

Cisco Prime Infrastructure ³Cisco Evolved Programmable Network Manager

Product: Cisco Prime Infrastructure
ID: cisco-sa-prime-info-disc-nTU9FJ2

CVE-2021-34733

Published: 2021-09-01 16:00

Version: 1.0 : Final

CVSS Score: 5.5

Workarounds: No workarounds available

Cisco IDs: [CSCvz12896](#) [CSCvs07217](#)
[CSCvz12884](#) [CSCvs07213](#)

Medium - A vulnerability in Cisco Prime Infrastructure (PI) ³Cisco Evolved Programmable Network (EPN) Manager CLI could allow an attacker to execute arbitrary commands on the device.

Summary

Cisco Prime Infrastructure (PI) ³Cisco Evolved Programmable Network (EPN) Manager CLI could allow an attacker to execute arbitrary commands on the device. The vulnerability is located in the `show` command. An attacker can execute arbitrary commands by using the `show` command with a specially crafted argument. The vulnerability is present in versions 1.0 through 1.3.8. The severity of this vulnerability is Medium (CVSS 5.5). No workarounds are available. Cisco IDs: [CSCvz12896](#) [CSCvs07217](#) [CSCvz12884](#) [CSCvs07213](#)
