MacOS 10.14.1 Secure Endpoint Filter

MacOS 10.14.1 Secure Endpoint Filter is a component of the macOS Security framework. It provides a way to filter network traffic based on specific criteria.

1. Secure Endpoint File Monitor: This extension monitors file system activity and can detect changes to specific files or directories.

2. Cisco Secure Endpoint Filter: This extension filters network traffic based on specific rules defined in a configuration file.

3. AMP Security Extension: This extension provides security monitoring for the endpoint system.

macOS 10.14.1 Secure Endpoint Filter is available for download from the Mac App Store.

1. Secure Endpoint File Monitor: This extension monitors file system activity and can detect changes to specific files or directories.

2. Cisco Secure Endpoint Filter: This extension filters network traffic based on specific rules defined in a configuration file.

3. AMP Security Extension: This extension provides security monitoring for the endpoint system.

macOS 10.14.1 Secure Endpoint Filter is available for download from the Mac App Store.
