

Cisco Unity Connection

Medium

Product ID : cisco-sa-

20181003-uc-xss

Published : 2018-10-03 16:00

Version : Final

CVSS Score : 4.8

Workarounds : No workarounds available

Cisco IDs : [CSCvj50052](#) [CSCvj50043](#)

[CVE-2018-](#)

[15426](#)

Summary: A cross-site scripting (XSS) vulnerability in Cisco Unity Connection versions 7.0 through 8.0 could allow an attacker to inject malicious HTML code into the user interface, which could be executed by the user's browser.

Impact: A successful exploit could result in information disclosure and client-side script execution.

Cisco Unity Connection Affected Versions:

Webmail 7.0(1) through 7.0(2109) and 7.0(2110) through 7.0(2115), and Cisco Unity Connection 7.0(1) through 7.0(2109) and 7.0(2110) through 7.0(2115). Cisco Unity Connection 7.0(2116) through 7.0(2120) are not affected.

CVSS Score: 4.8 (Medium)

Workarounds: No workarounds are currently available for this vulnerability.

References: [Cisco Security Advisory: Cisco-SA-20181003-UC-XSS](#)

Additional Information: This vulnerability is caused by a lack of proper input validation in the webmail interface.

Conclusion: Cisco recommends that users of affected versions upgrade to the latest version or apply the patch as soon as possible.
