### Switch Chassis LEDs

The BCN, STS, and ENV, LEDs are located on the left side of the front of the switch. The port LEDs appear as triangles pointing up or down to the nearest port.

LED	Color	Status
BCN	Flashing blue	The operator has activated this LED to identify this switch in the chassis.
	Off	This switch is not being identified.
STS	Green	The switch is operational.
	Flashing amber	The switch is booting up.
	Amber	Temperature exceeds the minor alarm threshold.
	Red	Temperature exceeds the major alarm threshold.
	Off	The switch is not receiving power.
ENV	Green	Fans and power supply modules are operational.
	Amber	At least one fan or power supply module is not operating.
(port)	Green	Port admin state is 'Enabled', SFP is present and the interface is connected (that is, cabled, and the link is up).
	Amber	Port admin state is 'Disabled, or the SFP is absent, or both.
	Off	Port admin state is 'Enabled' and SFP is present, but interface is not connected.

LED	Color	Status
(SYNC)	Green	The frequency are synchronized to external interface. The external interface could be GPS, Recovered RX clk).
	Amber	Freerun/Holdover - Time core is in freerun or holdover mode.
	Off	Time core clock synchronization is disabled.
(TIMING)	Green	The time, phase are synchronized to external interface. The external interface could be (GPS, FP).
	Amber	Freerun/Holdover - Time core is in freerun or holdover mode.
	Off	Time core clock synchronization is disabled.
(GPS)	Green	GPS interface provisioned and ports are turned on. ToD, 1PPS, 10MHz are all valid.
	Off	Either the interface is not provisioned, or the ports are not turned on. ToD, 1PPS, 10MHz are not valid.

## Fan Module LEDs

The fan module status LED is located below the air holes on the front of the fan module. Every fan module has an LED.

LED	Color	Status
Status	Green	The fan module is operational.
	Red	The fan module is not operational (fan is probably not functional).
	Off	Fan module is not receiving power.

## Power Supply LEDs

The power supply LEDs are located on the left front portion of the power supply. Combinations of states that are indicated by the Okay (PS\_OK) and Okay (AC\_OK) LEDs indicate the status for the module as shown in the following table.

PS_OK LED	AC_OK LED	Status
Green	Green	Power supply is on and outputting power to the switch.
Off	Off	No power is present.
Amber		Output has failed.
