Workarounds : No workarounds available

Cisco Security ID : [CSCvm03461](#)

Summary: A cross-site scripting (XSS) vulnerability exists in the Cisco TelePresence Management Suite (TMS) Web API. An attacker can inject malicious HTML code into the response of the /api/v1/users endpoint, which is rendered in the user interface. This can lead to session hijacking or other malicious actions.

Details

Cisco TelePresence Management

Suite (TMS) Web API, Cisco Security ID: CSCvm03461, CVE-2018-15467, Severity: Medium

The vulnerability is located in the /api/v1/users endpoint of the Cisco TelePresence Management Suite (TMS) Web API. The endpoint returns a list of users, and the response is rendered in the user interface.

The vulnerability is caused by the lack of output encoding in the response of the /api/v1/users endpoint. An attacker can inject malicious HTML code into the response, which is rendered in the user interface.

The vulnerability can be exploited by sending a request to the /api/v1/users endpoint with a malicious payload in the body. The response will contain the malicious HTML code, which is rendered in the user interface.

For more information, please refer to the [Cisco Security Advisory](https://sec.cloudapps.cisco.com/security/center/content/CiscoSecurityAdvisory/cisco-sa-20190109-tms-xss).
