## [Introduction](#)

Este documento descreve a configuração de um Cisco VPN 3002 Hardware Client que se conecta a um Cisco IOS® Router no Network Extension Mode com o Cisco IOS Software Release 12.2(8)T e a funcionalidade do servidor Easy VPN (EzVPN). Isso permite que o Cisco IOS termine túneis VPN provenientes de EzVPN Clients, como VPN Clients, PIX e Cisco IOS EzVPN Clients. Há um mínimo de cinco associações de segurança (SAs) (um Internet Key Exchange [IKE] mais quatro IPSec) quando o VPN Client se conecta a um dispositivo headend. Isso se deve ao fato de que quando o VPN Client se conecta ao headend, ele sempre negocia duas SAs IPSec com um endereço IP da interface pública de um concentrador para o endereço IP do headend. Esse túnel é usado para fins de gerenciamento para se conectar ao VPN Client a partir do headend por meio da GUI ou da CLI (Command Line Interface, interface de linha de comando). Isso é feito automaticamente. As outras duas são para o tráfego de dados entre as redes atrás do VPN Client e o roteador Cisco IOS.

Consulte [Configurando o VPN 3002 Hardware Client para PIX 6.x](#) para saber mais sobre o mesmo cenário em que o servidor VPN é o PIX 6.x.

Consulte [Configurando uma Conexão entre o VPN 3002 Hardware Client e um VPN 3000 Concentrator no Network Extension Mode](#) para saber mais sobre o mesmo cenário em que o servidor VPN é o Cisco VPN 3000 Series Concentrator.

## Prerequisites

### Requirements

Não existem requisitos específicos para este documento.

### Componentes Utilizados

As informações neste documento são baseadas nestas versões de software e hardware:

- Cisco VPN 3002 Hardware Client
- Software Cisco IOS versão 12.2(8)T e posterior

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

### Conventions

Consulte as [Convenções de Dicas Técnicas da Cisco para obter mais informações sobre convenções de documentos](#).

## Configurações

Nesta seção, você encontrará informações para configurar os recursos descritos neste documento.

Nota: Use a Command Lookup Tool (somente clientes registrados) para obter mais informações sobre os comandos usados neste documento.

### Diagrama de Rede

Este documento utiliza a seguinte configuração de rede:

Este documento utiliza estas configurações.

- [Cisco IOS Router](#)
- [Cisco VPN 3002 Hardware Client](#)

## [Configurar o Cisco VPN 3002 Hardware Client](#)

Conclua estes passos para configurar o VPN Client:

1. Selecione **Configuration > Interfaces** e verifique o endereço IP.

Configuration | Interfaces Thursday, 30 May 2002  
Save Needed  R

This section lets you configure the VPN 3002 Hardware Client's network interfaces.

In the table below, or in the picture, select and click the interface you want to configure:

Interface	Status	IP Address	Subnet Mask	MAC Address	Default Gateway
<a href="#">Ethernet 1 (Private)</a>	UP	10.48.66.185	255.255.254.0	00.05.31.98.00.0A	
<a href="#">Ethernet 2 (Public)</a>	UP	209.165.200.225	255.255.255.224	00.05.31.98.00.0B	209.165.200.226
<a href="#">DNS Server(s)</a>	DNS Server Not Configured				
<a href="#">DNS Domain Name</a>					

2. Selecione **Configuration > Quick > Time and Date > Time** para definir e verificar a hora.

Configuration | Quick | Time and Date

**Time**    [Upload Config](#)    [Private Intf](#)    [Public Intf](#)    [IPSec](#)    [PAT](#)

Set the time on your device. The correct time is very important, so that logging entries are accurate.  
The current time on this device is Thursday, 30 May 2002 16:17:11.

**New Time** 16 : 23 : 13    May    / 30 / 2002    (GMT+01:00) Paris

Enable DST Support

 Click to go back without saving changes

 Click to save changes and continue

3. Selecione **Configuration > Quick > Private Interface > Private Intf** para configurar os endereços IP estáticos nos hosts internos (sem DHCP).
4. Selecione **Não** para "Deseja configurar o endereço IP da Interface Privada?".
5. Selecione **Não, não use o servidor DHCP para fornecer endereços** para "Deseja usar o servidor DHCP na Interface 1 para fornecer endereços para a LAN local?".

Configuration | Quick | Private Interface

[Time](#)   [Upload Config](#)   **Private Intf**   [Public Intf](#)   [IPSec](#)   [PAT](#)

 You are modifying the interface you are using to connect to this device. If you make any changes, you will be prompted to log in to the login screen.

**IP Address** 10.48.66.185/255.255.254.0  
**DHCP Server** Enabled (10.48.66.58 - 10.48.66.184)

**Do you want to configure the IP address of the Private Interface?**

Yes  
 No

**Do you want to use the DHCP server on Interface 1 to provide addresses for the local LAN?**

Yes, and configure the DHCP server parameters.  
 Yes, but leave the DHCP server parameters as is.  
 No, do not use the DHCP server to provide addresses.

 Click to go back without making any changes  
 Click to make changes and continue

6. Especifique o endereço IP se você tiver estático selecionando **Configuration > Quick > Public Interface > Public Intf**.
7. Na janela da Interface Pública, selecione **Especificar um endereço IP** e insira o endereço IP, a máscara de sub-rede e o gateway padrão apropriados.

Configuration | Quick | Public Interface

Time Upload Config Private Intf ✓ Public Intf IPsec

**System Name (a.k.a. hostname) may be required to be set if you use DHCP to obtain an address.**

System Name

**How do you want to configure the IP address of the Public Interface?**

Obtain an IP address from a DHCP server

Use PPPoE to connect to a public network

PPPoE User Name

PPPoE Password

Verify PPPoE Password

Specify an IP address

IP Address

Subnet Mask

Default Gateway

↩ Click to go back without saving any changes

↩ Click to save changes and continue

8. Configure o peer VPN remoto (endereço IP público do roteador). Para fazer isso, selecione Configuration > Quick > IPsec e insira fadigroup para o nome do grupo, cisco123 para a senha do grupo, fadi para o nome do usuário e cisco para a senha do usuário.

Remote Server  Enter remote server address/host name.

IPsec over TCP  Check to enable IPsec over TCP.

IPsec over TCP Port  Enter IPsec over TCP port (1 - 65535).

Use Certificate  Click to use the installed certificate.

Certificate Transmission  Entire certificate chain  
 Identity certificate only Choose how to send the digital certificate to the server.

	Name	Password	Verify
Group	<input type="text" value="fadigroup"/>	<input type="text" value="cisco123"/>	<input type="text" value="cisco123"/>
User	<input type="text" value="fadi"/>	<input type="text" value="cisco"/>	<input type="text" value="cisco"/>

9. Selecione Configuration > Quick > PAT e escolha No, use o modo de extensão de rede na janela PAT para configurar o modo de extensão de rede.

Configuration | Quick | PAT  
 Time Upload Config Private Intf ✓ Public Intf ✓

**Do you want to use PAT on the IPsec tunnel to the VPN Concentrator?**

Yes

No, use Network Extension mode

↩ Click to go back without making any changes

↩ Click to make changes and continue

Back Continue

10. Selecione **Configuration > Quick > DNS** e insira o servidor DNS e o nome de domínio do ISP para configurar o

Configuration | Quick | DNS  
 Time Upload Config Private Intf ✓ Public Intf ✓

Configure the ISP's DNS server IP address. Enter 0.0.0.0 to not use DNS.

**DNS Server** 64.102.6.247

**Domain** cisco.com

↩ Click to go back without making any changes

↩ Click to make changes and continue

Back Continue

DNS.

11. Selecione **Configuration > Quick > Static Routes** e clique em **Add** para adicionar uma rota estática à tabela de roteamento para configurar o gateway padrão do VPN Client.

## Verificar

Esta seção fornece informações que você pode usar para confirmar se sua configuração está funcionando adequadamente.

A [Output Interpreter Tool \(somente clientes registrados\) \(OIT\)](#) oferece suporte a determinados comandos `show`. Use a OIT para exibir uma análise da saída do comando `show`.

Consulte [Troubleshooting de Segurança IP - Entendendo e Usando Comandos `debug`](#) para `show` comandos pertinentes.

## Troubleshoot

Esta seção fornece informações que podem ser usadas para o troubleshooting da sua configuração.

**Observação:** se PAT habilitado for usado no cliente Cisco VPN 3002, o recarregamento removerá o nome de usuário e a senha existentes. Você precisa configurar o novo nome de usuário e senha para o cliente.

**Observação:** se o PAT desativado (NEM) for usado, o recarregamento manterá o nome de usuário e a senha desde que o head end esteja configurado para salvar o nome de usuário e a senha.

## Procedimento de Troubleshooting

Essas são informações relevantes sobre Troubleshooting para essa configuração. Para obter informações adicionais sobre solução de problemas, consulte [Solução de problemas de segurança de IP - Entendendo e usando comandos `debug`](#). Conclua estes passos para solucionar problemas de sua configuração:

1. Certifique-se de ver o estabelecimento SA da Fase 1 e Fase 2. Use a linha de base de **depuração** na seção [Comandos de Troubleshooting](#).
2. Depois de ver as SAs, envie o tráfego entre as redes protegidas para testar a conectividade.

## Comandos para Troubleshooting

A [Output Interpreter Tool \(somente clientes registrados\) \(OIT\)](#) oferece suporte a determinados [comandos show](#). Use a OIT para exibir uma análise da saída do comando show.

**Nota:** Consulte **Informações Importantes sobre Comandos de Depuração antes de usar comandos debug**.

- **debug crypto ipsec** — Exibe eventos de IPSec.
- **debug crypto isakmp** — Exibe mensagens sobre eventos de IKE.
- **debug crypto engine** — Exibe mensagens de depuração sobre mecanismos de criptografia, que executam criptografia e descriptografia.

## Depurações de cliente de hardware VPN 3002

Na GUI do VPN Client, selecione Configuration > System > Events > Classes e ative IKE, IKEDBG, IPSEC e IPSECDBG no nível 13 para o SYSLOG. Lembre-se de desabilitar as depurações após a conclusão do teste.

### Depurações de cliente de hardware VPN 3002
