

# Cisco StarOS 3.14.1 R IPv6

## Denial of Service (DoS) via IPv6 Neighbor Solicitation (NS) Flood

**Severity:** High  
**Product:** Cisco StarOS 3.14.1 R  
**Version:** 3.14.1 R  
**CVSS Score:** 8.6  
**Workarounds:** No workarounds available  
**Cisco ID:** CSCvs50343  
**CVE ID:** CVE-2020-3324

Denial of Service (DoS) via IPv6 Neighbor Solicitation (NS) Flood

### Summary

Cisco StarOS 3.14.1 R IPv6

A Denial of Service (DoS) attack can be performed against Cisco StarOS 3.14.1 R IPv6 by sending a large number of Neighbor Solicitation (NS) packets to the target device.

The attack is performed by sending a large number of Neighbor Solicitation (NS) packets to the target device.

The attack is performed by sending a large number of Neighbor Solicitation (NS) packets to the target device.

IPv6

The attack is performed by sending a large number of Neighbor Solicitation (NS) packets to the target device.

Denial of Service (DoS) via IPv6 Neighbor Solicitation (NS) Flood

The attack is performed by sending a large number of Neighbor Solicitation (NS) packets to the target device.

The attack is performed by sending a large number of Neighbor Solicitation (NS) packets to the target device.

The attack is performed by sending a large number of Neighbor Solicitation (NS) packets to the target device.

The attack is performed by sending a large number of Neighbor Solicitation (NS) packets to the target device.
