Risolvere i problemi relativi all'errore: Impossibile recuperare i dati della licenza in Unity Connection Speechview

Sommario

Introduzione

Questo documento descrive le azioni da eseguire quando Cisco Unity Connection (CUC) versione 12.5(1) sull'interfaccia utente grafica (GUI) visualizza il messaggio di errore: **Impossibile recuperare i dati della licenza. Per ulteriori informazioni, vedere i registri diagnostici di CuSlmSvr** all'indirizzo enable/register the Speechview service.

Prerequisiti

Requisiti

Cisco raccomanda la conoscenza dei seguenti argomenti:

- Cisco Unity Connection.
- Funzione Cisco Speechview.

Componenti usati

Il documento può essere consultato per tutte le versioni software o hardware.

Le informazioni discusse in questo documento fanno riferimento a dispositivi usati in uno specifico ambiente di emulazione. Su tutti i dispositivi menzionati nel documento la configurazione è stata ripristinata ai valori predefiniti. Se la rete è operativa, valutare attentamente eventuali conseguenze derivanti dall'uso dei comandi.

Analisi log

Quando viene visualizzato il messaggio di errore, è necessario raccogliere i log di **CuSlmSvr** (Connection Smart License Manager Server in RTMT) per analizzare ulteriormente il problema.

Il processo ha inizio:

Soluzione

In genere, è possibile superare l'errore **Impossibile recuperare i dati della licenza** emettendo un nuovo token per il server CUC nel satellite e registrando nuovamente l'intero server.

Quindi, tentare i passi successivi e provare più avanti:

Abilitare la **trascrizione SpeechView dei messaggi vocali** nella **classe di servizio**: I membri della classe di servizio possono visualizzare le trascrizioni dei messaggi vocali utilizzando un client IMAP configurato per accedere ai messaggi utente.

Procedura:

Passaggio 1. In Amministrazione di Cisco Unity Connection, espandere **Class of Service** e selezionare **Class of Service**.

Passaggio 2. Nella pagina Cerca classe di servizio, selezionare la **classe di servizio** in cui si desidera abilitare la trascrizione SpeechView o crearne una nuova selezionando **Aggiungi nuovo.**

Passaggio 3. Nella pagina **Modifica classe di servizio**, in **Funzionalità di gestione licenze**, selezionare **Usa servizio di trascrizione SpeechView standard** per abilitare la trascrizione standard. Analogamente, è possibile selezionare l'opzione **Usa servizio di trascrizione SpeechView Pro** per abilitare la trascrizione professionale.

Passaggio 4. Selezionare le opzioni applicabili nella sezione servizio di trascrizione e selezionare **Salva**. Per informazioni su ogni campo, vedere **Guida > Questa pagina**.

Il messaggio di errore rilevato deve scomparire dopo l'esecuzione dei passaggi precedenti ed è possibile continuare con la registrazione del servizio Speechview.
