Introduction

Ce document explique comment configurer une connexion entre un routeur à l'aide de l'authentification étendue locale et le client VPN Cisco. Logiciel Cisco IOS® Versions 12.2(15)T2 et connexions de support supérieures du Client VPN Cisco 3.x. Le client VPN 3.x utilise la stratégie de groupe 2 Diffie Hellman (DH). La commande **isakmp policy # group 2** permet aux clients 3.x de se connecter.

Pour plus d'informations sur la configuration de ces périphériques à l'aide de Cisco Secure VPN Client 1.1, consultez [Configuration de Cisco Secure VPN Client 1.1 pour Windows à IOS à l'aide de l'authentification étendue locale](#).

Référez-vous à [Exemple de configuration du tunnel IPsec entre le routeur IOS et le client VPN Cisco 4.x pour Windows avec l'authentification utilisateur TACACS+](#) afin d'en savoir plus sur le scénario où l'authentification utilisateur se produit en externe avec le protocole TACACS+.

Référez-vous à [Configuration d'IPSec entre un routeur Cisco IOS et un client VPN Cisco 4.x pour Windows utilisant RADIUS pour l'authentification utilisateur](#) afin d'en savoir plus sur le scénario où l'authentification utilisateur se produit en externe avec le protocole RADIUS.

Avant de commencer

Conventions

Pour plus d'informations sur les conventions des documents, référez-vous aux [Conventions utilisées pour les conseils techniques de Cisco](#).

Conditions préalables

Avant d'essayer cette configuration, veuillez vous assurer que vous remplissez les conditions préalables suivantes :

- Un pool d'adresses à attribuer pour la sécurité IP (IPSec)
- un utilisateur local sur le routeur IOS avec **cisco** comme nom et **cisco** comme mot de passe
- groupe appelé **3000clients** avec mot de passe **cisco123**

Components Used

Les informations dans ce document sont basées sur les versions de logiciel et de matériel ci-dessous.

- Un routeur 3640 exécutant 12.2(15)T2
- Client VPN Cisco pour Windows version 3.5 (tout client VPN 3.x doit fonctionner)

Le résultat de la commande **show version** sur le routeur est présenté ci-dessous.

```
3640#show version
Cisco Internetwork Operating System Software
IOS (tm) 3600 Software (C3640-JK903S-M), Version 12.2(15)T2,
  RELEASE SOFTWARE (fc2)
TAC Support: http://www.cisco.com/tac
Copyright (c) 1986-2003 by cisco Systems, Inc.
Compiled Wed 30-Apr-03 05:42 by nmasa

Les informations présentées dans ce document ont été créées à partir de périphériques dans un environnement de laboratoire spécifique. All of the devices used in this document started with a cleared (default) configuration. Si vous travaillez dans un réseau opérationnel, assurez-vous de bien comprendre l'impact potentiel de toute commande avant de l'utiliser.

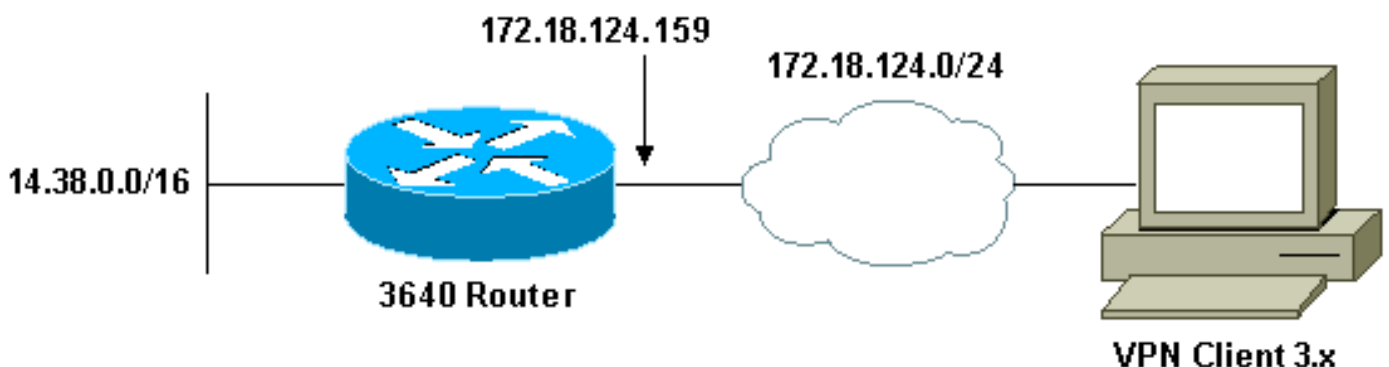

Configuration

Cette section vous fournit des informations pour configurer les fonctionnalités décrites dans ce document.

Remarque : Pour en savoir plus sur les commandes utilisées dans le présent document, utilisez [l'outil de recherche de commandes](#) (clients [inscrits](#) seulement).

Diagramme du réseau

Ce document utilise la configuration réseau indiquée dans le diagramme suivant :

Configurations

Ce document utilise les configurations présentées ci-dessous.

[Configuration du client VPN 3.x](#)

Cette section explique comment configurer le client VPN 3.x.

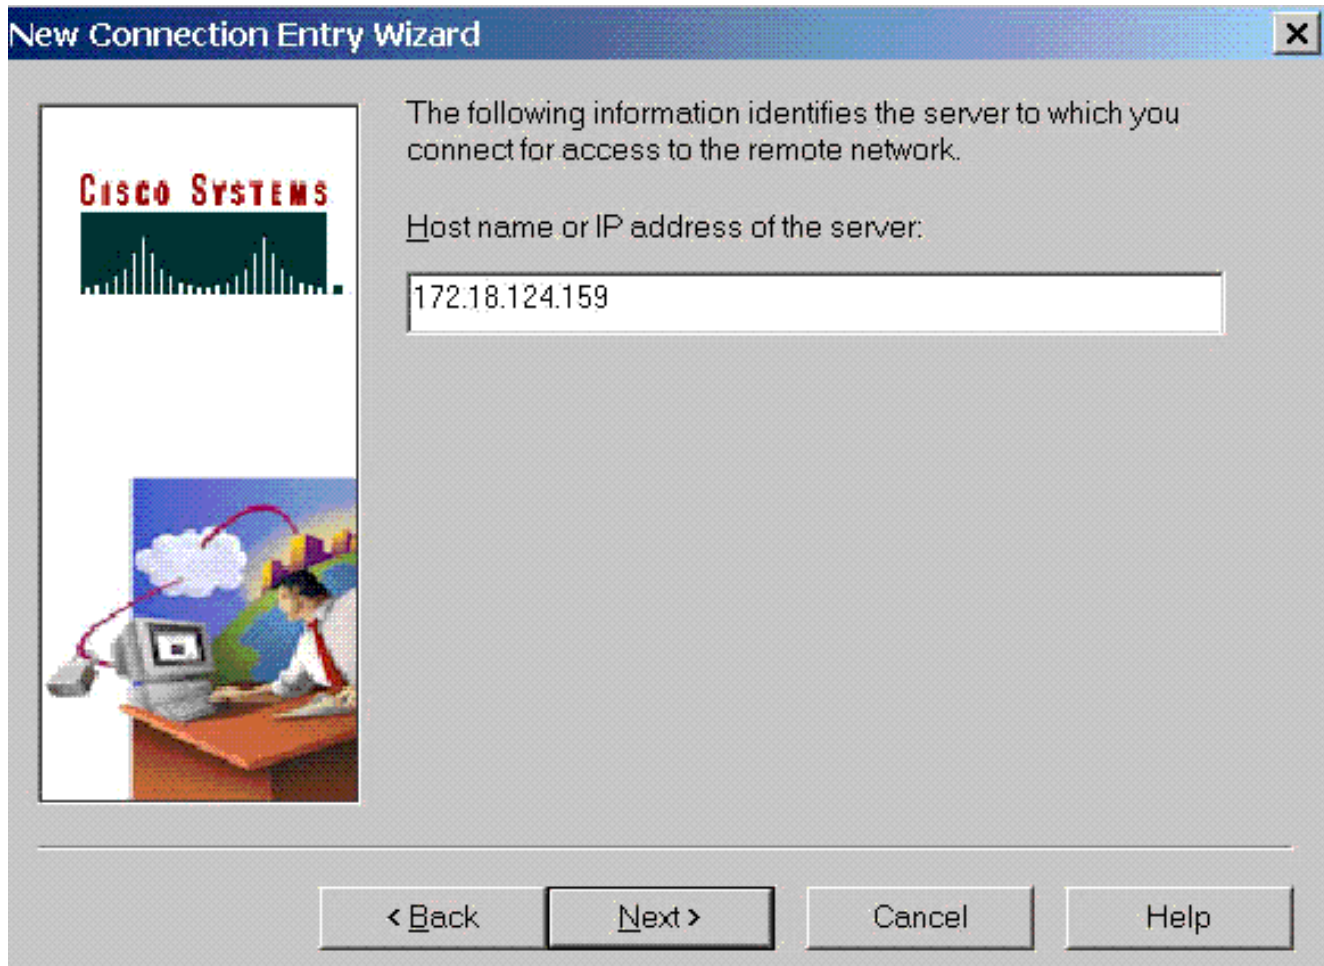

1. Lancez le client VPN, puis cliquez sur **Nouveau** pour créer une nouvelle connexion.

2. Lorsque vous y êtes invité, attribuez un nom à votre entrée. Vous pouvez également entrer une description si vous le souhaitez. Cliquez sur **Suivant** lorsque vous avez terminé.

3. Entrez l'adresse IP de l'interface publique du routeur. Cliquez sur **Suivant** lorsque vous avez terminé.

4. Sous **Informations d'accès au groupe**, saisissez le nom et le mot de passe du groupe. L'exemple ci-dessous montre un groupe portant le nom « 3000client » et le mot de passe « cisco123 ». Confirmez le mot de passe, puis cliquez sur **Suivant** pour continuer.

New Connection Entry Wizard

Your administrator may have provided you with group parameters or a digital certificate to authenticate your access to the remote server. If so, select the appropriate authentication method and complete your entries .

Group Access Information

Name: 3000client

Password: cisco123

Confirm Password: cisco123

Certificate

Name: Administrator (Microsoft)

Validate Certificate...

< Back Next > Cancel Help

5. Cliquez sur **Terminer** pour enregistrer le profil dans le Registre.

New Connection Entry Wizard

You have successfully created a new virtual private networking connection entry named:

IOS

Click Finish to save this entry.

To connect to the remote network, select the Connect button from the main window.

To modify this connection entry, click Options on the main window and select Properties from the menu that appears.

< Back

Finish

Cancel

Help

6. Cliquez sur **Connect** pour vous connecter au routeur. La fenêtre affiche des messages lisant « Négociation des profils de sécurité » et « Votre lien est désormais sécurisé ».

[Activation de la transmission tunnel partagée](#)

Pour activer la transmission tunnel partagée pour les connexions VPN, assurez-vous qu'une liste d'accès est configurée sur le routeur. Dans l'exemple ci-dessous, la commande **access-list 108** est associée au groupe à des fins de fractionnement en canaux, et le tunnel est formé au réseau 14.38.X.X /16. Le trafic circule non chiffré vers les périphériques ne figurant pas dans la liste de contrôle d'accès 108 (par exemple, Internet).

```
access-list 108 permit ip 14.38.0.0 0.0.255.255
 14.1.1.0 0.0.0.255
```

Appliquez ensuite la liste d'accès aux propriétés du groupe.

```
crypto isakmp client configuration group 3000client
key cisco123
dns 14.38.100.10
wins 14.38.100.20
domain cisco.com
```

```
pool ippool
acl 108
```

Vérification

Cette section présente des informations que vous pouvez utiliser pour vous assurer que votre configuration fonctionne correctement.

Certaines commandes **show** sont prises en charge par l'[Output Interpreter Tool](#) (clients enregistrés uniquement), qui vous permet de voir une analyse de la sortie de la commande show.

```
3640#show crypto isakmp sa
