How to check the IOS version on a Cisco IOS device

To check the IOS version on a Cisco IOS device, you can use the `show version` command. This command displays the IOS version, the device model, and other system information. For example, on a Cisco IOS XE device, the output of the `show version` command might look like this:

`show version`
Cisco IOS Software, XE3-MIPS32, Version 15.1(4)M2, XE3-MIPS32
Copyright (c) 2013 Cisco and/or its affiliates. All rights reserved. Cisco Confidential

The output of the `show version` command shows the IOS version (15.1(4)M2) and the device model (XE3-MIPS32). You can also use the `show run` command to view the configuration of the device, which includes the IOS version.

How to check the IOS version on a Cisco IOS device

To check the IOS version on a Cisco IOS device, you can use the `show version` command. This command displays the IOS version, the device model, and other system information. For example, on a Cisco IOS XE device, the output of the `show version` command might look like this:

`show version`
Cisco IOS Software, XE3-MIPS32, Version 15.1(4)M2, XE3-MIPS32
Copyright (c) 2013 Cisco and/or its affiliates. All rights reserved. Cisco Confidential

The output of the `show version` command shows the IOS version (15.1(4)M2) and the device model (XE3-MIPS32). You can also use the `show run` command to view the configuration of the device, which includes the IOS version.

- `show version` command displays the IOS version, device model, and other system information.
- `show run` command displays the configuration of the device, which includes the IOS version.

For more information, see the [Cisco IOS Software Checker](#) page. This page provides information about the IOS version and the device model. You can also use the `show version` command to check the IOS version on a Cisco IOS device.

For more information, see the [Cisco IOS Software Checker](#) page. This page provides information about the IOS version and the device model. You can also use the `show version` command to check the IOS version on a Cisco IOS device.
