *once* and are not subsequently updated. Depending on how and when a bug was categorized or updated in our system, it may not appear in the release notes. You should regard the [Cisco Bug Search Tool](#) as the source of truth.

- [Version 6.3.0 Known Issues, on page 1](#)

## Version 6.3.0 Known Issues

*Table 1: Version 6.3.0 Known Issues*

Bug ID	Headline
<a href="#">CSCvk74150</a>	After FDM HA switch the deploy takes longer than 25 minutes on 6.3.0-1376
<a href="#">CSCvm14296</a>	Cisco Firepower Threat Defense Software Multi-Instance Container Escape Vulnerabilities
<a href="#">CSCvm29525</a>	After creating MAX number of LOM users you cannot login remotely using ipmitool
<a href="#">CSCvm32307</a>	Need option to do packet capture on a Port channel Sub-interface
<a href="#">CSCvm37935</a>	Sometimes rule evaluation is aborted on virtual devices due to lower default PPM threshold value
<a href="#">CSCvn07587</a>	Network IPv6 range doesn't deploy correctly to lina
<a href="#">CSCvn12381</a>	4140 Multi-Instance Not Load-Balancing Correctly with 4 Instances
<a href="#">CSCvn19074</a>	MSP -Access Control Rule to Block with Reset for CIP Write application is not blocking

Bug ID	Headline
<a href="#">CSCvn19289</a>	Multiple Vulnerabilities in curl
<a href="#">CSCvn32308</a>	Restoring self backup on secondary requires license re-registrations
<a href="#">CSCvn44222</a>	6.3.0-79: HA upgrade/deployment fails from from missing RAVPN diskfiles on secondary
<a href="#">CSCvn46121</a>	Security Intelligence IP monitor Events are not sent to syslog if default action logs to syslog
<a href="#">CSCvn52181</a>	FMC4500 : Noticed failures related to IPv6 configuration and NTP on console during baseline
<a href="#">CSCvn53145</a>	Policy deploy throws "Variable set has invalid excluded values"
<a href="#">CSCvn67630</a>	Govt UCAPL - Maximum Login Sessions through CLI - test case fails on 6.4.0-1088
<a href="#">CSCvn81898</a>	Device name doesn't exist in a syslog message if syslog alerting for connection events is configured
<a href="#">CSCvo06696</a>	FTD may drop conns through GRE tunnels if firewall receives GRE packet before inner packet
<a href="#">CSCvo15627</a>	Maxfailedlogin for non ucapl user's set to 5 in ucapl mode
<a href="#">CSCvo17612</a>	Return error messages when failing to retrieve objects from database
<a href="#">CSCvo19666</a>	28 Core instance is achieving 20% lower performance than expected
<a href="#">CSCvo31831</a>	Deleting a base policy does not delete the EOs of child policies
<a href="#">CSCvo37273</a>	Adding a validation check in FMC UI to validate the object network configured in static route
<a href="#">CSCvo48771</a>	FMC should check for configuration line length prior to deployment
<a href="#">CSCvo49295</a>	RabbitMQ constantly fails to start with error "case_clause,undefined"
<a href="#">CSCvo49344</a>	RabbitMQ malfunctions and does not recover after SFRemediatedD is killed
<a href="#">CSCvo74233</a>	FTD 6.3.0 traceback seen with tftp traffic
<a href="#">CSCvo77796</a>	Slow deployment due to slower IntrusionPolicy step in global snapshot population
<a href="#">CSCvo81219</a>	FP 2100: Reset should be direction aware similar to other platforms
<a href="#">CSCvo87456</a>	Unable to mount SMBv1 share in 6.3.0
<a href="#">CSCvo90413</a>	FTD-REST-API: HTML returned when wrong version passed in URL
<a href="#">CSCvp00236</a>	Upgrading FMC to 6.3.0 fails with error UNABLE TO LOAD stricts.pm and FlyLoader.pm
<a href="#">CSCvp01515</a>	ASA SFR: preprocessors won't be enabled, if enable dependency rules

Bug ID	Headline
<a href="#">CSCvp01542</a>	FMC 6.3 Multitenancy/Domain LDAPS User/Group Download Failure Due to Certificate Location
<a href="#">CSCvp09972</a>	connection event page is not displaying table on UI - max rows user preference is empty
<a href="#">CSCvp11760</a>	Search-Index update fails due to missing Activity Event publish
<a href="#">CSCvp20985</a>	Internet Download Manager detector doesn't match all flows
<a href="#">CSCvp24480</a>	fmc-ha uip snapshot processing stuck in a loop.
<a href="#">CSCvp25581</a>	in FMC-HA user_group_map entries are wiped out in split-brain
<a href="#">CSCvp25782</a>	EventHandler core while pruning metadata cache
<a href="#">CSCvp26548</a>	FDM upgrade fails due to objects validation failure
<a href="#">CSCvp30447</a>	Syslog alerts are not sent to server when Global Rule Thresholding is disabled on Intrusion Policy
<a href="#">CSCvp45786</a>	Not able to upload the STIX or Flat File Manually under Threat Intelligence Director
<a href="#">CSCvp55941</a>	FILE RESUME BLOCK being randomly thrown causing access issues on files from SMB share.
<a href="#">CSCvp95663</a>	InlineResult for IPS event missing metadata "Would have blocked"
<a href="#">CSCvq53902</a>	Cisco Firepower Management Center Multiple Cross-Site Scripting Vulnerabilities
<a href="#">CSCvq65542</a>	Disable asp load-balance per-packet functionality from fp2100 until all bugs fixed
<a href="#">CSCvq89794</a>	FDM - user downloads not working with LDAPS
<a href="#">CSCvq93768</a>	Lodash lodash Object.prototype Denial of Service Vulnerability
<a href="#">CSCvq93769</a>	Bootstrap collapse Plugin Data-Parent Attribute Cross-Site Scripting V
<a href="#">CSCvq93770</a>	Bootstrap tooltip Plugin Data-Container Property Cross-Site Scripting
<a href="#">CSCvq93771</a>	Bootstrap scrollspy Data-Target Property Cross-Site Scripting Vulnerab
<a href="#">CSCvr06515</a>	Access-control-config hit counter not incrementing
<a href="#">CSCvr33428</a>	FMC generates Connection Events from a SYN flood attack
<a href="#">CSCvr52077</a>	Variable set is not validated at deploy if it is not a part of AC rule
<a href="#">CSCvr72665</a>	FMC upgrading to 6.3/6.4 shouldn't remove existing deprecated flexconfig
<a href="#">CSCvs33392</a>	Known Key SSL decryption and connections can fail when servers are using unsupported TLS options
<a href="#">CSCvs55937</a>	Deployment fails for FDM due to neo4j error

<b>Bug ID</b>	<b>Headline</b>
<a href="#">CSCvt00140</a>	Series 3 sensors fail system restore to 6.3 and 6.4
<a href="#">CSCvt49334</a>	On the 4120 sensor, the task delete is not removing the "task_xx" files from the cron.d directory
<a href="#">CSCvt55927</a>	Unable to break HA in 6.4.0.9-34 FDM
<a href="#">CSCvt86650</a>	Terracotta Quartz Scheduler initDocumentParser XML External Entity Vul
<a href="#">CSCvt86666</a>	Apache Commons Compress ZipArchiveInputStream Denial of Service Vulner
<a href="#">CSCvt87127</a>	Memcached lru Commands NULL Pointer Dereference Vulnerability
<a href="#">CSCvt87141</a>	GNU Wget set_file_metadata Information Disclosure Vulnerability
<a href="#">CSCvu69541</a>	Query FMC using Ext. DB & unable to extract the 'url_category' from connection_log table as expected
<a href="#">CSCvu86734</a>	FTD Backup and Restore does not restore the hostname of the device locally
<a href="#">CSCvu91792</a>	SNMP IfDiscards OIDs for Internal-Data 0/0 and 0/1 wrong Values
<a href="#">CSCvv03258</a>	FTD/LINA traceback and reload on process name lina
<a href="#">CSCvv54860</a>	backup file can be extremely large when rabbitmq queue backed up
