## [Introduction](#)

Ce document fournit un exemple de configuration pour IPsec entre le routeur Cisco 871 et un routeur Cisco 7200VXR utilisant Easy VPN (EzVPN). Le routeur 7200 agit en tant que serveur Easy VPN, tandis que le routeur 871 agit en tant que client distant Easy VPN. Dans cet exemple, les interfaces de bouclage sont utilisées sur les deux routeurs en tant que réseaux privés. Elles peuvent être remplacées par d'autres interfaces telles que des interfaces FastEthernet ou série, au besoin.

Afin de configurer IPsec entre un routeur PIX/ASA 7.x et un routeur Cisco 871 utilisant Easy VPN, référez-vous à [Exemple de configuration Easy VPN PIX/ASA 7.x avec un ASA 5500 comme serveur et Cisco 871 comme Easy VPN Remote](#).

Afin de configurer IPsec entre le client matériel Easy VPN Remote Cisco IOS® et le serveur Easy VPN PIX, référez-vous à [Exemple de configuration du client matériel Easy VPN Remote IOS vers un serveur Easy VPN PIX](#).

Afin de configurer un routeur Cisco IOS en tant qu'EzVPN en [mode d'extension réseau \(NEM\)](#) qui se connecte à un concentrateur Cisco VPN 3000, référez-vous à [Configuration du client Cisco EzVPN sur Cisco IOS avec le concentrateur VPN 3000](#).

## [Conditions préalables](#)

## Conditions requises

Assurez-vous d'avoir une compréhension de base des systèmes d'exploitation IPsec et Cisco 7200/871 avant de tenter cette configuration.

## Components Used

Les informations contenues dans ce document sont basées sur les versions de matériel et de logiciel suivantes :

- Cisco Easy VPN Server est un routeur 7200 (VXR) qui exécute le logiciel Cisco IOS® Version 12.4(4)T1
- Cisco Easy VPN Remote est un routeur 871W qui exécute le logiciel Cisco IOS Version 12.4(2)T1

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

## Conventions

Pour plus d'informations sur les conventions utilisées dans ce document, reportez-vous à [Conventions relatives aux conseils techniques Cisco](#).

## Configuration

Cette section vous fournit des informations pour configurer les fonctionnalités décrites dans ce document.

**Remarque :** Utilisez [l'outil de recherche de commandes](#) (clients [inscrits](#) seulement) pour en savoir plus sur les commandes figurant dans le présent document.

## Diagramme du réseau

Ce document utilise la configuration réseau suivante :

**Remarque :** les interfaces de bouclage simulent les PC internes.

## Configurations

Ce document utilise les configurations suivantes :

- [Easy VPN Server \(routeur Cisco 7200VXR\)](#)
- [Easy VPN Remote \(routeur Cisco 871W\)](#)

## Easy VPN Server (routeur Cisco 7200VXR)

Packet sent with a source address of 10.12.130.1
!!!!!
Success rate is 100 percent (5/5), round-trip min/avg/max = 1/2/4 ms
```

## Dépannage

Utilisez cette section pour dépanner votre configuration.

L'[Outil Interpréteur de sortie \(clients enregistrés uniquement\) \(OIT\)](#) prend en charge certaines commandes **show**. Utilisez l'OIT pour afficher une analyse de la sortie de la commande **show**.

**Remarque :** Consulter les [renseignements importants sur les commandes de débogage](#) avant d'utiliser les commandes de **débogage**.

Si vous avez configuré Easy VPN Remote et Easy VPN Server comme décrit dans ce document et que vous rencontrez toujours des problèmes, rassemblez la sortie **de débogage** de chaque périphérique et la sortie des commandes **show** pour analyse par le support technique Cisco.

Ces sections affichent les commandes **debug** et un exemple de résultat :

- [Commandes Easy VPN Server](#)
- [Commandes Easy VPN Remote](#)

## [Commandes Easy VPN Server](#)

- **debug crypto ipsec** — affiche les négociations IPsec de la Phase 2.
- **debug crypto isakmp** — affiche les négociations ISAKMP de la Phase 1.

```
