config 802.11 cleanair

config 802.11 cleanair

To enable or disable CleanAir for the 802.11 a or 802.11 b/g network, use the **config 802.11 cleanair** command.

```
config 802.11 {a | b} cleanair {alarm {air-quality {disable | enable | threshold alarm_threshold} | device {disable device_type | enable device_type | reporting {disable | enable}} | unclassified {disable | enable | threshold alarm_threshold} } | device {disable device_type | enable device_type | reporting {disable | enable}} | disable {network | cisco_ap} | enable {network | cisco_ap} }
```

Syntax Description		
a		Specifies the 802.11a network.
b		Specifies the 802.11b/g network.
alarm		Configure 5-GHz cleanair alarms.
air-quality		Configures the 5-GHz air quality alarm.
enable		Enables the CleanAir settings.
disable		Disables the CleanAir settings.
threshold		Configure the 5-GHz air quality alarm threshold.
<i>alarm_threshold</i>		Air quality alarm threshold (1 is bad air quality, and 100 is good air quality).
device		Configures the 5-GHz cleanair interference devices alarm.

<i>device_type</i>	Device types. The device types are as follows:				
	<ul style="list-style-type: none"> • 802.11-nonstd—Devices using nonstandard Wi-Fi channels. • 802.11-inv—Devices using spectrally inverted Wi-Fi signals. • superag—802.11 SuperAG devices. • all —All interference device types. • cont-tx—Continuous Transmitter. • dect-like—Digital Enhanced Cordless Communication (DECT) like phone. • tdd-tx—TDD Transmitter. • jammer—Jammer. • canopy—Canopy devices. • video—Video cameras. • wimax-mobile—WiMax Mobile. • wimax-fixed—WiMax Fixed. 				
reporting	Configures the 5-GHz CleanAir interference devices alarm reporting.				
unclassified	Configures the 5-GHz air quality alarm on exceeding unclassified category severity.				
<i>network</i>	5-GHz Cisco APs.				
<i>cisco_ap</i>	Name of the access point to which the command applies.				
Command Default	The default CleanAir settings for the 802.11 a or 802.11 b/g network is disabled.				
Command History	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left;">Release</th><th style="text-align: left;">Modification</th></tr> </thead> <tbody> <tr> <td>7.6</td><td>This command was introduced in a release earlier than Release 7.6.</td></tr> </tbody> </table>	Release	Modification	7.6	This command was introduced in a release earlier than Release 7.6.
Release	Modification				
7.6	This command was introduced in a release earlier than Release 7.6.				

The following example shows how to enable the CleanAir settings on access point ap_24:

```
(Cisco Controller) > config 802.11a cleanair enable ap_24
```

[config 802.11 cleanair device](#), on page 4

config 802.11 cleanair device

config 802.11 cleanair device

To configure CleanAir interference device types, use the **config 802.11 cleanair device** command.

```
config 802.11 {a | b} cleanair device {enable | disable | reporting {enable | disable}} {device_type}
```

Syntax Description		
	a	Specifies the 802.11a network.
	b	Specifies the 802.11b/g network.
	enable	Enables the CleanAir reporting for the interference device type.
	disable	Disables the CleanAir reporting for the interference device type.
	reporting	Configures CleanAir interference device reporting.
	enable	Enables the 5-GHz Cleanair interference devices reporting.
	disable	Disables the 5-GHz Cleanair interference devices reporting.
	<i>device_type</i>	Interference device type. The device type are as follows: <ul style="list-style-type: none"> • 802.11-nonstd—Devices using nonstandard WiFi channels. • 802.11-inv—Devices using spectrally inverted WiFi signals. • superag—802.11 SuperAG devices. • all —All interference device types. • cont-tx—Continuous Transmitter. • dect-like—Digital Enhanced Cordless Communication (DECT) like phone. • tdd-tx—TDD Transmitter. • jammer—Jammer. • canopy—Canopy devices. • video—Video cameras. • wimax-mobile—WiMax Mobile. • wimax-fixed—WiMax Fixed.

Command Default	The default setting CleanAir reporting for the interference device type is disabled.	
Command History	Release	Modification
	7.6	This command was introduced in a release earlier than Release 7.6.

The following example shows how to enable the CleanAir reporting for the device type jammer:

```
(Cisco Controller) > config 802.11a cleanair device enable jammer
```

The following example shows how to disable the CleanAir reporting for the device type video:

```
(Cisco Controller) > config 802.11a cleanair device disable video
```

The following example shows how to enable the CleanAir interference device reporting:

```
(Cisco Controller) > config 802.11a cleanair device reporting enable
```

Related Topics

[config 802.11 cleanair](#), on page 2

config 802.11 cleanair alarm

config 802.11 cleanair alarm

To configure the triggering of the air quality alarms, use the **config 802.11 cleanair alarm** command.

```
config 802.11{a | b} cleanair alarm {air-quality {disable | enable | threshold alarm_threshold} | device {disable device_type | enable device_type} | reporting {disable | enable} | unclassified {disable | enable | threshold alarm_threshold} }
```

Syntax Description		
a		Specifies the 802.11a network.
b		Specifies the 802.11b/g network.
air-quality		Configures the 5-GHz air quality alarm.
disable		Disables the 5-GHz air quality alarm.
enable		Enables the 5-GHz air quality alarm.
threshold		Configures the 5-GHz air quality alarm threshold.
<i>alarm_threshold</i>		Air quality alarm threshold (1 is bad air quality, and 100 is good air quality).
device		Configures the 5-GHz cleanair interference devices alarm.
all		Configures all the device types at once.
reporting		Configures the 5-GHz CleanAir interference devices alarm reporting.
unclassified		Configures the 5-GHz air quality alarm on exceeding unclassified category severity.

device_type

Device types. The device types are as follows:

- 802.11-nonstd—Devices using nonstandard Wi-Fi channels.
- 802.11-inv—Devices using spectrally inverted Wi-Fi signals.
- superag—802.11 SuperAG devices.
- all —All interference device types.
- cont-tx—Continuous Transmitter.
- dect-like—Digital Enhanced Cordless Communication (DECT) like phone.
- tdd-tx—TDD Transmitter.
- jammer—Jammer.
- canopy—Canopy devices.
- video—Video cameras.
- wimax-mobile—WiMax Mobile.
- wimax-fixed—WiMax Fixed.

Command Default

The default setting for 5-GHz air quality alarm is enabled.

Command History

Release	Modification
7.6	This command was introduced in a release earlier than Release 7.6.

The following example shows how to enable the CleanAir alarm to monitor the air quality:

```
(Cisco Controller) > config 802.11a cleanair alarm air-quality enable
```

The following example shows how to enable the CleanAir alarm for the device type video:

```
(Cisco Controller) > config 802.11a cleanair alarm device enable video
```

The following example shows how to enable alarm reporting for the CleanAir interference devices:

```
(Cisco Controller) > config 802.11a cleanair alarm device reporting enable
```

Related Topics

[config 802.11 cleanair](#), on page 2

config advanced 802.11 channel cleanair-event

config advanced 802.11 channel cleanair-event

To configure CleanAir event driven Radio Resource Management (RRM) parameters for all 802.11 Cisco lightweight access points, use the **config advanced 802.11 channel cleanair-event** command.

```
config advanced 802.11{a | b} channel cleanair-event {enable | disable | sensitivity [low | medium | high] | custom threshold threshold_value}
```

Syntax Description		
a		Specifies the 802.11a network.
b		Specifies the 802.11b/g network.
enable		Enables the CleanAir event-driven RRM parameters.
disable		Disables the CleanAir event-driven RRM parameters.
sensitivity		Sets the sensitivity for CleanAir event-driven RRM.
low		(Optional) Specifies low sensitivity.
medium		(Optional) Specifies medium sensitivity
high		(Optional) Specifies high sensitivity
custom		Specifies custom sensitivity.
threshold		Specifies the EDRRM AQ threshold value.
<i>threshold_value</i>		Number of custom threshold.
Command Default	None	
Command History	Release	Modification
	7.6	This command was introduced in a release earlier than Release 7.6.

The following example shows how to enable the CleanAir event-driven RRM parameters:

```
(Cisco Controller) > config advanced 802.11 channel cleanair-event enable
```

The following example shows how to configure high sensitivity for CleanAir event-driven RRM:

```
(Cisco Controller) > config advanced 802.11 channel cleanair-event sensitivity high
```

- [config 802.11-a](#)

config advanced 802.11 channel pda-prop

To enable or disable propagation of persistent devices, use the **config advanced 802.11 channel pda-prop** command.

```
config advanced 802.11 { a | b } channel pda-prop { enable | disable }
```

Syntax Description	
a	Specifies the 802.11a network.
b	Specifies the 802.11b/g network.
enable	Enables the 802.11 network DCA list option for the outdoor access point.
disable	Disables the 802.11 network DCA list option for the outdoor access point.

Command Default The default 802.11 network DCA list option for the outdoor access point is disabled.

The following example shows how to enable or disable propagation of persistent devices:

```
(Cisco Controller) > config advanced 802.11 channel pda-prop enable
```

Channel Assignment Information	
Current Channel Average Energy.....	-86 dBm
Previous Channel Average Energy.....	-75 dBm
Channel Change Count.....	109
Last Channel Change Time.....	Wed Sep 29 12:53e:34
2004	
Recommended Best Channel.....	44
RF Parameter Recommendations	
Power Level.....	1
RTS/CTS Threshold.....	2347
Fragmentation Threshold.....	2346
Antenna Pattern.....	0

test cleanair show

To display details of the CleanAir configuration, use the **test cleanair show** command.

```
test cleanair show {aq all | idr {ap cisco_ap | all} | neighbors cisco_ap | summary }
```

Syntax Description	aq all Displays all air quality information. idr Displays the interference devices of the 802.11a/n and 802.11b/g/n radio bands for access points. ap Displays the interference devices of the 802.11a/n and 802.11b/g/n radio bands for an access point. cisco_ap Name of the Cisco access point all Displays the interference devices of the 802.11a/n and 802.11b/g/n radio bands for all access points. neighbors Displays the neighbors of an access point. summary Displays a summary of the CleanAir configuration.				
Command Default	None				
Command History	<table border="1"> <thead> <tr> <th>Release</th><th>Modification</th></tr> </thead> <tbody> <tr> <td>7.6</td><td>This command was introduced in a release earlier than Release 7.6.</td></tr> </tbody> </table>	Release	Modification	7.6	This command was introduced in a release earlier than Release 7.6.
Release	Modification				
7.6	This command was introduced in a release earlier than Release 7.6.				

The following example shows how to display a summary of the CleanAir configuration:

```
(Cisco Controller) > test cleanair show summary
CleanAir system info:
Supported spectrum MMAP number = 500
Supported spectrum LMAP number = 500
Allocated SI entries          = 0 of 500
Allocated IDR cluster entries = 0 of 10000
Allocated IDR device entries  = 0 of 40000
Virtual device support is enabled
```

The following example shows how to display the interference devices for an access point:

```
(Cisco Controller) > test cleanair show idr ap AP_1240_floor1
Interference devices for AP_1240_floor1
Identified devices on slot 0
Identified devices on slot 1
```

test cleanair show
