

Cisco SD-WAN vManage

XML Entity Injection Vulnerability in Cisco SD-WAN vManage

Severity: Medium
Product: Cisco SD-WAN vManage
Version: 20.5.1
CVSS: 6.4
Workarounds: No workarounds available
Cisco ID: CSCv93084

[CVE-2021-1483](#)

Summary: Cisco SD-WAN vManage is vulnerable to XML Entity Injection via the UI.

Impact

Cisco SD-WAN vManage is vulnerable to XML Entity Injection via the UI.

The vulnerability allows an attacker to inject arbitrary XML entities into the UI, which can be used to bypass security controls and execute arbitrary code.

The vulnerability is located in the `ui` component of the `sdwan` application.

The vulnerability is caused by the use of `innerHTML` to render user input in the UI.

For more information, see the [Cisco Security Advisory](https://sec.cloudapps.cisco.com/security/center/content/CiscoSecurityAdvisory/cisco-sa-vman-xml-ext-entity-q6Z7uVUg).
