Solucionar problemas de uma chamada SIP entre dois endpoints

Contents

Introduction

Este documento fornece uma configuração de exemplo de duas máquinas de fax para demonstrar como uma chamada de Session Initiation Protocol (SIP) é realizada entre dois gateways. Este documento também fornece uma explicação sobre a saída do comando debug ccsip messages para realizar o troubleshooting de falhas de chamada SIP.

Prerequisites

Requirements

Não existem requisitos específicos para este documento.

Componentes Utilizados

As informações neste documento são baseadas nestas versões de software e hardware:

- Dois aparelhos de fax
- VG224 que executa o Cisco IOS® Software Release 12.4(4)T1
- Roteador Cisco 3745 que executa o Software Cisco IOS versão 12.3(11)T8

The information in this document was created from the devices in a specific lab environment. All of the devices used in this document started with a cleared (default) configuration. If your network is live, make sure that you understand the potential impact of any command.

Conventions

Consulte as Convenções de Dicas Técnicas da Cisco para obter mais informações sobre convenções de documentos.

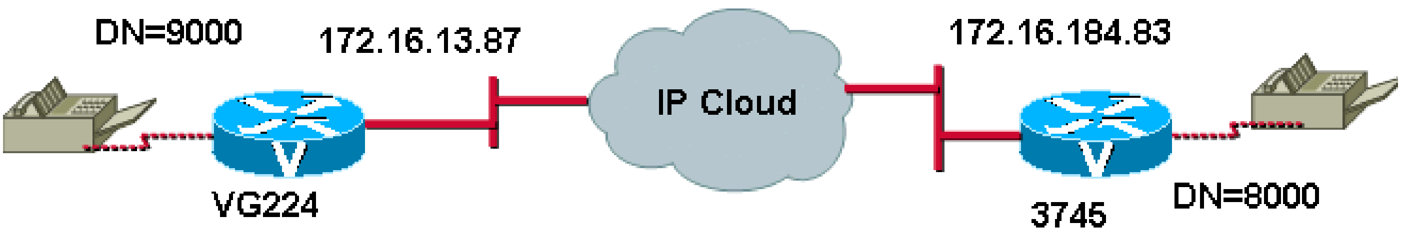
Configurar

Nesta seção, você encontrará informações para configurar os recursos descritos neste documento.

Nota:Use a Command Lookup Tool (somente clientes registrados) para obter mais informações sobre os comandos usados neste documento.

Diagrama de Rede

Este documento utiliza a seguinte configuração de rede:



Configurações

Este documento utiliza as seguintes configurações:

- VG224
- Cisco 3745

Verificar

No momento, não há procedimento de verificação disponível para esta configuração.

Troubleshoot

Use esta seção para resolver problemas de configuração.

A [Output Interpreter Tool (somente clientes registrados) (OIT) oferece suporte a determinados comandos show.] Use a OIT para exibir uma análise da saída do comando show.

Nota:Consulte Informações Importantes sobre Comandos de Depuração antes de usar comandos debug.

Esta é a saída do comando **debug ccsip messages**:

```
!--- This is the first invite message sent out !--- to the terminating SIP gateway. !--- This is
similar to a setup message in H.323 or Q.931. *Mar 1 00:33:42.419: //-
